Global Business - Nader H. Asgary 2021-01-01

The arrival of the COVID-19 pandemic throughout the globe at the end of 2019 turned global business upside down. It forced the closure of many businesses, disrupted global supply chains, reduced travel across borders, and created fear about face-to-face interactions. As the lockdowns in many countries created uncertainty about the future business activities, global business leaders were scrambling to find new strategies to safely re-establish their business relationships with their stakeholders. The existing historical economic, social, and racial injustice in the American society toward Black, Indigenous, and People of Color was compounded by the COVID-19. This led the movements of the Black Lives Matter to reenergize and become a global phenomenon. The

horrific and sad death of George Floyd and many others triggered huge global movements to demand respect for human rights and dignity for all. Additionally, climate change and environmental degradation have caused unprecedented forest fires, more frequent and damaging hurricanes, and migration demand a revived global business book. This third edition of *Global Business: An Economic, Social, and Environmental Perspective* incorporates global business issues related to COVID-19, the economic and social injustice of BIPOC, and environmental degradation where it is appropriate. The reader will understand the impact of these critical global business issues discussed in the book through examples, case studies and thought-provoking discussions. These challenges require businesses, governments, and the active engagement of citizens to succeed. The aim of this book is to bring these issues for discussion and action by these stakeholders. Each chapter includes supplementary PowerPoint slides, Test-Bank, and Teaching notes that are available for instructors only.

The Fourth Industrial Revolution - Klaus Schwab 2017-01-03
World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

This practical and engaging book provides a coherent approach to global business responsibility and ethics based on the latest research, theory, and practice. "Global Business Citizenship" combines elements of political theory, stakeholder relationships, business ethics, corporate social performance, accountability and measurement, and organizational change. Its practical approach encompasses "best practices" in stakeholder management, experiments in applying corporate values to local conditions, and social environmental auditing and reporting. Focusing on the strategic alignment and change management process for implementing business citizenship principles and practices, it is an essential supplement for any course concerned with ethics and social responsibility in today's global business climate.

Business to Business Marketing Management - Alan Zimmerman 2017-09-25

Business to business markets are considerably more challenging than consumer markets and as such demand a more specific skillset from marketers. Buyers, with a responsibility to their company and specialist product knowledge, are more demanding than the average consumer. Given that the products themselves may be highly complex, this often requires a sophisticated buyer to understand them. Increasingly, B2B relationships are conducted within a global context. However all textbooks are region-specific despite this growing move towards global business relationships - except this one. This textbook takes a global viewpoint, with the help of an international author team and cases from across the globe. Other unique features of this insightful study include: placement of B2B in a strategic marketing setting; full discussion of strategy in a global setting including hypercompetition; full chapter on ethics and CSR early in the text; and detailed review of global B2B services marketing, trade shows, and market research. This new edition has been fully revised and updated with a full set of brand new case studies and features expanded sections on digital issues, CRM, and social media as well as personal selling. More selective, shorter, and easier to read than other B2B textbooks, this is ideal for introduction to B2B and shorter courses. Yet, it is comprehensive enough to cover all the aspects of B2B marketing any marketer needs, be they students or practitioners looking to improve their knowledge.

Macroeconomics - David Miles 2012-04-09

Macroeconomics: Understanding the Global Economy, 3rd Edition is to help students - and indeed anyone - understand contemporary and past economic events that shape the world we live in, and at a sophisticated level. But it does so without focusing on mathematical techniques and models for their own sake. Theory is taken seriously - so much so that the authors go to pains to understand the key aspects of theories in a way that will not put people off before they see how theories are useful to analyse issues. The authors believe that theories are essential to better understand the world, thus the book includes a wealth of historic and current episodes and data to both see how theories can help interpret the world and also to judge their validity. Economies today are very inter-connected; what happens in China matters pretty much everywhere; and what happens in one (even small) country in the euro zone has implications for the whole euro area and beyond, consequently **Macroeconomics**, 3rd Edition adopts a very international focus.

Global drug pricing is one of the most hotly debated yet least understood aspects of the pharmaceutical industry. How should drug prices be set and what does it mean for patients? Why do governments increasingly get involved, and what is its impact on the global competitive environment?
