Contenidos docentes de vanguardia - Rocío Chao Fernández
2018-01-11

La Universidad se encuentra en pleno progreso desde su tiempo cero; de hecho, halla su carta de naturaleza en la necesidad de mejorar el medio que la nutre y por y para el que existe: la sociedad. Rompiendo las viejas membranas de la enseñanza imperante hasta el siglo XX, las nuevas (r)evoluciones de contenidos y fórmulas, como lo fuera el EEES (o Plan Bolonia) o las TIC, suponen la respuesta a esas actualizadas necesidades docentes y curriculares. Las Humanidades, las Artes, las Ciencias sociales y la Docencia se reescriben, hibridando, gracias a los nuevos lenguajes y herramientas, contenidos otrora lejanos. La nueva Academia es poliédrica, ínter y multi disciplinar, dialógica y colaborativa. En este estado de cosas la colección Herramientas universitarias se erige como atalaya para agrupar bajo su égida al más amplio conjunto de autores internacionales que iluminen, con sus investigaciones, la panoplia de contenidos que conforman el mundo científico donde nace el futuro. La calidad intelectual queda refrendada mediante la rigurosa implantación del habitual proceso garante, basado en la revisión o arbitraje por pares ciegos (peer review) de estos capítulos, sin renunciar a la más antigua tradición universitaria que obliga al opositor de lo publicado, a soportar el peso de la prueba. Este doble modelo de evaluación, a priori y a posteriori, garantiza la calidad del contenido de los textos de esta

colección. Pertener a la Academia, y en ello radica orgullosamente su valía, supone que todos sus miembros responden a una ambición irrenunciable: mostrar que el conjunto de sus trabajos conforma la vanguardia científica internacional. El texto que aquí se presenta está auspiciado por el Fórum Internacional de Comunicación y Relaciones Públicas (Fórum XXI), la Sociedad Española de Estudios de la Comunicación Iberoamericana (SEECI), la Asociación cultural Historia de los Sistemas Informativos y el Grupo Complutense (nº 931.791) de Investigación en Comunicación Concilium.

The Making of the Mosaic - Ninette Kelley 2010-10-02

Immigration policy is a subject of intense political and public debate. In this second edition of the widely recognized and authoritative work *The Making of the Mosaic*, Ninette Kelley and Michael Trebilcock have thoroughly revised and updated their examination of the ideas, interests, institutions, and rhetoric that have shaped Canada's immigration history. Beginning their study in the pre-Confederation period, the authors interpret major episodes in the evolution of Canadian immigration policy, including the massive deportations of the First World War and Depression eras as well as the Japanese-Canadian internment camps during World War Two. New chapters provide perspective on immigration in a post-9/11 world, where security concerns and a demand for temporary foreign workers play a defining role in immigration policy reform. A comprehensive and important work, *The Making of the Mosaic* clarifies the attitudes underlying each phase and juncture of immigration history, providing vital perspective on the central issues of immigration policy that continue to confront us today.

The Oxford Handbook of Music and World Christianities - Suzel Ana Reily 2016-03-25

The Oxford Handbook of Music and World Christianities investigates music's role in everyday practice and social history across the diversity of Christian religions and practices around the globe. The volume explores Christian communities in the Americas, Europe, Africa, Asia, and Australia as sites of transmission, transformation, and creation of deeply diverse musical traditions. The book's contributors, while mostly rooted in ethnomusicology, examine Christianities and their musics in methodologically diverse ways, engaging with musical sound and structure, musical and social history, and ethnography of music and musical performance. These broad materials explore five themes: music and missions, music and religious utopias (and other oppositional religious communities), music and conflict, music and transnational flows, and music and everyday life. The volume as a whole, then,

approaches Christian groups and their musics as diverse and powerful windows into the way in which music, religious ideas, capital, and power circulate (and change) between places, now and historically. It also tries to take account of the religious self-understandings of these groups, presenting Christian musical practice and exchange as encompassing and negotiating deeply felt and deeply rooted moral and cultural values. Given that the centerpiece of the volume is Christian religious musical practice, the volume reveals the active role music plays in maintaining and changing religious, moral, and cultural values in a long history of intercultural and transnational encounters.

Paradise Lost - John Milton 1773

Symphosius The Aenigmata - T. J. Leary 2014-03-27

The post-classical compilation known to modern scholarship as the Latin Anthology contains a collection of a hundred riddles, each consisting of three hexameters and preceded by a lemma. It would seem from the preface to this collection that they were composed extempore at a dinner to celebrate the Roman Saturnalia. The work was to have a defining influence on later collections of riddles; yet its title (probably the *Aenigmata*) has been debated, and almost nothing is known about its author: questions have even been asked about his name (Symphosius?) and date (4th-5th century AD?). In this edition of the riddles, the Introduction discusses the work's title and its author's identity: as well as his name and date, it considers his national origin (North African?) and intellectual background (a professional grammarian?), and argues that he was not Christian, as has been suggested. It examines the Saturnalian background to the work, setting it in its sociological context, and discusses the author's literary debts - especially to Martial. The Introduction also explores the author's ordering and arrangement of the riddles, discusses his literary style, Latinity and metre, and comments briefly on his *Nachleben*. It concludes with a survey of the textual tradition. The commentary on each riddle includes a translation, general

notes on the object it describes (with reference, as necessary, to museums and artefacts), and discussion of how it fits into the ordering of the collection, of variant readings and, with suitable illustration, of literary, stylistic and metrical considerations. Other areas, such as history and mythology, are also covered where relevant.

