Leadership and Change Management -

Daphne Halkias 2017-03-16

A leader's role in the management of change is a critical issue for successful

outcomes of strategic initiatives. Globalization and economic instability have prompted an increase in organizational changes related to downsizing and restructuring in order to improve financial performance and organizational competitiveness. Researchers agree that a leader's inability to fully understand what is needed in order to guide their organization through successful change can be a reason for failure. Proper planning and management of change can reduce the likelihood of failure, promote change effectiveness, and increase employee engagement. Yet, change in organizations must be viewed as a continuous activity that affects both organizational and individual outcomes. If change management can be considered as an event induced by socio-cultural factors, the cultural variable gains greater significance when applied to the quality of the relationship between a leader and their team. Many organizations

today are on the verge of internationalization. It is here that the cultural context can affect behaviors and, in the same way, leadership style. The research presented in this book by an eminent group of scholars explores the influence of culture – ethnic, regional, religious – on how leaders manage change within organizations.

Becoming a Manager - Linda Annette Hill 2003

Second Edition, Expanded to Include Fresh Insights and Practical Tools For New and Experienced Managers No book has captured the trials and traumas of the transition from star performer to competent manager better than Linda Hill's classic *Becoming a Manager*. In tracing and analyzing the experiences of nineteen new managers, Hill reveals the profound complexity and difficulty of the process of developing into a manager. In their own distinct voices, these managers describe how they reframed their understanding of their roles and

responsibilities and how they coped with the stresses and emotions of the transformation- in essence, how they were able to take on new identities. Now, in a substantially expanded second edition, the author offers concrete advice on the crucial issues of dealing effectively with organizational politics and developing and leading diverse teams in times of change, as well as on how managers can prepare themselves to lead over the course of their careers. In a new epilogue, she explores what organizations can do to help managers in their journey to lead and learn.

The 27 Challenges Managers Face - Bruce Tulgan 2014-09-09

For more than twenty years, management expert Bruce Tulgan has been asking, "What are the most difficult challenges you face when it comes to managing people?" Regardless of industry or job title, managers cite the same core issues—27 recurring challenges: the superstar whom the manager is afraid of losing, the slacker whom the manager cannot figure out how to motivate, the one with an

attitude problem, and the two who cannot get along, to name just a few. It turns out that when things are going wrong in a management relationship, the common denominator is almost always unstructured, low substance, hit-or-miss communication. The real problem is that most managers are “managing on autopilot” without even realizing it—until something goes wrong. And if you are managing on autopilot, then something almost always does. The 27 Challenges Managers Face shows exactly how to break the vicious cycle and gain control of management relationships. No matter what the issue, Tulgan shows that the fundamentals are all you need. The very best managers hold ongoing one-on-one conversations that make expectations clear, track performance, offer feedback, and hold people accountable. For every workplace problem—even the most awkward and difficult—The 27 Challenges Managers Face shows how to tailor conversations to solve

situations familiar to every manager. Tulgan offers clear approaches for turning around bad attitudes, reducing friction and conflict, improving low performers, retaining top performers, and even addressing your own personal burnout. The 27 Challenges Managers Face is an indispensable resource for managers at all levels, one anyone managing anyone will want to keep on hand. One challenge at a time, you’ll see how the most effective managers use the fundamentals of management to proactively resolve (nearly) any problem a manager could face.

Leadership in Diverse Learning Contexts - Greer Johnson 2016-04-29

This book presents the outcomes of research and practical endeavour in some of the diverse contexts in which learning takes place: classrooms, schools, professional development settings, community projects and service sector agencies. It invites the reader to engage

with two related questions of contemporary concern in the leadership field: "What can we learn about the important influence of different contexts on leadership practice and how are people brought together as collective human agents in different patterns of distributive leadership?" In doing so, this collection emphasises three of the critical concepts at play when leadership is viewed, not as position, but as activity. The three concepts are purpose, context and human agency. When this view of leadership is understood, it is always about achieving shared goals with people power, no matter the circumstances in which they are gathered together.

Leadership Skill - Control -

Viktoria Schoja 2016-03-15

Nowadays many various leadership skills exist, such as organisation, goal setting, control, situation awareness or decision making, which have to be considered within an organisation. This assignment concentrates on the skill control. Control in modern societies and organisations is very important because 'it requires the ability to dictate all activities, and it seeks to preserve stability and predictability' (John Hagel and Brown, 2002, p.1). As Lenin quoted 'Trust is a good thing, but control is a better one' (Lenin, Werke, 1971, p. 358). This quote is controversial as it can be misunderstood. Control is not the only aspect but it is

rather the combination of both, trust and control, which lead to an effective result. This work will give a review on the theoretical part and distinguish the terms control & command and control & trust. Moreover rewards and sanctions will be described in detail. Additionally the games will be discussed and evaluated according to the previous theories. Own examples can be found in grey boxes, which give a deeper insights on the topic.

The argumentative point of departure of this scholarly book is the common conviction of specialists in the field of education in South Africa that the national education system is not at a satisfactory level – in both the academic and the public discourse. Such allegations are made and, frequently, stronger adjectives than ‘non-satisfactory’ are used. Results of international test series in which South Africa has participated, such as the 2015 TIMSS tests, confirm the negative verdicts found in the (public and scholarly) discourse. This book aims to argue that although the lack of performance could be attributed to a multiplicity of factors, one factor that can make a difference in the achievement levels obtained by learners in schools is leadership. The book demonstrates that a particular problem of both the scholarly and the public discourse on education in South Africa is an overtone of defeatism or resignation, blaming all ills in the education system and

educational institutions on historical legacies and/or contextual factors (such as socio-economic deprivation in the catchment areas of schools) or poor resources and infrastructure. This collected work was inspired by a recently published spate of articles on top-performing schools (including top-performing schools in rural communities), in which it was demonstrated that good leadership can overcome such contextual and other challenges. The book unpacks the issue of leadership in South African schools from a variety of perspectives, thus contributing to the development of the scholarly discourse on Educational Leadership in South Africa. The target audience of the book is scholars of Educational Leadership. The research reported in the chapters draw on a wide range of methodologies, including empirical (survey) research (questionnaires and interviews), critical literature surveys, and the comparative

method.

