Community Research in Environmental Health - H. Patricia Hynes 2017-05-15

Interest in environmental health research conducted with community participation has increased dramatically in recent years. In this book, Doug Brugge and H. Patricia Hynes relate experience of multiple community collaborations across the United States and highlight the lessons to be learned for those involved in or embarking on community-collaborative research. The volume brings together a variety of cases, examining the nature and form that the collaboration took, the scientific findings from the work and the ethical issues that needed to be addressed. Actual cases covered include lead contaminated soil, asthma and housing conditions, the impact of development on environmental health, the impact of radiation hazards, urban gardening, hog farming and diesel exhaust. The concluding section analyses the experiences of those involved and puts their findings into broader context. Community Research in Environmental Health: Lessons in Science, Advocacy and Ethics provides a valuable guide for all those interested and involved in community research.

Nutrition and Vulnerable Groups - Amanda Devine 2019-06-17

Food insecurity is a complex 'wicked' problem that results from a range of unstable and uncertain physical, social, cultural and economic factors that limits access to nutritious food. Globally, 800 million people are under-nourished, and around 2 billion are overweight/obese or have micronutrient deficiency. These populations are largely positioned in developing countries where disease burden is high and impacts health budgets and productivity. Similarly developed countries, cities and neighbourhoods are experiencing a greater emergence of vulnerable populations. This is in part explained by the change in the food production and manufacturing, the retraction in economic climates, the increase in food price, and in some regions reduced food availability and access. Vulnerable groups include but are not limited to migrant populations,

Indigenous people, elderly, pregnant women, those with disability, homeless, young children and youth. Poor nutrition at significant periods of growth and development and during life impact long term health outcomes increasing non-communicable disease prevalence, health cost and reducing economic productivity.

Banking and Effective Capital Regulation in Practice - Sophia Velez 2020-11-20

Due to a historical lack of attention to the importance of modelling, measuring and managing risk, senior bank leaders are struggling to implement unified practices within their financial institutions that could address the gaps posed by risky management behaviour, rogue trading, liquidity crises, prohibited investments in mortgage-backed securities, and default risks aligned with loans. This book discusses the theories at play between bank agents (bank managers) and their principals (shareholders), a topic which has gained importance as a result of the banking crisis, and similarly, governed the need for more efficient risk management and ethical managerial practices. The author worked with a senior bank leadership team to identify and describe effective capital regulation practices that can lead to a reduction in loss and risky management behavioural practices. The book offers consensus on a number of activities that bank managers can implement to address bank risk. It analyses the relevant factors that determine the necessity for banking regulation and the important role of regulation in managing banking crises. The author's analysis of the important regulatory aspects in developed countries such as the US, offers a useful conceptual framework for creating an adequate banking regulatory environment in developing countries. This book offers an original contribution to the field of banking that undergraduate, masters, PhD students, academics and researchers can use to gain a deeper understanding of the constructs at play in the banking industry.

Understanding Survey Methodology - Philip S. Brenner 2020-10-23

This volume ambitiously applies sociological theory to create an understanding of aspects of survey methodology. It focuses on the interplay between sociology and survey methodology: what sociological theory and approaches can offer to survey research and vice versa. The volume starts with a focus on direct connections between sociological theories and their applications in survey research. It further presents cutting-edge, original research that applies the "sociological imagination" to substantive concerns important to sociologists, survey methodologists, and social scientists and includes issues such as health, immigration, race/ethnicity, gender and sexuality, and criminal justice.

The German Language in British Higher Education - Sylvia Jaworska 2009

The discipline of German Studies in English-speaking countries is in crisis and the situation in British Higher Education can be seen as a paradigmatic example. Symptoms of the crisis are a dramatic decrease in the number of students, financial difficulties and the resulting closures of German Departments. Furthermore, the language skills which finally emerge from universities are not always satisfactory. The present book sheds light on key aspects of the institutionalised teaching and learning of German language in the UK. The first part - the macro-context - surveys the socio-political developments that have recently affected the sector of modern languages and specifically the discipline of German Studies. The second part - the micro-context -, zooms in to the teaching and learning as experienced from both students' and teachers' perspective. Ultimately, by linking the macro-analysis with the micro findings, the present book proposes a number of strategies which could contribute to the optimisation and enhancement of teaching and learning German in British Higher Education.

Wage and Hour Law - Chester Hanvey 2018-04-18

This practical guide offers management, psychology, and related professionals comprehensive background in—and robust methods for evaluating—frequently litigated wage and hour issues. Wage and hour compliance is impacted by numerous sources including federal laws such as the Fair Labor Standards Act, state and local laws, guidance from government enforcement agencies and court decisions. This book provides a clear and understandable overview of the legal context along with methods for data collection and analysis to measure and evaluate compliance pertaining to commonly litigated disputes, such as independent contract classification, FLSA exemptions, pay equity, and off-the-clock work. This framework for understanding and responding to such cases is suitable to both those new to the field and expert consultants while also acting as a springboard for further research in this increasingly relevant legal area. Included in the coverage:

- Trends in wage and hour litigation.
- Applicable data collection methods for evaluating wage and hour compliance.
- Assessing employment status.
- Strategies to measure and prevent off the clock work.
- Factors that impact meal and rest break compliance.
- Stages of a class-action lawsuit.
- Statistical sampling and analyses.
- Understanding and analyzing pay equity.

Wage and Hour Law: Guide to Methods and Analysis fills knowledge needs for an audience that includes management and industrial/organizational psychology graduate students interested in legal issues as well as testifying experts, external consultants, HR practitioners, management professionals, and labor economists.

Introducing Writing Across the Curriculum into China - Dan Wu 2012-09-19

Dr. Wu Dan's Introducing Writing Across the Curriculum into China is an important and provocative research study that is broadly international in scope. Of particular significance for education in China, this book provides a historical analysis of writing instruction in China and an original application of activity theory used to analyze problems and possibilities for Writing Across the Curriculum (WAC) in higher education. Through an examination of important aspects of WAC as it has developed in the United States, Dr. Wu Dan brings together various perspectives in support of developing and sustaining WAC programs in China and by analogy throughout the world. Her work opens new avenues for research in writing and for the teaching of courses throughout the curriculum using a writing-in-the-disciplines approach. A major contribution to international WAC scholarship, Introducing Writing Across the Curriculum into China will be invaluable to English faculty and to all readers interested in educational innovations in China.
