

Africa Diversity Development Routledge Perspectives Ebook

Yeah, reviewing a book **Africa Diversity Development Routledge Perspectives Ebook** could mount up your near links listings. This is just one of the solutions for you to be successful. As understood, carrying out does not suggest that you have fabulous points.

Comprehending as without difficulty as covenant even more than additional will give each success. neighboring to, the publication as capably as perspicacity of this Africa Diversity Development Routledge Perspectives Ebook can be taken as without difficulty as picked to act.

Non-Governmental Organizations, Management and Development - David Lewis
2014-03-05

Non-Governmental Development Organizations have seen turbulent times over the decades; however, recent years have seen them grow to occupy high-profile positions in the fight against poverty. They are now seen as an important element of 'civil society', a concept that has been given increasing importance by global policy makers. This book has evolved during the course of that period to be a prime resource for those working (or wishing to work) with and for NGOs. The third edition of *Non-Governmental Organizations, Management and Development* is fully updated and thoroughly reorganized, covering key issues including, but not limited to, debates on the changing global context of international development and the changing concepts and practices used by NGOs. The interdisciplinary approach employed by David Lewis results in an impressive text that draws upon current research in non-profit management, development management, public management and management theory, exploring the activities, relationships and internal structure of the NGO. This book remains the first and only comprehensive and academically grounded guide to the issues facing international development NGOs as they operate in increasingly complex and challenging conditions around the world. It is the perfect resource for students undertaking studies of NGOs and the non-profit sector, in addition to being an excellent resource for development studies students more generally.

Contemporary Issues and Prospects in Business Development in Africa - Simon P. Sigué
2020-06-30

Celebrating the 20th anniversary of the *Journal of African Business*, this book delves into contemporary issues in business and business knowledge development in Africa. This collection of eight chapters—by fourteen distinguished scholars based in Africa, Europe, and North America—covers anticorruption strategies; domestic credit and export diversification; the challenges of doing business in African countries; the emergence of African endogenous businesses; board gender diversity; governance and performance of strategic alliances; customer-centric marketing in Africa; and the intellectual development of the *Journal of African Business* as the premier research outlet for African business since its inception in 2000. Each chapter offers a cogently differentiated perspective about business growth or business knowledge development in Africa. Made up of contributions which are vividly and ingeniously written to be accessible to decision-makers and other non-experts, this book will be of interest to all those researching the development of business in Africa. This book was originally published as a special issue of the *Journal of African Business*.

Discourses of the Developing World - Shi-xu
2016-04-28

Against the backdrop of overwhelming discourse scholarship emanating from the Western cosmopolitan centres, this volume offers a development-centred approach to unfamiliar, marginalized or otherwise disadvantaged

discourses of the Third World or the Global South. Written by leading researchers based in Asia, Africa and Latin America, respectively, this book reconstructs Eastern paradigms of communication studies on the one hand and explores the discursive problems, complexities, aspirations, and dynamics of the non-Western, subaltern, and developing societies on the other. As methodological principles, the authors i) adopt the cultural-political stance of supporting cultural diversity and harmony at both academic and everyday levels, ii) draw upon Asian, African and Latino scholarship in critical dialogue with the existing mainstream traditions, and iii) make sense of the discourses of Asia, Africa and Latin America from their own local as well as global, historical and intercultural, perspectives. This book will particularly appeal to scholars and students in the fields of discourse studies, communication and cultural studies, and development studies.

Theories of Race and Racism - Les Back 2000
Theories of Race and Racism is an important and innovative collection that brings together the work of scholars who have helped to shape the study of race and racism as a historical and contemporary phenomenon. The Reader's contributions have been chosen to reflect the different theoretical perspectives and to help readers gain a feel for the changing terms of the race and racism debate over time. *Theories of Race and Racism* is divided into the following main sections: Origins and Transformations Sociology, Race and Social Theory Racism and Anti-Semitism Colonialism, Race and the Other Feminism, Difference and Identity Changing Boundaries and Spaces The editors go further to shed light on the relatively new areas of interest that are likely to attract attention in years to come. Contributors include; Theodor Adorno, K. Anthony Appiah, Michael Banton, Zygmunt Bauman, Ruth Benedict, Homi Bhabha, Chetan Bhatt, Gargi Bhattacharyya, Avtar Brah, Hazel Carby, Barbara Christian, Oliver C. Cox, Richard Dyer, Frantz Fanon, Ruth Frankenberg, Sander Gilman, Paul Gilroy, David T. Goldberg, Stuart Hall, Patricia Hill Collins, bell hooks, Max Horkheimer, Winthrop Jordan, Michael Keith, Anne McClintock, Kobena Mercer, Robert Miles, Chandra Talpade Mohanty, George Mosse, Gunnar Myrda, Robert

Park, John Rex, John Solomos, Stephen Steinberg, Ann Laura Stoler, Tzvetan Todorov, Russo and Lourdes Torres, Patricia Williams, Kimberle Williams Crenshaw, Howard Winant, Lola Young, Slavoj Zizek.

