Electronic Commerce 2018 - Efraim Turban
2017-10-12

This new Edition of Electronic Commerce is a complete update of the leading graduate level/advanced undergraduate level textbook on the subject. Electronic commerce (EC) describes the manner in which transactions take place over electronic networks, mostly the Internet. It is the process of electronically buying and selling goods, services, and information. Certain EC applications, such as buying and selling stocks and airline tickets online, are reaching maturity, some even exceeding non-Internet trades. However, EC is not just about buying and selling; it also is about electronically communicating, collaborating, and discovering information. It is about e-learning, e-

government, social networks, and much more. EC is having an impact on a significant portion of the world, affecting businesses, professions, trade, and of course, people. The most important developments in EC since 2014 are the continuous phenomenal growth of social networks, especially Facebook , LinkedIn and Instagram, and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally, especially in China where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI-based analytics and big data to enhance the field. Finally, some emerging EC business models are changing industries (e.g., the shared economy models of Uber and Airbnb). The 2018 (9th) edition, brings forth the latest trends in e-commerce, including smart commerce, social commerce, social collaboration, shared economy, innovations, and mobility.

The Seven Necessary Sins for Women and

Girls - Mona Eltahawy 2019-09-17

A bold and uncompromising feminist manifesto that shows women and girls how to defy, disrupt, and destroy the patriarchy by embracing the qualities they've been trained to avoid. Seizing upon the energy of the #MeToo movement, feminist activist Mona Eltahawy advocates a muscular, out-loud approach to teaching women and girls to harness their power through what she calls the "seven necessary sins" that women and girls are not supposed to commit: to be angry, ambitious, profane, violent, attention-seeking, lustful, and powerful. All the necessary "sins" that women and girls require to erupt. Eltahawy knows that the patriarchy is alive and well, and she is fed the hell up: Sexually assaulted during hajj at the age of fifteen. Groped on the dance floor of a night club in Montreal at fifty. Countless other injustices in the years between. Illuminating her call to action are stories of activists and ordinary women around the world—from South Africa to

China, Nigeria to India, Bosnia to Egypt—who are tapping into their inner fury and crossing the lines of race, class, faith, and gender that make it so hard for marginalized women to be heard. Rather than teaching women and girls to survive the poisonous system they have found themselves in, Eltahawy arms them to dismantle it. Brilliant, bold, and energetic, *The Seven Necessary Sins for Women and Girls* is a manifesto for all feminists in the fight against patriarchy.

Self-Determination & Constitution Making in Nepal - Surendra Bhandari 2014-04-28

This book systematically analyzes why constitutions do not survive in Nepal, despite sixty years of constitutional history. The author discusses the epistemology of ethnic federalism in Nepal and examines the challenges of nation building and post-nation constitutionalism. The work addresses the connection between ethnic identity, right to self-determination, constitution making and state restructuring, offering possible ways forward for Nepal. Chapters consider lessons to be drawn from the past and examine reasons for the abolition of monarchy in Nepal. The book highlights the major problems that the first elected Constituent Assembly (CA) faced in

promulgating a new constitution, before it was dissolved in 2012. The concept of right to self-determination and its complexities at the domestic level are all explored, along with ways forward to address the problem of constitutionalism, ethnic federalism and democracy. The author offers solutions as to how the second CA could address problems to promulgate a new constitution. The book elaborates on the role that constitutionalism plays in constitution making and the survival of a constitution. Scholars of politics and international studies, policy makers and those with an interest in law and constitution in Asia will all find this work of interest.

Field Notes from a Catastrophe - Elizabeth Kolbert 2006-03-07

An argument for the urgent danger of global warming in a book that is sure to be as influential as Rachel Carson's *Silent Spring*. Known for her insightful and thought-provoking journalism, *New Yorker* writer Elizabeth Kolbert now tackles the controversial subject of global warming. Americans have been warned since the late nineteen-seventies that the buildup of carbon dioxide in our atmosphere threatens to melt the polar ice sheets and irreversibly change our climate. With little done since then to alter

this dangerous course, now is the moment to salvage our future. By the end of the century, the world will likely be hotter than it's been in the last two million years, and the sweeping consequences of this change will determine the future of life on earth for generations to come. In writing that is both clear and unbiased, Kolbert approaches this monumental problem from every angle. She travels to the Arctic, interviews researchers and environmentalists, explains the science and the studies, draws frightening parallels to lost ancient civilizations, unpacks the politics, and presents the personal tales of those who are being affected most--the people who make their homes near the poles and, in an eerie foreshadowing, are watching their worlds disappear. Growing out of a groundbreaking three-part series for the New Yorker, Field Notes from a Catastrophe brings the environment into the consciousness of the American people and asks what, if anything, can be done, and how we can save our planet.

Conflict Resolution in Multicultural Societies - Jhumpa Mukherjee 2014-10-06

Is it not interesting that at a time when the idea of a global “clash of civilizations” is reverberating so mightily and so ominously, how India puts up with the challenge of forging national unity amidst its intricate diversity? What is the key to her comparative success as an integrated state? The question has assumed added significance after the disintegration of the former multiethnic Soviet Union in the early

1990s. The present study, informed by a modified neo-institutionalism, seeks to identify the key to India’s success as an integrated democracy amidst a whole lot of trajectories. As an answer to India’s relative success in state formation and political order, this study emphasizes the role of democratic multicultural decentralization, which is a distinctive institutional-political formulation grown out of India’s specific contexts, and which has served as a method of effective governance in India. The book is primarily aimed at first degree undergraduate and postgraduate students. It is aimed at students specializing in India politics, post-colonial studies, Third world politics and those studying decentralization in non-Western countries. The work would have direct appeal political scientists, sociologists, policy makers, research institutes, activists, and development agencies.

