[The Origin of Brands](#) - Al Ries 2004-05-11

What Charles Darwin did for biology, Al and Laura Ries do for branding. In their exciting new book, *The Origin of Brands*, the Rieses take Darwin's revolutionary idea of evolution and apply it to the branding process. What results is a new and strikingly effective strategy for creating innovative products, building a successful brand, and, in turn, achieving business success. Here, the Rieses explain how changing conditions in the marketplace create endless opportunities to build new brands and accumulate riches. But these opportunities cannot be found where most people and most companies look. That is, in the convergence of existing categories like television and the computer, the cellphone and the Internet. Instead, opportunity lies in the opposite direction—in divergence. By following Darwin's brilliant deduction that new species arise from divergence of an existing species, the Rieses outline an effective strategy for creating and taking to market an effective brand. In *The Origin of Brands*, you will learn how to: Divide and conquer Exploit divergence Use the theories of survival of the fittest and survival of the fittest Harness the power of pruning Using insightful studies of failed convergence products and engaging success stories of products that have achieved worldwide success through divergence, the Rieses have written the definitive book on branding. *The Origin of Brands* will show you in depth how to build a great brand and will lead you to success in

the high-stakes world of branding.

The Brand Flip - Marty Neumeier 2015-07-24

Best-selling brand expert Marty Neumeier shows you how to make the leap from a company-driven past to the consumer-driven future. You'll learn how to flip your brand from offering products to offering meaning, from value protection to value creation, from cost-based pricing to relationship pricing, from market segments to brand tribes, and from customer satisfaction to customer empowerment. In the 13 years since Neumeier wrote *The Brand Gap*, the influence of social media has proven his core theory: "A brand isn't what you say it is - it's what they say it is." People are no longer consumers or market segments or tiny blips in big data. They don't buy brands. They join brands. They want a vote in what gets produced and how it gets delivered. They're willing to roll up their sleeves and help out—not only by promoting the brand to their friends, but by contributing content, volunteering ideas, and even selling products or services. At the center of the book is the Brand Commitment Matrix, a simple tool for organizing the six primary components of a brand. Your brand community is your tribe. How will you lead it?

Cultural Strategy - Douglas Holt 2010-10-28

How do we explain the breakthrough market success of businesses like Nike, Starbucks, Ben & Jerry's, and Jack Daniel's? Conventional models of strategy and innovation simply don't work. The most influential ideas

on innovation are shaped by the worldview of engineers and economists - build a better mousetrap and the world will take notice. Holt and Cameron challenge this conventional wisdom and take an entirely different approach: champion a better ideology and the world will take notice as well. Holt and Cameron build a powerful new theory of cultural innovation. Brands in mature categories get locked into a form of cultural mimicry, what the authors call a cultural orthodoxy. Historical changes in society create demand for new culture - ideological opportunities that upend this orthodoxy. Cultural innovations repurpose cultural content lurking in subcultures to respond to this emerging demand, leapfrogging entrenched incumbents. Cultural Strategy guides managers and entrepreneurs on how to leverage ideological opportunities: - How managers can use culture to out-innovate their competitors - How entrepreneurs can identify new market opportunities that big companies miss - How underfunded challengers can win against category Goliaths - How technology businesses can avoid commoditization - How social entrepreneurs can develop businesses that appeal to more than just fellow activists - How subcultural brands can break out of the 'cultural chasm' to mass market success - How global brands can pursue cross-cultural strategies to succeed in local markets - How organizations can maximize their innovation capabilities by avoiding the brand bureaucracy trap

Written by leading authorities on branding in the world today, along with one of the advertising industry's leading visionaries, Cultural Strategy transforms what has always been treated as the "intuitive" side of market innovation into a systematic strategic discipline.

The 22 Immutable Laws of Branding - Al Ries 2003

Focus - Al Ries 2005-09-27

What's the secret to a company's continued growth and prosperity? Internationally known marketing expert Al Ries has the answer: focus. His commonsense approach to business management is founded on the premise that long-lasting success depends on focusing on core products and eschewing the temptation to diversify into unrelated enterprises.

