The Creators - Daniel J. Boorstin 2012-04-11
By piecing the lives of selected individuals into a grand mosaic, Pulitzer Prize-winning historian Daniel J. Boorstin explores the development of artistic innovation over 3,000 years. A hugely ambitious chronicle of the arts that Boorstin delivers with the scope that made his *Discoverers* a national bestseller. Even as he tells the stories of such individual creators as Homer, Joyce, Giotto, Picasso, Handel, Wagner, and Virginia Woolf, Boorstin assembles them into a grand mosaic of aesthetic and intellectual invention. In the process he tells us not only how great art (and great architecture and philosophy) is created, but where it comes from and how it has shaped and mirrored societies from Vedic India to the twentieth-century United States.

De Materia Medica - Pedanius Dioscorides 2011

The New Public Service - Janet V Denhardt 2016-09-16

This widely praised work provides a framework for the many voices calling for the reaffirmation of democratic values, citizenship, and service in the public interest. The expanded edition includes an all-new chapter that addresses the practical issues of applying these ideals in actual, real-life situations. "The New Public Service, Expanded Edition" is organized around a set of seven core principles: serve citizens, not customers; seek the public interest; value citizenship and public service above entrepreneurship; think strategically, act democratically; recognize that accountability isn't simple; serve, rather than steer; and value people, not just productivity. The book asks us to think carefully and critically about what public service is, why it is important, and what values ought to guide what we do and how we do it. It celebrates what is distinctive, important and meaningful about public service and considers how we might better live up to those ideals and values. All students and serious practitioners in public administration and public policy should read this book. While debates about public

policy issues will surely continue, this compact, clearly written volume provides an important framework for public service based on and fully integrated with citizen discourse and the public interest.

The Future of Business Schools - Thomas

Durand 2008-01-15

European Business Schools tend to imitate their North American counterparts in an attempt to catch up in the worldwide competition for knowledge creation and training in management. Is this relevant? To what extent do business schools in Europe contribute to competitiveness of the economy? What will be the impact of new technologies, e.g. on executive education? Will there be a European job market for business professors? Will market forces win against state owned universities? The book compares the current institutional setting of business schools in various countries and presents five foresight scenarios for 2020.

Applied Geophysics - W. M. Telford 1990-10-26

This is the completely revised and updated version of the popular and highly regarded textbook, Applied Geophysics. It describes the physical methods involved in exploration for hydrocarbons and minerals, which include gravity, magnetic, seismic, electrical, electromagnetic, radioactivity, and well-logging methods. All aspects of these methods are described, including basic theory, field equipment, techniques of data acquisition, data processing and interpretation, with the objective of locating commercial deposits of minerals, oil, and gas and determining their extent. In the fourteen years or so since the first edition of Applied Geophysics, many changes have taken place in this field, mainly as the result of new techniques, better instrumentation, and increased use of computers in the field and in the interpretation of data. The authors describe these changes in considerable detail, including improved methods of solving the inverse problem, specialized seismic methods, magnetotellurics as a practical exploration method, time-domain electromagnetic methods, increased use of gamma-ray spectrometers, and improved well-logging methods and interpretation.

The Third Wave - Alvin Toffler 2022-01-04

From the author of Future Shock, a striking way out of today's despair . . . a bracing, optimistic look at our new potentials. The Third Wave makes startling sense of the violent changes now battering our world. Its sweeping synthesis casts fresh light on our new forms of marriage and family, on today's dramatic changes in business

and economics. It explains the role of cults, the new definitions of work, play, love, and success. It points toward new forms of twenty-first-century democracy. Praise for *The Third Wave* "Magnificent . . . an astonishing array of information."—The Washington Post "Imperishably fresh."—Business Week "Will mesmerize readers, and rightly so."—Vogue "Alvin Toffler . . . has written another blockbuster . . . a powerful book."—The Guardian "Fresh ideas, clearly explained. . . . Toffler has proven again that he is a master."—United Press International "Toffler has imagination and an ability to think of various future possibilities by transcending prevailing values, assumptions and myths."—Associated Press "Once you have walked into his version of the future, you may decide never again to whitewash some of the built-in frailties of the real present."—Financial Post "Rich, stimulating and basically optimistic . . . will unquestionably aid many to a greater understanding of [today's] puzzling social changes."—The Globe & Mail "A detailed breathtakingly bold projection of the social changes required if we are to survive. . . . Toffler's vision of a democratic, self-sustaining utopia is a brave alternative to recent grim warnings."—Cosmopolitan

World Development Report 2020 - World Bank 2019-11-19

Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. *World Development Report 2020: Trading for Development in the Age of Global Value Chains* examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and

reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation.

The 360 Degree Leader Workbook - John C. Maxwell 2006-09-03

In *The 360 Degree Leader Workbook*, Maxwell addresses that very question and takes the discussion even further. You don't have to be the main leader, asserts Maxwell, to make significant impact in your organization. Good leaders are not only capable of leading their followers but are also adept at leading their superiors and their peers. Debunking myths and shedding light on the challenges, John Maxwell offers specific principles for Leading Down, Leading Up, and Leading Across. 360-Degree Leaders can lead effectively, regardless of their position in an organization. By applying Maxwell's principles, you will expand your influence and ultimately be a more valuable team member.

Measurement, Regression, and Calibration - Philip J. Brown 1993

The book starts with a range of examples and develops techniques progressively, starting with standard least squares prediction of a single variable from another and moving onto shrinkage techniques for multiple variables. Chapters 6 and 7 refer mostly to methods that have been specifically developed for spectroscopy. The other chapters are quite general in their applicability. Likelihood and Bayesian inference features strongly, the latter allowing flexible analysis of a wide range of multivariate regression problems. The last chapter presents some Bayesian approaches to pattern recognition. For teaching purposes instructors may find particular chapters sufficiently self contained to recommend in isolation as reference or reading material. For example chapter 4 gives an in depth development of a range of shrinkage techniques, including partial least squares regression, ridge regression and principal components regression; together with discussion of the recently proposed continuum regression. Chapter 8 on pattern recognition may also be of use by itself in courses on multivariate analysis and Bayesian Statistics.

Water Quality - World Health Organization 2001-07

The quality of water, whether it is used for drinking, irrigation or recreational purposes, is significant for health in both developing and developed countries worldwide. This book is based on a programme of work undertaken by an international group of experts during 1999-2001. The aim was to develop a

harmonised framework of effective and affordable guidelines and standards to improve the risk assessment and management of water-related microbial hazards. This book will be useful to all those concerned with issues relating to microbial water quality and health, including environmental and public health scientists, water scientists, policy makers and those responsible for developing standards and regulations.

Already Enough - Lisa Olivera 2022-01-25

Growing up, Olivera knew she was adopted and later learned she was abandoned. She believed that something must have been wrong with her to cause her mother to abandon her. With the help of a therapist she began to tell herself a better story. Here she shows we can reframe our stories so we can remember that we are already enough, just as we are. By integrating all the parts of who we were, who we are, and who we want to be, we can live a more whole and meaningful life. -- adapted from jacket.
