**Strengthening Forensic Science in the United States** - National Research Council  
2009-07-29

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new

government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

**Career Quest for College Graduates** - Robert T. Uda 2005-08

Career Quest for College Graduates is a sequel to the highly successful 'Career Quest for College Students'. This sequel builds upon the foundation of the earlier treatise. Career Quest for College Graduates introduces the 'Uda

Bomb", i.e., key message box, which includes principles, strategies, and tactics for building a successful career. For example, feast on some of these secret ordnances from the Uda Bomb arsenal: UB1-Go with your passion. UB2-You never go wrong by always telling the truth. UB3-Dress to express, not to impress. UB4-Be a good networking node and you will go far in life. UB5-Hiring managers will hire people just like themselves. UB6-You are only worth what you accept. UB7-Remember, if you are not growing, you are dying. UB8-Nothing worthwhile is easy to achieve. UB9-We become proficient at whatever we spend most of our time doing. UB10-Plan to leave this world a better place because you lived in it. If you read, internalize, and live all of the principles, strategies, and tactics enclosed in over 230 Uda Bombs, you will be well on your way to a successful career. Add this power-packed ordnance package to your arsenal.

**Engineering** - Unesco 2010-01-01

This report reviews engineering's importance to human, economic, social and cultural development and in addressing the UN Millennium Development Goals. Engineering tends to be viewed as a national issue, but engineering knowledge, companies, conferences and journals, all demonstrate that it is as international as science. The report reviews the role of engineering in development, and covers issues including poverty reduction, sustainable development, climate change mitigation and adaptation. It presents the various fields of engineering around the world and is intended to identify issues and challenges facing engineering, promote better understanding of engineering and its role, and highlight ways of making engineering more attractive to young

people, especially women.--Publisher's description.