Using real-world examples, Ries shows that in industry after industry, it is the companies that resist diversification, and focus instead on owning a category in consumers' minds, that dominate their markets. He offers solid guidance on how to get focused and how to stay focused, laying out a workable blueprint for any company's evolution that will increase market share and shareholder value while ensuring future success.

Battlecry - Laura Ries 2015-09-04

Why are most slogans and taglines ineffective? Because they're just words and a mind cannot understand words. A mind can only understand sounds. Why do most Americans remember the battlecry of the French Revolution (Libert , galit , fraternit) when they cannot remember the battlecry of the American Revolution? Because the sounds of the words "Libert , galit , fraternit " rhyme and that's one of the powerful techniques for creating a memorable slogan. In addition to "rhyme," there are four other techniques outlined in my new book, *Battlecry*. (1) Rhyme: "Roto-Rooter, that's the name. And away go troubles down the drain." (2) Alliteration: "M&Ms melt in your mouth, not in your hands." (3) Repetition: "The few. The proud. The Marines." (4) Reversals: "Two great tastes that taste great together. Reese's peanut butter cups." (5) Double-entendre: "A diamond is forever." You might think companies and their ad agencies would be wise to these techniques. But few slogans actually use any of these memory-building tactics. In a recent survey of 266 advertising slogans, only 19 used any one of them. *Battlecry* is a companion book to my previous book, *Visual Hammer*, and should be read together. Creating a slogan is only half the battle. The other half of the battle is a visual that will help drive your slogan into prospects' minds. The contour bottle helps drive "The real thing" into the minds of cola drinkers. The duck helps drive the Aflac name into prospects' minds. The straw-in-the-orange helps drive "Not from concentrate" into the minds of Tropicana buyers. Even "The ultimate driving machine" would not have been effective, in my opinion, without a visual hammer. And what was BMW's visual hammer? It was the television commercials showing BMWs being driven over winding road by happy owners. Over the years, there have been many advertising campaigns showing

beautiful automobiles being driven over lush, winding roads. The hammers are terrific, but the nails are missing. The trick is to find the right combination of a visual hammer and a verbal nail. And my two books, *Battlecry* and *Visual Hammer*, can help you do exactly that.

The Fall of Advertising and the Rise of PR - Al Ries 2009-03-17

Bestselling authors and world-renowned marketing strategists Al and Laura Ries usher in the new era of public relations. Today's major brands are born with publicity, not advertising. A closer look at the history of the most successful modern brands shows this to be true. In fact, an astonishing number of brands, including Palm, Starbucks, the Body Shop, Wal-Mart, Red Bull and Zara have been built with virtually no advertising. Using in-depth case histories of successful PR campaigns coupled with those of unsuccessful advertising campaigns, *The Fall of Advertising* provides valuable ideas for marketers -- all the while demonstrating why advertising lacks credibility, the crucial ingredient in brand building, and how only PR can supply that credibility; the big bang approach advocated by advertising people should be abandoned in favor of a slow build-up by PR; advertising should only be used to maintain brands once they have been established through publicity. Bold and accessible, *The Fall of Advertising* is bound to turn the world of marketing upside down.

What Great Brands Do - Denise Lee Yohn 2013-11-20

Discover proven strategies for building powerful, world-class brands. In other words, great brands can be built—and Denise Lee Yohn knows exactly how to do it. Delivering a fresh perspective, Yohn's *What Great Brands Do* teaches an innovative brand-as-business strategy that enhances brand identity while boosting profit margins, improving company culture, and creating stronger stakeholder relationships. Building Strong Brands - David A. Aaker 2010

As industries turn increasingly hostile, it is clear that strong brand-building skills are needed to survive and prosper. In David Aaker's pathbreaking book, *MANAGING BRAND EQUITY*, managers discovered the value of a brand as a strategic asset and a company's primary source of competitive advantage. Now, in this compelling new work, Aaker uses real brand-building cases from Saturn, General Electric, Kodak, Healthy Choice, McDonald's, and others to demonstrate how strong brands have been created and managed. A common pitfall of brand strategists is to focus on brand attributes. Aaker shows how to break out of the box by considering emotional and self-expressive benefits and by introducing

the brand-as-person, brand-as-organisation, and brand-as-symbol perspectives. A second pitfall is to ignore the fact that individual brands are part of a larger system consisting of many intertwined and overlapping brands and subbrands. Aaker shows how to manage the "brand system" to achieve clarity and synergy, to adapt to a changing environment, and to leverage brand assets into new markets and products. As executives in a wide range of industries seek to prevent their products and services from becoming commodities, they are recommitting themselves to brands as a foundation of business strategy. This new work will be essential reading for the battle-ready.