Satta Sampadan - Bidyut Chakrabarty

2017-11-27

This book captures how electioneering has changed over the years and how media and marketing have assumed more significance than party manifestos. On 16th May 2014, India witnessed the result of an intense political campaign. Those who were vanquished felt that this was due to the success of a marketing blitzkrieg, which actually pollutes a democracy. Again, for those who supported the eventual winner—the Narendra Modi-led BJP—it was a great victory. Viewed either way, India's national election for the 16th Lok Sabha in 2014 will remain a landmark in the annals of political campaigns. The work is thus a study of campaign strategies, how they are framed, the role of local actors and to what extent individuals rule over ideologies and vice versa. An important contribution to the study of India's 2014 General Elections.

The Man Who Remade India - Vinay Sitapati

2018-04-03

When P.V. Narasimha Rao became the unlikely prime minister of India in 1991, he inherited economic catastrophe, violent insurgencies and a nation adrift. Yet because he was unloved by his people and mistrusted by his own party-a minority in Parliament and ruling under the shadow of Sonia Gandhi-Rao lacked the mandate

to combat these crises. Yet, Rao was not just able to last a full five years as Prime Minister, he reinvented India, at home and abroad. Few world leaders have achieved so much with so little power. With exclusive access to Rao's never-before-seen personal papers as well as over a hundred interviews, Vinay Sitapati's definitive biography tells the story of India's makeover in the 1990s and the story of the Deng Xiaoping-like figure who did it. Assuming power over an ossified, quasi-socialist economy burdened by inefficient industrial behemoths, Rao was instrumental in driving through a broad set of liberalizing economic reforms that transformed India. Rao's career is the ideal window through which to understand how India became a force in the global economy almost overnight. Sitapati traces Rao's life from a village in Telangana through his years in power and-afterward-his humiliation in retirement. Yet the book never loses sight of the inner man-his difficult childhood, his corruptions and love

affairs, and his lingering loneliness. Meticulously researched and honestly told, this landmark political biography is a must-read for anyone interested in the man responsible for transforming India.

Introduction to African American Studies - Talmadge Anderson 2007

There is an ongoing debate as to whether African American Studies is a discipline, or multidisciplinary or interdisciplinary field. Some scholars assert that African American Studies use a well-defined common approach in examining history, politics, and the family in the same way as scholars in the disciplines of

economics, sociology, and political science. Other scholars consider African American Studies multidisciplinary, a field somewhat comparable to the field of education in which scholars employ a variety of disciplinary lenses-- be they anthropological, psychological, historical, etc., --to study the African world experience. In this model the boundaries between traditional disciplines are accepted, and researches in African American Studies simply conduct discipline based an analysis of particular topics. Finally, another group of scholars insists that African American Studies is interdisciplinary, an enterprise that generates distinctive analyses by combining perspectives from different traditional disciplines and synthesizing them into a unique framework of analysis.

The Cyberdimension - Eric Trozzo 2019-04-29

In 2013, Edward Snowden released a trove of documents revealing the extent of government electronic surveillance. Since then, we have been inundated with reports of vicious malware attacks, election hacking, data breaches, potential cyberwars, fights over Net Neutrality, and fake internet news. Where once discussion of cyberspace was full of hope of incredible potential benefits for humanity and global connection, it has become the domain of fear, anxiety, conflict, and authoritarian impulses. As the cloud of the Net darkens into a storm, are there insights from Christian theology about our online existence? Is the divine present in this phenomenon known as cyberspace? Is it a realm of fear or a realm of hope? In The

Cyberdimension, Eric Trozzo engages these questions, seeking not only a theological means of speaking about cyberspace in its ambiguity, but also how the spiritual dimension of life provokes resistance to the reduction of life to what can be calculated. Rather than focusing on the content available online, he looks to the structure of cyberspace itself to find a chastened yet still expectant vision of divinity amidst the political, economic, and social forces at play in the cyber realm.

The New Humanitarians in International Practice - Zeynep Sezgin 2015-12-14

As humanitarian needs continue to grow rapidly, humanitarian action has become more contested, with new actors entering the field to address unmet needs, but also challenging long-held principles and precepts. This volume provides detailed empirical comparisons between emerging and traditional humanitarian actors. It sheds light on why and how the emerging actors engage in humanitarian crises and how their activities are carried out and perceived in their transnational organizational environment. It develops and applies a conceptual framework that fosters research on humanitarian actors and the humanitarian principles. In particular, it simultaneously refers to theories of organizational sociology and

international relations to identify both the structural and the situational factors that influence the motivations, aims and activities of these actors, and their different levels of commitment to the traditional humanitarian principles. It thus elucidates the role of the humanitarian principles in promoting coherence and coordination in the crowded and diverse world of humanitarian action, and discusses whether alternative principles and parallel humanitarian systems are in the making. This volume will be of great interest to postgraduate students and scholars in humanitarian studies, globalization and transnationalism research, organizational sociology, international relations, development studies, and migration and diaspora studies, as well as policy makers and practitioners engaged in humanitarian action, development cooperation and migration issues.
