Achtung-Panzer! - Heinz Guderian 1995
This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Analytical Methods in Vibrations - leonard Meirovitch 1985

Out of India - Jamila Gavin 2002
'I am truly a child of both countries and both cultures.' Born to an Indian father and an English mother, Jamila Gavin's childhood was divided between two worlds. Her earliest memories are of India, where she lived in a crumbling palace built for a prince, and learned to steal sugar cane and suck mangoes. But she would spend much of her childhood in England, where she picked blackberries, got chilblains, and learned to recognise doodlebug bombs. And between the two there were unforgettable journeys, by bullock carts and tongas, crowded trains and romantic P&O liners. A touching and very personal recollection, with a backdrop of world-shaking events, from the Blitz of World War II to the struggle for Indian independence and the assassination of Gandhi. Illustrated with the author's own delightful photographs.
Bodyscapes - Allan I. Teger 2012
Can there be more than one reality at a time, and can we experience them both? These were the questions that led photographer and former psychology professor Allan I. Teger to create this collection of black and white Bodyscapes(R). At first glance, Bodyscapes appear to be landscapes; a second look shows that they are in fact nude bodies with small toys and miniatures set on them. Spanning a 35-year period, this collection shows more than 110 black and white images photographed in a single exposure without any post processing or manipulation. The body becomes the setting for golfing, skiing, mountain climbing, surfing, and other sports. Other images feature landscapes ranging from rolling farmlands to beaches and outer space. They are fun, beautiful, and sensual, but always in good taste. This elegant portfolio of Teger's images is an ideal, reality-bending addition to any art photography library.

The Biopolitics of Gender - Jemima Repo 2016 This title provides a theoretically and methodologically new and distinct approach to gender through the frameworks of biopolitics and genealogy, theorising it as a historically specific apparatus of biopower. Through the use of a diverse mix of historical and contemporary documents, the book explores how the problematisation of intersex infant genitalia in 1950s psychiatry propelled the emergence of the gender apparatus in order to socialise sexed individuals into the ideal productive and reproductive subjects of White, middle-class postwar America.

Angels and Demons in Art - Rosa Giorgi 2005 This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, Angels and Demons in Art will

delight readers with an interest in art or religious symbolism.

Philipp Fürhofer - Norman Rosenthal 2020-08-25

Combining painting, sculpture, installation and set design, Philipp Fürhofer?s multidisciplinary artistic practice is a blend of modern materials, mixed with historical elements.0After graduating from the Universität der Künste Berlin, Fürhofer spent months in hospital with heart issues, culminating in a partial transplant. Inspired by his own chest X-rays and their transparency, he created acrylic glass boxes filled with structured objects, giving them new forms and reality. Juxtaposing different layers of the works with spy mirror foil, he often uses incandescent light bulbs, LED tubes that switch on and off to reveal different visions. His paintings on the transparent surface transform his mysterious and oneiric worlds into infinite motifs, from torsos into landscapes or from rib cages into forests, making nature and humans coexist. Since 2008, he has continuously worked as set and costume designer for the most prestigious opera houses, from Amsterdam to Helsinki, including the Royal Opera Houses in London and Copenhagen.

Blueprint for Black Power - Amos N. Wilson 1998

Afrikan life into the coming millennia is imperiled by White and Asian power. True power must nest in the ownership of the real estate wherever Afrikan people dwell. Economic destiny determines biologial destiny. 'Blueprint for Black Power' details a master plan for the power revolution necessary for Black survival in the 21st century. White treatment of Afrikan Americans, despite a myriad of theories explaining White behavior, ultimately rests on the fact that they can. They possess the power to do so. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ... Aptly titled, 'Blueprint for Black Power' stops not at critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality. (Back cover).

GOLDEN - Diary of a Hip Hop Kid 1986 to 1998 - Photography and Collection by Erik Elijah Brumfield - Erik Elijah BRUMFIELD 2020-07-16
Golden: Diary of A Hip-Hop Kid, Elijah Brumfield aims to document how hip-hop history took shape in New York City. Before graffiti glossed the pages of art magazines, young counter cultural artists where slinging spray cans through alleyways and train yards, bombing New York City with the murals that were the backdrop to the Golden Age of hip-hop during the eighties and the nineties. Before musicians such as Cypress Hill and Wu Tang Clan where making videos, they were the material of revolutionary Dj's pumping new sounds through the club scenes, an underground of talent known only by a few, before being taken up by the masses. Elijah saw a home grown revolution from the streets, as participant and chronicler. From teenage graffiti artist to club DJ to music executive, Elijah Brumfield bore witness to the iconic decades of the eighties and the nineties

and its art and music. Thankfully, this inside player was toting along a camera. Golden: Diary of A Hip-Hop Kid, a very personal celebration of the graffiti, clubs, records, flyers, laminates and rappers who shaped both the era.

Vernon Subutex 1 - Virginie Despentes 2019-11-05

"Virginie Despentes's Vernon Subutex trilogy is the zeitgeistiest thing I ever read. Everything about it is contemporary, right down to the fearless woman author who doesn't think of herself as a feminist and gives an impression at least in interviews of habitually killing rapists . . . [It] has dupes and assholes and racists and the people they hate and a stunning diversity of internal monologues and trans true love. Like the last decade, it searches for a happy ending that isn't merely personal and can't find it . . . These novels with their depth and detail kick TV's sorry ass." —Nell Zink, Bustle, "The Best Books Of The 2010s" From the provocative writer and filmmaker Virginie Despentes comes volume one of her acclaimed trilogy of novels, Vernon Subutex—short-listed for the Man Booker International Prize. But who is Vernon Subutex? Vernon Subutex was once the proprietor of Revolver, an infamous music shop in Paris, where his name was legend throughout Paris. By the 2000s, however, with the arrival of the internet and the decline in CD and vinyl sales, his shop is struggling, like so many others. When it closes, Subutex finds himself with nowhere to go and nothing to do. Before long, his savings are gone, and when the mysterious rock star who had been covering his rent suddenly drops dead of a drug overdose, Subutex finds himself launched on an epic saga of couch-surfing, boozing, and coke-snorting before finally winding up homeless. Just as he resigns himself to life as a panhandler, a throwaway comment he once made on Facebook takes the internet by storm. The word is out: Subutex is lugging around a bunch of VHS tapes shot by that same dead rock musician—his last recordings on this earth. Soon a crowd of wild characters, from screen writers to social media groupies, from porn stars to failed musicians to random misfits, are hot on Vernon's trail . . . but Vernon is none the wiser.

The Common Body - Paula Josa-Jones 2017
In this fascinating book, dancer, choreographer, and visual artist Paula Josa-Jones combines her two greatest passions--movement and horses--in order to help us develop somatic awareness: Consciousness of breath, integrated and coherent motion, and development of movements and touch into sensitive channels of communication. Through stories and exercises, Josa-Jones demonstrates how connecting with the horse can develop this awareness. The body and mind of the horse and the human, she writes, are connected at the deepest levels--anatomically, energetically, psychically, spiritually, and emotionally. And because horses are authentic beings--their inside feelings and intentions match the outside expression and behavior--our interactions with them can help us become more aware of our inner emotional landscape and its relationship to what we are expressing outwardly. Horses offer us the opportunity to become more trustworthy and more comfortable in our own skin.By listening inwardly, feeling the connections between our mind states and our expression, we become more attuned to the currents passing among us, more able to blend, empathize, and act with balance, sensitivity, and kindness.
