Kari Lydersen's invaluable account of the Republic sit-down strike is an instruction manual for worker dignity." —Mike Davis, author of *Buda's Wagon* and *City of Quartz* December 5, 2008: It wasn't supposed to work like this. Days after getting a \$45 billion bailout from the U.S. government, Bank of America shut down a line of credit that kept Chicago's Republic Windows & Doors factory operating. The bosses, who knew what was coming, had been sneaking machinery out in the middle of the night. They closed the factory and sent the workers home. Then something surprising happened: Republic's workers occupied the factory and refused to leave. Kari Lydersen, an award-winning reporter, tells the story of the factory takeover, elegantly transforming the workers' story into a parable of labor activism for the twenty-first century, one that concludes with a surprising and little-reported victory.

Information Systems - Bernd Carsten Stahl 2008-03-26

Whilst Information Systems has the potential to widen our view of the world, it often has the opposite effect by limiting our ability to interact, facilitating managerial and state surveillance or instituting strict hierarchies and personal control. In this book, Bernd Stahl offers an alternative and critical perspective on the subject, arguing that the ongoing problems in this area could be caused by the misconceptualization of the nature and role of IS. Stahl discusses the question of how IS can be used to actually overcome oppression and promote emancipation, breaking the book into four sections. The first section covers the theory of critical research in IS, giving a central place for the subject of ethics. The second section discusses the philosophical underpinnings of this critical research. The third and largest section gives examples of the application of critical work in IS. The final section then reflects on the approach and suggests ways for further development.
