Advanced Hybrid and Electric Vehicles - Michael Nikowitz 2016-04-05

This contributed volume contains the results of the research program "Agreement for Hybrid and Electric Vehicles", developed in the framework of the Energy Technology Network of the International Energy Agency. The topical focus lies on technology options for the system optimization of hybrid and electric vehicle components and drive train configurations which enhance the energy efficiency of the vehicle. The approach to the topic is genuinely interdisciplinary, covering insights from fields. The target audience primarily comprises researchers and industry experts in the field of automotive engineering, but the book may also be beneficial for graduate students.

The Yugo - Jason Vuic 2011-03-01

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got The Yugo: The Rise and Fall of the Worst Car in History. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.

MERCEDES-BENZ, the Modern SL Cars, the R107 and C107 - Bernd S. Koehling 2015-08-11

You haven't gotten yourself a R107 yet? Too bad, the good ones can cost a small fortune today and they have only one way to go: UP! But don't worry, plenty of them have been built and plenty of them are still around. Problem is, which one is the right one for you? Can you imagine that even a low mileage, good looking R107 can still far exceed your wildest imaginations, when it comes to restoration costs? Everybody seems to want a late model 560SL. Why not an early 450SL for half the money? The joy and pride of ownership is the same, trust me. Or how about one of the former longtime underdogs, an SLC? Also they start to appreciate, a few of them even very fast, faster than a mint 560SL. If any of this is of interest, then this new book (published already earlier as e-book) is for you. It does not only deal with development and history, it also comes with a comprehensive buyer's guide for both the SL and SLC. This includes a look at their price development over the past years. Another focus has been the VIN and data card, so that you have a better understanding, how they were equipped and to which market they have been shipped first. Superb recent photography from the author's collection can help you to find the right car or it might even serve as reference in a restoration project. Naturally the paint and interior upholstery options, full technical details plus the annual production history of each model are covered. As a bonus, rare insights into the R107's almost unknown rally history are given. **FREE BONUS:** When you have bought this book, you are eligible for a free pdf file of any Mercedes model (such as W111 or W198 or R107 for example) the author has covered in one of his books. Please contact the author through his website (inside the book) and stipulate, which free pdf file you want him to send to you.