Narrativizing Theories - Benjamin John Peters 2020-02-06

Ours is an age of offense, a time of reactionary shock--always received, never given. Ours is an age that has forgone cultural narratives, a time of individualism--wherein personal identities trump the collective spirit. Ours is an age of failing earth, a time of ecological collapse--yet the consumption of global capitalism continues to run amok. But don't fear. You have the correct worldview, the best solutions. It's not your fault these things are happening. It's the president's, the immigrant's, and the Islamicist's. Or perhaps It's the socialist's, the tree hugger's, and the baby killer's. But it's not your fault. Never yours. For the world exists as

you see it--in an echo chamber lined with golden pixels. Do I still have your attention? Then join me. Within the covers of *Narrativizing Theories*, I dive into ambiguity and aesthetics to depict how clashing worldviews exist side by side yet remain mutually incompatible. I examine how cultures distinguish between acceptable and unacceptable beliefs, embodiments, and identities. And I outline an aesthetic theory of ambiguity that highlights--through the twists and turns of literature--the provisionality of knowledge and the narrativization of reality.

Remembering Biblical Figures in the Late Persian and Early Hellenistic Periods - Diana V. Edelman 2013-08-29

Social memory studies offer an under-utilised lens through which to approach the texts of the Hebrew Bible. In this volume, the range of associations and symbolic values evoked by twenty-one characters representing ancestors and founders, kings, female characters, and prophets are explored by a group of international scholars. The presumed social settings when most of the books comprising the TANAK had come into existence and were being read together as an emerging authoritative corpus are the late Persian and early Hellenistic periods. It is in this context then that we can profitably explore the symbolic values and networks of meanings that biblical figures encoded for the religious community of Israel in these eras, drawing on our limited knowledge of issues and life in Yehud and Judean diasporic communities in these periods. This is the first period when scholars can plausibly try to understand the mnemonic effects of these texts, which were understood to encode the collective experience members of the community, providing them with a common identity by offering a sense of shared past while defining aspirations for the future. The introduction and the concluding essay focus on theoretical and methodological issues that arise from analysing the Hebrew Bible in the framework of memory studies. The individual character studies, as a group, provide a kaleidoscopic view of the potentialities of using a social memory approach in Biblical Studies, with the essay on Cyrus written by a classicist, in order to provide an enriching perspective on how one biblical figure was construed in Greek social memory, for comparative purposes.

Black Mosaic - Candis Watts Smith 2014-10-24

Historically, Black Americans have easily found common ground on political, social, and economic goals. Yet, there are signs of increasing variety of opinion among Blacks in the United States, due in large part to the influx of Afro-Latino, Afro-Caribbean, and African immigrants to the United States. In fact, the very definition of "African American" as well as who can self-identity as Black is becoming more ambiguous. Should

we expect African Americans' shared sense of group identity and high sense of group consciousness to endure as ethnic diversity among the population increases? In *Black Mosaic*, Candis Watts Smith addresses the effects of this dynamic demographic change on Black identity and Black politics. Smith explores the numerous ways in which the expanding and rapidly changing demographics of Black communities in the United States call into question the very foundations of political identity that has united African Americans for generations. African Americans' political attitudes and behaviors have evolved due to their historical experiences with American Politics and American racism. Will Black newcomers recognize the inconsistencies between the American creed and American reality in the same way as those who have been in the U.S. for several generations? If so, how might this recognition influence Black immigrants' political attitudes and behaviors? Will race be a site of coalition between Black immigrants and African Americans? In addition to face-to-face interviews with African Americans and Black immigrants, Smith employs nationally representative survey data to examine these shifts in the attitudes of Black Americans. Filling a significant gap in the political science literature to date, *Black Mosaic* is a groundbreaking study about the state of race, identity, and politics in an ever-changing America.

The Lod Mosaic - Gideon Avni 2015-09-01

In 1996 a series of exquisite Roman mosaic floors was accidentally uncovered during highway construction in the modern Israeli town of Lod. The mosaics featured elegant and superbly crafted animals, fish, birds and other creatures, dating to around AD300. They probably belonged to a private house and served as a series of reception or audience halls, where visitors would have been met and entertained. The mosaic will shortly be returning from a world tour to its new home at The Shelby White and Leon Levy Lod Mosaic Archaeological Center in Lod, Israel. Published with the Israel Antiquities Authority to celebrate the new museum's opening, this lavishly illustrated volume will be the only book on this exceptional archeological find. Featuring sumptuous photography and an accessible and informative text, this captivating volume will be essential for all those interested in Roman mosaics and the fascinating history of the region."