Reducing Urban Violence in the Global South - Jennifer Erin Salahub 2019

Reducing Urban Violence in the Global South seeks to identify the drivers of urban violence in the cities of the Global South and how they relate to and interact with poverty and inequalities. Drawing on the findings of an ambitious 5-year, 15-project research programme supported by Canada's International Development Research Centre and the UK's Department for International Development, the book explores what works, and what doesn't, to prevent and reduce violence in urban centres. Cities in developing countries are often seen as key drivers of economic growth, but they are often also the sites of extreme violence, poverty, and inequality. The research in this book was developed and conducted by researchers from the Global South, who work and live in the countries studied; it challenges many of the assumptions from the Global North about how poverty, violence, and inequalities interact in urban spaces. In so doing, the book demonstrates that accepted understandings of the causes of and solutions to urban violence developed in the Global North should not be imported into the Global South without careful consideration of local dynamics and contexts. *Reducing Urban Violence in the Global South* concludes by considering the broader implications for policy and practice, offering recommendations for improving interventions to make cities safer and more inclusive. The fresh perspectives and insights offered by this book will be useful to scholars and students of development and urban violence, as well as to practitioners and policymakers working on urban violence reduction programmes. It accepted understandings of the causes of and solutions to urban violence developed in the Global North should not be imported into the Global South without careful consideration of local dynamics and contexts. *Reducing Urban Violence in the Global South* concludes by considering the broader implications for policy and practice, offering recommendations for

improving interventions to make cities safer and more inclusive. The fresh perspectives and insights offered by this book will be useful to scholars and students of development and urban violence, as well as to practitioners and policymakers working on urban violence reduction programmes.

Media Diversity in South Africa - Julie Reid 2022

This timely book argues that the Global North's research methods and traditional assumptions are not valid to the media landscapes and audiences of the Global South. With South Africa as the focus, the authors offer a new understanding of media diversity along an audience-centred approach. Disappointingly, research shows that most South African citizens (most of whom are economically marginalised) are found to experience extremely low levels of media content diversity in their personal media diets. The contributing factors are inter-related and complex, but include the inequitable distribution of media content, a lack of African language media, and most especially, the cost of media access which is unaffordable to many. In this book, the authors examine what went wrong with post-apartheid attempts to democratise the media landscape, and why the experienced levels of media diversity by the majority South African audience remain so woefully low. While media diversity is usually measured by policymakers, sector stakeholders or by market-related imperatives, this book foregrounds the perspective of the media consumer. In doing so, traditional media measuring is inverted - leading to a more in-depth understanding of how ordinary people in the Global South receive media content, how much, and why. The authors offer a holistic analysis of the ineffectuality of key media policymaking processes, projects and institutions - while also suggesting how these could be transformed to create a more diverse and broadly accessible media landscape.

Caravans in Global Perspective - Persis B. Clarkson 2021-11-30

This book provides a fresh and unique global perspective on the study of caravans by bringing together a wealth of up-to-date research that explores the similarities and divergences of caravan lifeways in Africa, Eurasia, the Near East, Southwest Asia, Mesoamerica, and the Andes. The volume presents theoretical

frameworks for caravan assessment and intercultural caravan crossings, pushing the boundaries of caravan route history and archaeology to consider the emergence, evolution, maintenance, and adaptations of caravans. Drawing from anthropological, archaeological, historical, geographical, economic, social, political, and art historical perspectives, the volume will be attractive to scholars of these disciplines and beyond who interested in social issues embedded on trade, travel and nomadism.

Eastern and Western Ideas for African Growth - Kenichi Ohno 2013-05-29

The West and the East approach economic development differently. The Europeans and Americans stress free and fair business climate, promoting private activities generally without picking winners, and improving governance. East Asia is interested in achieving concrete results and projects rather than formal correctness, prioritizing a few sectors for industrialization, and eventual graduation from aid. The West mostly shapes shifting strategies of the international donor community while the East has in reality made remarkable progress in industrial catch-up. The two approaches cannot be merged easily but they can be used in proper combination to realize growth and economic transformation. This book proposes more dialogue and complementarity between the two in the development effort of Africa and other regions. In this collected volume, contributed by experts and practitioners from both East and West, the need to introduce Eastern ideas to the global development strategy is emphasized. Analysis of British and other Western donor policies is given while Japanese, Korean, and other Asian approaches are also explained with concrete examples. The concept of governance for growth is presented and the impact of rising China on development studies is contemplated. The practices of industrial policy dialogues and actions assisted by East Asian experts are reported from Tunisia, Zambia, Ethiopia, Rwanda, and others. The book should be applicable to all donors, institutions, NGOs and business enterprises engaged in development cooperation.