Making the Public Service

Millennial - Liza Ireni Saban
2022-11-01

Making the Public Service Millennial explores how a new generation of public service employees affects the dynamics of continuity and change in public management and ethics. The book begins with the premise that Generation Y poses new challenges for public management, which will lead to changes in work-related values, rules, structures, and behaviors in the public service system. Will the soon-future leaders of today's public organizations pose new challenges for public management? How will this cohort cope with ethically-questionable behaviors? Given these questions, the potential strategic value of an empirical, cohort-based approach to ethical decision-making in the public service suggests interesting managerial implications for the effective incorporation of ethics into the management of public organizations. With implications for many types of organizations, and particularly

for public sector organizations in democratic societies, managers across organizations should view generational differences not merely as a demographic variable, but as manifestations of broader social trends that may undermine established public management practices and organizational climates.

Education, Leadership and Islam - Saeeda Shah
2015-07-03

Educational institutions are undergoing complex and sensitive changes in the context of immigration, international mobility, globalisation, and shifting economic scenarios, making highly challenging demands on educational leaders.

Leadership is increasingly being perceived and theorised as pivotal to students' achievement and institutional performance. In this book, Saeeda Shah considers educational leadership from an Islamic perspective to debate theoretical positions underpinned by Islamic texts and teachings, and the

resulting conceptualisations and interpretations. While educational leadership literature and research have flourished in recent years, this is predominantly informed by Western ideologies, concepts, theories and practices. Education, Leadership and Islam focuses on contemporary educational settings and practices, drawing on research and empirical evidence from multicultural contexts in order to enrich theory and inform policy and practice in relevant frameworks, particularly in relation to the growing Muslim population in the West. Chapters also discuss gender in Islam, educational expectations and Islamic faith schools to comprehensively explore education in relation to Islamism. Situating Muslims within contemporary societies, this book extends debates regarding educational philosophy and leadership, endorsing diversity and plurality through an appreciation of difference. Education, Leadership and Islam will appeal to education

researchers as well as social and political scientists attempting to understand Muslim educational issues in contemporary life, both in the east and in the west. This book offers critical insight into educational theory and practice, and as such will be key reading for policy makers and educational leaders.

Contemporary Leadership Challenges - Aida Alvinus
2017-02-01

Social and behavioral science has for decades studied and recognized leadership as a social exchange between leaders and followers. But leadership is rather complex, and as such, it tends to lead to an increased interest within and across different disciplines. This book is an attempt to provide theoretical and empirical framework to better understand leadership challenges in various contexts. The authors cover an array of themes that span from an individual level to an organizational and societal level. In this volume, two sections are presented. The first section based on individual level focuses on different leadership styles and abilities, and the other section provides theories to understand leadership in public administration, in industrial

settings and in nonprofit organizations.

Research Anthology on

Challenges for Women in Leadership Roles -

Management Association, Information Resources 2021-03-19

The role of women in the workplace has rapidly advanced and changed within the previous decade, leading to a current position in which women are taking over leadership roles and being offered these positions more than ever before. However, a gap still exists with the representation of women in the workforce especially in power positions and roles of authority in organizations. While the representation of women in leadership roles is impressive and exciting for the future, women still face many challenges when taking over these positions of power and face many issues related to gender inclusivity. There is also still gender bias and discrimination against women who have been given the opportunity to become authority figures. It is essential to acknowledge and discuss these critical issues and

challenges that women in leadership roles must handle to better understand the current climate of gender roles across various industries and types of leadership. The Research Anthology on Challenges for Women in Leadership Roles discusses the role of women in positions of authority across diverse industries and businesses. By reviewing the biases, struggles, discrimination, and overall challenges of being a woman in a powerful role, women leaders can be better understood for their role in a male-dominated world. This includes topics of concern such as equal treatment, proper implementation of women's policies, social justice activism, discrimination, and sexual harassment in the workplace, and the importance of diversity and empowerment of women in leadership positions with chapters pertaining specifically to African-American, Hispanic, Asian, and Middle Eastern women. This book is ideal for professionals, researchers, managers, executives, leaders,

academicians, sociologists, policymakers, and students in fields that include humanities, social sciences, women's studies, gender studies, business management, management science, health sciences, educational studies, and political sciences.

Fortunately, you don't have to tackle this challenge on your own. Your First Leadership Job gives you practical advice straight from others who have

walked in your shoes. Not only does it include dozens of tools to ensure your success, but it's also based on the authors' and DDI's extensive experience and research, which ultimately has led to the development of millions of leaders around the world. In fact, a quarter-million leaders will be developed this year alone via DDI training. Your First Leadership Job is divided into two sections. Part 1 introduces the concept of catalyst leader—one who sparks energy, passion, and commitment in others. Your transition to catalyst leader is a major step in your leadership journey. This book provides essential tips to put you on the catalyst path. Ultimately, leadership is about the many conversations—frequent, clear, authentic, and occasionally

difficult—that you will have daily. Your First Leadership Job builds awareness of the fundamental skills you'll come to rely on to make every one of these interactions successful. Part 2 devotes 13 chapters to critical core leadership competencies, including coaching for success, hiring the best employees, turning dreaded appraisals into discussions that propel performance, and handling difficult employees.
