This volume provides an introduction to medicinal chemistry. It covers basic principles and background, and describes the general tactics and strategies involved in developing an effective drug.

Bridging Research and Practice in Science Education - Eilish McLoughlin
2019-08-27

This edited volume presents innovative current research in the field of Science Education. The chapters deal with a wide variety of topics and research approaches, conducted in a range of contexts and settings. Together they make a strong contribution to knowledge on science teaching and learning. The book consists of selected presentations from the 12th European Science Education Research Association (ESERA) Conference, held in Dublin, Ireland from 21st to 25th August, 2017. The ESERA community is made up of professionals with diverse disciplinary backgrounds from natural sciences to social sciences. This diversity enables a rich understanding of cognitive and affective aspects of science teaching and learning. The studies in this book will stimulate discussion and interest in finding new ways of implementing and researching science education for the future. The twenty-two chapters in this book are presented in four parts highlighting innovative approaches to school science, emerging identities in science education, approaches to developing learning and competence progressions, and ways of enhancing science teacher education. This collection of studies showcases current research orientations in science education and is of interest to science teachers, teacher educators and science education researchers around the world with a commitment to bridging research and practice in science teaching and learning.

Making a Grade - James Elwick 2021

Making a Grade takes historiographic and sociological perspectives developed to understand large-scale scientific and technical systems and uses them to highlight the standardization that went into standardized testing.

Excel Preliminary Business Studies - Louise Fleming 2001

Contains a comprehensive summary of the entire course, activities, glossary of terms and a list of websites.

The Athenaeum - 1833

Athenaeum and Literary Chronicle - 1849

Faculty Development for Student Achievement - Ronald J. Henry
2006-04-15

This book describes a seven-year project--Quality in Undergraduate Education (QUE)--that produced important changes in departments and in the teaching of individual faculty in 21 two- and four-year institutions across four states. Rather than a blow-by-blow report of the project, it focuses on the problems that led to the development of QUE: concern about low levels of student learning in postsecondary institutions and demands by state legislatures that funds for postsecondary institutions be tied to assessment of student learning. The story is told first from the organizational perspective in national and local campus meetings, and then from the point of view of faculty in five chapters, one for each discipline of biology, chemistry, English, history, and mathematics. This description of QUE is intended as a model for administrators and faculty seeking to meet the challenges of increasingly diverse students as well as the increasingly divergent ways to earn a degree.

Indian Engineering - Patrick Doyle 1910

Sessional Papers - Great Britain. Parliament. House of Commons 1902

IIT-JAM M.Sc. - Rph Editorial Board 2020-10

This comprehensive book is useful for IIT-JAM (Joint Admission Test for M.Sc.) Chemistry for the purpose of Study and practice of questions based on the latest pattern of the examination. This book included Study Material and Previous Papers (Solved). Detailed Answers have also been provided for the questions for Better Understanding of the Candidates.
