**The Art of Teaching Art** - Deborah A. Rockman

2000-11-09

Often the finest artists do not make the best teachers. Many frustrated college students of art know this all too well as they suffer through unstructured classes with inexperienced teachers or graduate student instructors. In these situations, it is easy to blame the teachers.

But the problem is largely institutional: most students graduating with MFAs from art schools receive little if any instruction in teaching art. If you find yourself in this predicament as teacher or student, this book is for you.

The first book to provide a comprehensive guide for teaching college-level art, *The Art of Teaching Art* is the culmination of respected artist and instructor Deborah Rockman's two decades of teaching experience.

Believing that drawing is the backbone of all of the visual arts, she begins with a complete explanation of drawing concepts that apply to any subject matter, e.g.,

composition, sighting processes, scaling techniques, and methods for linear and tonal development. She then illustrates these concepts with step-by-step methods that easily translate to classroom exercises.

Next, she applies the drawing principles to every artist's most important and challenging subject, the human figure. After an extended section on understanding and teaching perspective that explores illusionistic form and space, the focus of the book shifts to the studio classroom itself and the essential elements that go into making an effective learning environment and curriculum.

From preparing materials lists and syllabi, to setting up still-lives, handling difficult classroom situations, critiquing and grading student artworks, and shooting slides of student artworks, she leaves no stone unturned.

**Naming What We Know** - Linda Adler-Kassner

2015-06-15

*Naming What We Know* examines the core principles of knowledge in the discipline of writing studies using the lens of "threshold concepts"—concepts that are critical for epistemological participation in a discipline. The first part of the book defines and describes thirty-seven threshold concepts of the discipline in entries written by some of the field's most active researchers and teachers, all of whom

participated in a collaborative wiki discussion guided by the editors. These entries are clear and accessible, written for an audience of writing scholars, students, and colleagues in other disciplines and policy makers outside the academy. Contributors describe the conceptual background of the field and the principles that run throughout practice, whether in research, teaching, assessment, or public work around writing. Chapters in the second part of the book describe the benefits and challenges of using threshold concepts in specific sites—first-year writing programs, WAC/WID programs, writing centers, writing majors—and for professional development to present this framework in action. Naming What We Know opens a dialogue about the concepts that writing scholars and teachers agree are critical and about why those concepts should and do matter to people outside the field.

*Journey Through Genius* - William Dunham  
1991-08

Like masterpieces of art, music, and literature, great mathematical theorems are creative milestones, works of genius destined to last forever. Now William Dunham gives them the attention they deserve. Dunham places each theorem within its historical context and explores the very human and often turbulent life of the creator — from Archimedes, the absentminded theoretician whose absorption in his work often precluded eating or bathing, to Gerolamo Cardano, the sixteenth-century mathematician whose accomplishments flourished despite a bizarre array of misadventures, to the paranoid genius of modern times, Georg Cantor. He also provides step-by-step proofs for the theorems, each easily accessible to readers with no more than a knowledge of high school mathematics. A rare combination of the historical, biographical, and mathematical, *Journey Through Genius* is a fascinating introduction to a neglected field of human creativity. "It is mathematics presented as a series of works of art; a fascinating lingering over individual examples of ingenuity and insight. It is mathematics by lightning flash." —Isaac Asimov

*By the Book* - Pamela Paul 2014-10-28

Sixty-five of the world's leading writers open up about the books and authors that have meant the most to them. Every Sunday, readers of *The New York Times Book Review* turn with anticipation to see which novelist, historian, short story writer, or artist will be the subject of the popular *By the Book* feature. These wide-ranging interviews are conducted by Pamela Paul, the editor of the *Book Review*, and here she brings together sixty-five of the most intriguing and fascinating exchanges, featuring personalities as varied as David Sedaris, Hilary Mantel, Michael

Chabon, Khaled Hosseini, Anne Lamott, and James Patterson. The questions and answers admit us into the private worlds of these authors, as they reflect on their work habits, reading preferences, inspirations, pet peeves, and recommendations. *By the Book* contains the full uncut interviews, offering a range of experiences and observations that deepens readers' understanding of the literary sensibility and the writing process. It also features dozens of sidebars that reveal the commonalities and conflicts among the participants, underscoring those influences that are truly universal and those that remain matters of individual taste. For the devoted reader, *By the Book* is a way to invite sixty-five of the most interesting guests into your world. It's a book party not to be missed.

**Garfield Thinks Big** - Jim Davis 2016-07-19

Big Thoughts from an Even Bigger Cat Garfield is a true Aristotle of cats, pondering such tough questions as: How many plates of lasagna can a cat consume in a single sitting? That's a lot of food for thought, but you can bet this feline philosopher will gobble his way to an answer—and still find room for dessert! It's nothing less than sidesplitting fun, so don't miss out as Garfield thinks (and eats) BIGGER than ever before!

**Put Your Hands on Your Hips and Act Like a Woman** - Gale P. Jackson 2020-04-01

In a gathering of griot traditions fusing storytelling, cultural history, and social and literary criticism, *Put Your Hands on Your Hips and Act Like a Woman* "re-members" and represents how women of the African diaspora have drawn on ancient traditions to record memory, history, and experience in performance. These women's songs and dances provide us with a wealth of polyphonic text that records their reflections on identity, imagination, and agency, providing a collective performed autobiography that complements the small body of pre-twentieth-century African and African American women's writing. Gale P. Jackson engages with a range of vibrant traditions to provide windows into multiple discourses as well as "new" and old paradigms for locating the history, philosophy, pedagogy, and theory embedded in a lineage of African diaspora performance and to articulate and address the postcolonial fragmentation of humanist thinking. In lyrically interdisciplinary movement, across herstories, geographies, and genres, cultural continuities, improvisation, and transformative action, *Put Your Hands on Your Hips and Act Like a Woman* offers a fresh perspective on familiar material and an expansion of our sources, reading, and vision of African diaspora, African American, and American literatures.

Young Michelangelo - John T. Spike 2012-08-01

Truly in a class of its own, *Young Michelangelo* is the most definitive and eye-opening study of the artist's early life to come along in a generation. In this compelling account, renowned art historian John Spike paints a vivid portrait of one of the world's greatest artists and

the places and people—Lorenzo de' Medici, Leonardo, Machiavelli—that inspired and defined his early life and career. Spike's masterful text probes the thinking, evolution, and desires of a young man whose awareness of his exceptional talent never wavered.

Michelangelo's complex personality is revealed through lively examinations of the *Pietà*, the *David*, and all other major works. Drawing on a rich background of Italian Renaissance politics and culture, Spike deftly navigates the fiery Florentine master's struggle to surpass da Vinci's artistic mastery, and his troubled relationships with Julius II and other key figures of the era.
