A comparative study of elite English-medium schools, public schools, and Islamic madaris in contemporary Pakistan - Akhtar Hassan Malik 2015-05-28

This ethnographic study examines the role of differing school knowledge in reproducing various social classes in the society. It was observed that an unequal availability of capital resources, agents' class habitus, and the type of their "cultural currency" act as selection mechanisms that clearly favour some social groups over others. The ruling classes ensure the transfer of their power and privilege to their children by providing them with quality education in elite schools. The disadvantaged classes are excluded from these unique institutions by both social and economic sanctions. They have no other option than to educate their children either in public schools or Islamic madaris. As a result, inequitable educational opportunities consolidate the existing social-class hierarchy.

Islamisation of Pakistani Social Studies Textbooks - Yvette Claire Rosser 2003

Textbooks often become a part of the political agenda of the state. In the case of Pakistani Social Studies textbooks, the result has been disastrous. Whether it is military or civilian government, the content of the textbooks have been consciously manipulated to serve the interests of the ruling power. This has come at the cost of correct information and reasoned analyses. Rosser, in this study, makes an interesting probe into the Islamic nation-building project in Pakistan through the medium of education.

Lord of the Flies - William Golding 2003-12-16

Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

Routledge Handbook of South Asian Politics - Paul R. Brass 2010-04-30

The Routledge Handbook of South Asian Politics examines key issues in politics of the five independent states of the South Asian region: India, Pakistan, Bangladesh, Sri Lanka, and Nepal. Written by experts in their respective areas, this Handbook introduces the reader to the politics of South Asia by presenting the prevailing agreements and disagreements in the literature. In the first two sections, the Handbook provides a comprehensive introduction to the modern political history of the states of the region and an overview of the independence movements in the former colonial states. The other sections focus on the political changes that have occurred in the postcolonial states since independence, as well as the successive political changes in Nepal during the same period, and the structure and functioning of the main governmental and non-governmental institutions, including the structure of the state itself (unitary or federal), political parties, the judiciary, and the military. Further, the contributors explore several aspects of the political process and political and economic change, especially issues of pluralism and national integration, political economy, corruption and criminalization of politics, radical and violent political movements, and the international politics of the region as a whole. This unique reference work provides a comprehensive survey of the state of the field and is an invaluable resource for students and academics interested in South Asian Studies, South Asian Politics, Comparative Politics and International Relations.

Of Gods and Books - Florinda De Simini 2016-11-07

India has been the homeland of diverse manuscript traditions that do not cease to impress scholars for their imposing size and complexity. Nevertheless, many topics concerning the study of Indian manuscript cultures still remain to receive systematic examination. *Of Gods and Books* pays attention to one of these topics - the use of manuscripts as ritualistic tools. Literary sources deal quite extensively with rituals principally focused on manuscripts, whose worship, donation and preservation are duly prescribed. Around these activities, a specific category of ritual gift is created, which finds attestations in pre-tantric, as well as in smārta and tantric, literature, and whose practice is also variously reflected in epigraphical documents. De Simini offers a first systematic study of the textual evidence on the topic of the worship and donation of knowledge. She gives account of possible implications for the relationships between religion and power. The book is indispensable for a deeper understanding of the cultural aspects of manuscript transmission in medieval India, and beyond.

(Re)Constructing Memory: Textbooks, Identity, Nation, and State - James H. Williams 2016-07-08

This book engages readers in thirteen conversations presented by authors from around the world regarding the role that textbooks play in helping readers imagine membership in the nation. Authors' voices come from a variety of contexts - some historical, some contemporary, some providing analyses over time. But they all consider the changing portrayal of diversity, belonging and exclusion in multiethnic and diverse societies where silenced, invisible, marginalized members have struggled to make their voices heard and to have their identities incorporated into the national narrative. The authors discuss portrayals of past exclusions around religion, ethnicity, sexual orientation, as they look at the shifting boundaries of insider and outsider. This book is thus about "who we are" not only demographically, but also in terms of the past, especially how and whether we teach discredited pasts through textbooks. The concluding chapters provides ways forward in thinking about what can be done to promote curricula that are more inclusive, critical and positively bonding, in increasingly larger and more inclusive contexts.

States in Conflict with Their Minorities - Rita Manchanda 2010-07-08

Going beyond the mere mapping of the minority situation in South Asia, the essays in this volume explore the modern minority problematique in a democracy as integral to modern state-making processes, recognizing Nation and State as majoritarian concepts. Focusing on the South Asian context, they emphasize minority as a political category. Further, they move away from isolated national frames and explore the minority question as a foreign policy question. These second generation studies by authors who have defined the scholarly discourse on minority rights in the region invite comparative analyses and point towards the necessity of addressing the minority question regionally. The book reveals the limits of the strategy of political liberalism in delivering equality and justice to minority groups. But it also points to a positive shift in the politics of some of the minority communities—a moving away from the politics of difference towards a politics centred on egalitarian claims, and common issues of democratic governance. Some essays examine specific trends of minorities' rights in countries like India, Pakistan, Bangladesh and Sri Lanka, while others take a more general account of the intellectual trends of minority constitution, the development of the minority discourse and the accommodation of social, political, economic and legal aspects of this section of the population. The book encompasses issues such as stereotyping of minorities, state induced politics of polarization, development of an economy of collusion and co-operation, institutions enabling greater inclusion, etc. The book will be extremely valuable to policy-makers, NGOs, human rights activists and students of political science, sociology and international relations.
