Deutsch Aktuell 2 - Wolfgang S. Kraft 1998

Neue Horizonte - David B. Dollenmayer 1984

German and Dutch in Contrast - Gunther Vogelaer

2020-03-09

Designed as a contribution to contrastive linguistics, the present volume brings up-to-date the comparison of German with its closest neighbour, Dutch, and other Germanic relatives like English, Afrikaans, and the Scandinavian languages. It takes its inspiration from the idea of a "Germanic Sandwich", i.e. the hypothesis that sets of genetically related languages diverge in systematic ways in diverse domains of the linguistic system. Its contributions set out to test this approach against new phenomena or data from synchronic, diachronic and, for the first time in a Sandwich-related volume, psycholinguistic perspectives. With topics ranging from nickname formation to the IPP (aka 'Ersatzinfinitiv'), from the grammaticalisation of the definite article to /s/-retraction, and from the role of verb-second order in the acquisition of L2 English to the psycholinguistics of gender, the volume appeals to students

and specialists in modern and historical linguistics, psycholinguistics, translation studies, language pedagogy and cognitive science, providing a wealth of fresh insights into the relationships of German with its closest relatives while highlighting the potential inherent in the integration of different methodological traditions.

Sapiens - Yuval Noah Harari
2015-02-10

New York Times Bestseller
A Summer Reading Pick for
President Barack Obama, Bill
Gates, and Mark Zuckerberg

From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and

examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

Homo Deus - Yuval Noah

Harari 2017-02-21

Official U.S. edition with full color illustrations throughout.

NEW YORK TIMES

BESTSELLER Yuval Noah

Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed

from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? *Homo Deus* explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is *Homo*

Deus. With the same insight and clarity that made Sapiens an international hit and a New York Times bestseller, Harari maps out our future.
