From Beasts to Souls - E. Jane Burns 2013
The Middle Ages provides a particularly rich trove of hybrid creatures, semi-human beings, and composite bodies: we need only consider manuscript pages and stone capitals in Romanesque churches to picture the myriad figures incorporating both human and animal elements that allow movement between, and even confusion of, components of each realm. *From Beasts to Souls: Gender and Embodiment in Medieval Europe* raises the issues of species and gender in tandem, asking readers to consider more fully what happens to gender in medieval representations of nonhuman embodiment. The contributors reflect on the gender of stones and the soul, of worms and dragons, showing that medieval cultural artifacts, whether literary, historical, or visual, do not limit questions of gender to predictable forms of human or semi-human embodiment. By expanding what counts as "the body" in medieval cultural studies, the essays shift our understanding of gendered embodiment and articulate new perspectives on its range, functions, and effects on a broader theoretical spectrum. Drawing on depictions of differently bodied creatures in the Middle Ages, they dislodge and reconfigure long-standing views of the body as always human and the human body as merely male and female. The essays address a number of cultural contexts and academic disciplines: from French and English literature to objects of Germanic and Netherlandish material culture, from theological debates to

literary concerns with the soul. They engage with issues of gender and embodiment located in stones, skeletons, and snake tails, swan-knights, and werewolves, along with a host of other unexpected places in a thought-provoking addition to somatic cultural history. "From Beasts to Souls: Gender and Embodiment in Medieval Europe is a cogent, well-conceived addition to the dynamic field of cultural studies of the body. The essays are extremely strong, with contributions that are both insightful and provocative." --Suzanne Conklin Akbari, University of Toronto

Agnes - Peter Stamm 2016-10-25

Peter Stamm's best-selling debut novel, *Agnes*, now available for the first time in the United States. "Write a story about me," Agnes said to her lover, "so I know what you think of me." So

he started to write the story of everything that had happened to them from the moment they met. At first, he works with Agnes to create a narrative that is most true to life, but as time passes and he grows more enamored with the narrative he has begun, he continues writing on his own, imagining a future for them after he reaches the present. Happy couples do not necessarily make for compelling reading, and as Agnes sees the unexpected plot he has planned for her, the line between fiction and reality begins to blur. In this unforgettable and haunting novel Stamm incisively examines the power of storytelling to influence thought and behavior, reaching a chilling conclusion.

Earth Is My Witness - Art Wolfe 2017-10-03
Art Wolfe's definitive opus, *Earth Is My Witness* represents forty years of expeditionary photography. For the first time, Wolfe presents the three subjects at the heart of his work—landscapes, wildlife, and cultures on the edge of extinction—in a single masterpiece that takes us through the world's ecosystems and geographical regions in a vivid display of the fragility and interconnectivity of life on Earth, while simultaneously exploring his evolution as an artist and the techniques he uses to capture the nuances and rhythms of nature. *Earth Is My Witness* is the most extensive collection of Art Wolfe photography ever compiled. This lavishly produced work spans the globe, bringing the beauty of the planet's fast-disappearing landscapes, wildlife, and cultures into stunning focus. Containing unpublished work from throughout Wolfe's widely celebrated career,

Earth Is My Witness offers a riveting and comprehensive look at the world's ecosystems and geographical regions. Here Wolfe presents an encyclopedic selection of his photography along with intimate stories that exemplify his boundless curiosity. From the rich sights and smells of the Pushkar Camel Fair to the exact moment when a polar bear and her cubs leave their Arctic den, these images represent what Wolfe has lived for: moments when circumstance, light, and subject miraculously collide to form an iconic image. These photographs and the stories behind them explore the delicate interconnectivity of life across our planet. Setting the stage for this fascinating journey is award-winning author Wade Davis. Together, photographer and author present a world that borders on the fantastic but is all the more precious for its fragility. At the heart of Wolfe's work is the appeal for environmental, cultural, and wildlife preservation, which he makes with beautiful, far-reaching precision in this definitive opus.