Frenemies - Ken Auletta 2019-06-04

An intimate and profound reckoning with the changes buffeting the \$2 trillion global advertising and marketing business from the perspective of its most powerful players, by the bestselling author of *Googled*. Advertising and marketing touches on every corner of our lives, and the industry is the invisible fuel powering almost all media. Complain about it though we might, without it the world would be a darker place. But of all the industries wracked by change in the digital age, few have been turned on their heads as dramatically as this one. *Mad Men* are turning into *Math Men* (and women—though too few), an instinctual art is transforming into a science, and we are a long way from the days of Don Draper. *Frenemies* is Ken Auletta's reckoning with an industry under existential assault. He enters the rooms of the ad world's most important players, meeting the old guard as well as new powers and power brokers,

investigating their perspectives. It's essential reading, not simply because of what it reveals about this world, but because of the potential consequences: the survival of media as we know it depends on the money generated by advertising and marketing--revenue that is in peril in the face of technological changes and the fraying trust between the industry's key players.

history. Revised to reflect significant developments in the five years since its original publication, *Positioning* is required reading for anyone in business today.

SUMMARY of the 22 IMMUTABLE LAWS of BRANDING by Al Ries and Laura Ries - Summary Notes 2021-11-18

The writers explore the 'rules' of branding that they have discovered to be true across a wide range of product and service offerings in this book. Continuing a subject championed by Ries in prior works (for example, The 22 Immutable Laws of Marketing and Focus), they assert that a fundamental difficulty for organizations is the tendency to expand a successful brand into other, often only peripherally related, sectors. (Harley-Davidson wine coolers and Heinz all-purpose cleaning vinegar are two real-world examples discussed in the book.) Such brand extensions serve to confuse the consumer and undermine the primary brand's single message power. In this book, you have a worthy tutor. The combo of father and daughter has done justice to define what the ideal branding looks like. What we have done is to break down the book into smaller, easy-to-read points. I hope you enjoy reading this summary and gain valuable lessons. **DISCLAIMER:** This is not the official book as published by the original authors. It is intended to provide key points for the reader with limited time. You should absolutely get the original copy of the book.

Brand Innovation Manifesto - John Grant 2006

The days of the image brands are over, and 'new marketing' has gone mainstream. The world's biggest companies are pursuing a post-advertising strategy, moving away from advertising and investing in leading edge alternatives. In the vanguard of the revolution has been John Grant, co-founder of the legendary agency St. Luke's and author of "The New Marketing Manifesto," whose radical thinking has informed a generation. Now Grant is set to stun the industry again. In "The Brand Innovation Manifesto," he redefines the nature of brands, showing why old models and scales no longer work and revealing that the key to success today is impacting people's lifestyles (think Starbucks, iPod and eBay). At the heart of the book is the concept of the 'brand molecule' to which new cultural ideas can be constantly added to keep pace with change. Cataloguing 32 classes of idea, Grant presents a practical approach to mixing and matching them within your own market to develop new brand ideas - and new ideas for existing brands.

11 Immutable Laws of Internet Branding - Al Ries 2003-02

Bestselling marketing guru Al Ries and his daughter and partner Laura divulge the revolutionary strategies needed to successfully build your company, product or service into a profitable brand using the internet. The Internet is the first major new communication medium to be introduced since television and businesses ignore it at their peril. If the Internet is going to take its place alongside the other major media it will be because it exploits a powerful new attribute - interactivity. The Internet will make traditional forms of branding, such as conventional advertising, redundant. In order to succeed in branding on the net, the message to customers must be interactive. Al and Laura Ries examine this dilemma and explain how their other revolutionary principles can help your company to build a brand on the net. Like the 22 Immutable Laws of Marketing and the 22 Immutable Laws of Branding, this will be a