Muros de discriminación y exclusión en la construcción de identidades: la mirada de las ciencias sociales. - Almudena Cotán Fernández 2021-12-07

Si algo caracteriza a la globalización contemporánea es la apertura, flexibilización y, sobre todo, la hibridación de la que estamos siendo testigos a la hora de construir las identidades. Antes de que la interacción en internet por medio de las redes sociales hiciera acto de presencia, la edificación de identidades tenía un marcado carácter de proximidad y presencialidad. Los referentes en torno a lo cuales pivotaba la pedagogía identitaria estaban configurados en los círculos de intimidad que se experimentaban en vivo y en directo, que poseían un testimonio claro y personalmente conocido. En este sentido, el plano mediático como eje referencial para esta construcción de la personalidad

se percibía desde la lejanía y se caracterizaba por un halo ilusorio.

A Pattern Language - Christopher Alexander 2018-09-20

You can use this book to design a house for yourself with your family; you can use it to work with your neighbors to improve your town and neighborhood; you can use it to design an office, or a workshop, or a public building. And you can use it to guide you in the actual process of construction. After a ten-year silence, Christopher Alexander and his colleagues at the Center for Environmental Structure are now publishing a major statement in the form of three books which will, in their words, "lay the basis for an entirely new approach to architecture, building and planning, which will we hope replace existing ideas and practices entirely." The three books are *The Timeless Way of Building*, *The Oregon Experiment*, and this book, *A Pattern Language*. At the core of these books is the idea that people should design for themselves their own houses, streets, and communities. This idea may be radical (it implies a radical transformation of the architectural profession) but it comes simply from the observation that most of the wonderful places of the world were not made by architects but by the people. At the core of the books, too, is the point that in designing their environments people always rely on certain "languages," which, like the languages we speak, allow them to articulate and communicate an infinite variety of designs within a forma system which gives them coherence. This book provides a language of this kind. It will enable a person to make a design for almost any kind of building, or any part of the built environment. "Patterns," the units of this language, are answers to design problems (How high should a window sill be? How many stories should a building have? How much space in a neighborhood should be devoted to grass and trees?). More than 250 of the patterns in this pattern language are given: each consists of a problem statement, a discussion of the problem with an illustration, and a solution. As the authors say in their introduction, many of the patterns are archetypal, so deeply rooted in the nature of things that it seems likely that they will be a part of human nature, and human action, as much in five hundred years as they are today.

Roman Mosaics in the J. Paul Getty Museum - Alexis Belis

2016-05-01

The mosaics in the collection of the J. Paul Getty Museum span the

second through the sixth centuries AD and reveal the diversity of compositions found throughout the Roman Empire during this period. Elaborate floors of stone and glass tesserae transformed private dwellings and public buildings alike into spectacular settings of vibrant color, figural imagery, and geometric design. Scenes from mythology, nature, daily life, and spectacles in the arena enlivened interior spaces and reflected the cultural ambitions of wealthy patrons. This online catalogue documents all of the mosaics in the Getty Museum's collection, presenting their artistry in new color photography as well as the contexts of their discovery and excavation across Rome's expanding empire—from its center in Italy to provinces in southern Gaul, North Africa, and ancient Syria. Reflecting the Getty's commitment to open content, Roman Mosaics in the J. Paul Getty Museum is available online at www.getty.edu/publications/romanmosaics and may be downloaded free of charge in multiple formats. For readers who wish to have a bound reference copy, this paperback edition has been made available for sale. The publication of this online catalogue is issued on the occasion of the exhibition, Roman Mosaics across the Empire, on view at the Getty Villa from March 30 through September 12, 2016.

Oxford Classics - 2013-12-12

Oxford, the home of lost causes, the epitome of the world of medieval and renaissance learning in Britain, has always fascinated at a variety of levels: social, institutional, cultural. Its rival, Cambridge, was long dominated by mathematics, while Oxford's leading study was Classics. In this pioneering book, 16 leading authorities explore a variety of aspects of Oxford Classics in the last two hundred years: curriculum, teaching and learning, scholarly style, publishing, gender and social exclusion and the impact of German scholarship. Greats (Literae Humaniores) is the most celebrated classical course in the world: here its early days in the mid-19th century and its reform in the late 20th are discussed, in the latter case by those intimately involved with the reforms. An opening chapter sets the scene by comparing Oxford with Cambridge Classics, and several old favourites are revisited, including such familiar Oxford products as Liddell and Scott's "Greek-English Lexicon", the "Oxford Classical Texts", and Zimmern's "Greek Commonwealth". The book as a whole offers a pioneering, wide-ranging survey of Classics in Oxford.