With a New Chapter and Updated Epilogue on Coronavirus A Financial Times Best Health Book of 2019 and a New York Times Book Review Editors' Choice "Honigsbaum does a superb job covering a century's worth of pandemics and the fears they invariably unleash." —Howard Markel, MD, PhD, director of the Center for the History of Medicine, University of Michigan How can we understand the COVID-19 pandemic? Ever since the 1918 Spanish influenza pandemic, scientists have dreamed of preventing such catastrophic outbreaks of infectious disease. Yet despite a century of medical progress, viral and bacterial disasters continue to take us by surprise, inciting panic and dominating news cycles. In *The Pandemic Century*, a lively account of scares both infamous and less known, medical historian Mark Honigsbaum combines reportage with the history of science and medical sociology to artfully reconstruct epidemiological mysteries and the ecology of infectious diseases. We meet dedicated disease detectives, obstructive or incompetent public health officials, and brilliant scientists often blinded by their own knowledge of bacteria and viruses—and see how fear of disease often exacerbates racial, religious, and ethnic

tensions. Now updated with a new chapter and epilogue.

Enzyme Nutrition - Edward Howell 1995-01-01
Why is eating food in its natural state, unprocessed and unrefined, so vital to the maintenance of good health? What is lacking in our modern diet that makes us so susceptible to degenerative disease? What natural elements in food may play a key role in unlocking the secrets of life extension? These fascinating questions, and many more, are answered in *Enzyme Nutrition*. Written by one of America's pioneering biochemists and nutrition researchers, Dr. Edward Howell, *Enzyme Nutrition* presents the most vital nutritional discovery since that of vitamins and minerals—food enzymes. Our digestive organs produce some enzymes internally, however food enzymes are necessary for optimal health and must come from uncooked foods such as fresh fruits and vegetables, raw sprouted grains, unpasteurized dairy products, and food enzyme supplements. *Enzyme Nutrition* represents more than fifty years of research and experimentation by Dr. Howell. He shows us how to conserve our enzymes and maintain internal balance. As the body regains its strength and vigor, its capacity to maintain its normal weight, fight disease, and heal itself is enhanced.

There are No Incurable Diseases - Richard Schulze 1999-01-01

Thomas Mann - Hermann Kurzke 2021-09-14
This vivid, sometimes tragic, and often humorous literary biography brings to life as never before the extraordinary talent and complex person who was Thomas Mann. Engrossing vignettes enable us to enter Mann's life and work from unique angles. We meet the difficult, even unsavory private man: hypochondriac and nervous, narcissistic and vainglorious, isolated and greedy for love, shy and often ungenerous. But we are also introduced to a man who lived an eventful life, was capable of great kindness, loved dogs, doted on his daughters, and listened to Jack Benny. We experience Mann's tragedy as the quintessential German forced by the rise of National Socialism first into inner exile and then into real exile in Switzerland, Princeton, and California. His letters from this time reveal the torment that

exile represented for a writer whose work, indeed whose very self, was inextricably bound up with the German language. The book provides fresh and sometimes startling insights into both famous and little-known episodes in Mann's life and into his writing--the only realm in which he ever felt free. It shows how love, death, religion, and politics were not merely themes in *Buddenbrooks*, *The Magic Mountain*, and other works, but were woven into the fabric of his existence and preoccupied him unrelentingly. It also teases out what is known about what Mann considered his celibate homoeroticism and what others have labeled closeted homosexuality. In particular, we learn about his affection for the young man who inspired the character of Tadzio in *Death in Venice*. And, against the unfocused accusations of anti-Semitism that have been leveled at Mann, the book examines in human detail his relationships with Jewish writers, friends, and family members. This is the richest available portrait of Thomas Mann as man and writer--the place to start for anyone wanting to know anything about his life, work, or times.

Heavily updated from the previous edition, it highlights new surgery and radiotherapy techniques, disease awareness, patient quality of life, and comprehensive management. Head-and-neck cancers are a complex clinical entity and their response to treatment is also known to vary markedly in function of host-related factors. Notwithstanding the impressive progresses observed in the field of imaging, head and neck cancers are often diagnosed at a late stage and the presence of locally advanced disease in a significant number of patients implies the use of aggressive treatments in order to both ensure local disease

control and reduce distant metastasis risks. In comparison with the first edition, *Head and Neck Cancer, Second Edition* provides a detailed update of innovative concepts in chemo- and bio-radiation, viral infection impact on tumor growth and response to treatment, and impact of tumor- and host-related factors on treatment outcome.
