**Storytelling in the global age: there is no planet B** - Boje David M 2019-06-17

Can the fall of globalization told through true storytelling save humanity from its own extinction? The Sixth Extinction has begun and there is no Planet B. To prevent further damage to the earth's ecosystem, this book proposes a new 'Globalization Praxis' that focuses on nine planetary boundaries. This praxis is called 'true storytelling'. True storytelling is an ethical praxis, a methodology, and an antenarrative process of strategy. *Storytelling in the Global Age* provides a new approach while uncovering ten myths of globalization. Reduced Emissions and Fuel Consumption in Automobile Engines - Fred Schäfer 2013-03-09

Over the last several years, there has been much discussion on the interrelation of CO2 emissions with the global warming phenomenon. This in turn has increased pressure to develop and produce more fuel efficient engines and vehicles. This is the central topic of this book. It covers the underlying processes which cause pollutant emissions and the possibilities of reducing them, as well as the fuel consumption of gasoline and diesel engines, including direct injection diesel engines. As well as the engine-related causes of pollution, which is found in the raw exhaust, there is also a description of systems and methods for exhaust post treatment. The significant influence of fuels and lubricants (both conventional and alternative fuels) on emission behavior is also covered. In addition to the conventional gasoline and diesel engines, lean-burn and direct injection gasoline engines and two-stroke gasoline and diesel engines are included. The potential for reducing fuel consumption and pollution is described as well as the related reduction of CO2 emissions. Finally, a detailed summary of the most important laws and regulations pertaining to pollutant emissions and consumption limits is presented. This book is intended for practising engineers involved in research and applied sciences as well as for interested engineering

students.

The Automotive Industry and European Integration - A. J. Jacobs 2019-08-07

This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.
