The Future of Nursing - Institute of Medicine 2011-02-08

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

MCQs in Pharmaceutical Calculations - Ryan F. Donnelly 2009

MCQs in Pharmaceutical Calculations aims to help pre-registration trainees and pharmacy students with their study enabling them to perform calculations accurately and with confidence. Pharmacists frequently perform simple calculations as part of their professional practice. It is therefore vital that they are able to employ basic numeracy skills accurately so as not to compromise patient safety. The pharmaceutical societies of Great Britain and Northern Ireland (RPSGB and PSNI) have introduced compulsory calculations elements into the registration examinations. These sections must be passed independently of the rest of the examination. Many Schools of Pharmacy worldwide have also recently increased their emphasis on numeracy skills. It includes: * 360 calculations questions in three commonly used multiple choice formats * questions based on important areas in pharmaceutical science and practice: * manipulation of formulae and dilutions * dosing * pharmacokinetics * formulation and dispensing * pharmaceutical chemistry * descriptive answers giving the reasoning behind the answers
Note: This book is accompanied by an additional 100 calculation-based multiple choice questions, arranged into five 1-hour tests, which will be available from the Pharmaceutical Press FASTtrack website. Importantly, these questions are available in the format of both The Royal Pharmaceutical Society and the Pharmaceutical Society of Northern Ireland registration examinations. The fourth title in the Tomorrow's Pharmacist series, MCQs in Pharmaceutical Calculations, will be indispensable to pre-registration trainees and pharmacy students to help them prepare for their future career. Also available in this series: Hospital Pre-registration Pharmacist Training Pre-registration Interview, The Registration Exam Questions