Routledge Handbook of EU-Middle East Relations - Dimitris Bouris 2021-12-14

EU-Middle East relations are multifaceted, varied and complex, shaped by historical, political, economic, migratory, social and cultural dynamics. Covering these relations from a broad perspective that captures continuities, ruptures and entanglements, this handbook provides a clearer understanding of trends, thus contributing to a range of different turns in International Relations. The interdisciplinary and diverse assessments through which readers may grasp a more nuanced comprehension of the intricate entanglements in EU-Middle East relations are carefully provided in these pages by leading experts in the various (sub)fields, including academics, think-tankers, as well as policymakers. The volume offers original reflections on historical constructions, theoretical approaches, multilateralism and geopolitical perspectives, contemporary issues, peace, security and conflict and development, economics, trade and society. The chapters adopt various research methodologies organised into six main sections: History; Theoretical perspectives; Multilateralism and Geopolitical perspectives; MENA-EU relations in the contemporary world; Peace, security, and conflict in the Middle East; and Development, economics, trade and societal issues. This Handbook provides an entry point for an informed exploration of the multiple themes, actors, structures, policies and processes that mould EU-Middle East relations. It is designed for policymakers, academics and students of all levels interested in politics, international and global studies, contemporary history, regionalism and area studies.

Except-Africa - Emery Roe 2018-01-18

First Published in 2018. Routledge is an imprint of Taylor & Francis, an Informa company.

Structural Change in Africa - Carlos Lopes
2019-06-25

Debates on African development continue to downplay the achievement of the continent: economic achievements are diminished and the perception of a conflict prone continent continues. Many of the policy prescriptions externally imposed on African countries have done little to transform the continent largely because they have been conceived and applied without context. Using literature from diverse origins, this book expands our knowledge about

Africa and makes practical suggestions as to how successful development in a complex, yet dynamic continent can be achieved. Widening the policy dialogue and providing alternative thinking on the key elements and full extent of opportunities and challenges towards achieving the socio-economic transformation of Africa, the book moves the debate from the rhetoric to reality. As a considered reflection on the 'Africa's transformation' narrative, it outlines the practical pathways necessary for Africa's sustainable development, providing policy makers and researchers with tested solutions. It will be of interest to all scholars, students and policy professionals working in African development, public policy, international political economy, economic policy and politics.

Teacher Education for Diversity - Elizabeth Walton 2018

Foregrounding the diversity that characterises various educational settings, this book discusses how histories and geographies of oppression, exclusion and marginalisation have impacted on teacher education. Contributors draw on first-hand experiences of living and working in countries including Brazil, China, South Africa, New Zealand and Malawi. Positioned in a geographical and metaphorical 'Global South', the book draws critical attention to debates which have been otherwise marginalised in relation to those conducted in the 'Global North'. Chapters address difference and diversity on both a conceptual and empirical level, acknowledging the significance of various global trends including increased migration and urbanisation; and broadening understandings of race, religion, gender, sexuality and dis/ability. Taken together, these chapters reveal the extent of the work which still remains to be done in the field of teacher education for diversity. The issues discussed are of global significance, making this text key reading for teachers, teacher educators, and those concerned with the advancement of social justice and reduction of inequality through education.

The Routledge Handbook on Livelihoods in the Global South - Fiona Nunan 2022-05-05

The Routledge Handbook on Livelihoods in the Global South presents a unique, timely, comprehensive overview of livelihoods in low- and middle-income countries. Since their

widespread adoption in the 1990s, livelihoods perspectives, frameworks and methods have influenced diverse areas of research, policy and practice. The concept of livelihoods reflects the complexity of strategies and practices used by individuals, households and communities to meet their needs and live their lives. The Handbook brings together insights and critical analysis from diverse approaches and experiences, learning from research and practice over the last 30 years. The Handbook comprises an introductory section on key concepts and frameworks, followed by five parts, on researching livelihoods, negotiating livelihoods, generating livelihoods, enabling livelihoods and contextualising livelihoods. The introduction provides readers with an appreciation of concepts researched and applied in the five parts, including chapters on vulnerability and resilience, social capital and networks, and institutions. Each part reflects the diversity of approaches taken to understanding livelihoods, whilst recognising commonalities, including the centrality of power in shaping, enabling and constraining livelihoods. The book also reflects diversity of context, including conflict, climate change and religion, as well as in generating livelihoods, through agriculture, small-scale mining and pastoralism. The aim of each chapter is to provide a critically informed introduction and overview of key concepts, issues and debates of relevance to the topic, with each chapter concluding with suggestions for further reading. It will be an essential resource to students, researchers and practitioners of international development and related fields. Researchers and practitioners will also benefit from the book's diverse disciplinary contributions and by the wide and contemporary coverage.

Before Modern Humans - Grant S. McCall
2020-09-11

This fascinating volume, assessing Lower and Middle Pleistocene African prehistory, argues that the onset of the Middle Stone Age marks the origins of landscape use patterns resembling those of modern human foragers. Inaugurating a paradigm shift in our understanding of modern human behavior, Grant McCall argues that this transition—related to the origins of “home base” residential site use—occurred in mosaic fashion

over the course of hundreds of thousands of years. He concludes by proposing a model of brain evolution driven by increasing subsistence diversity and intensity against the backdrop of larger populations and Pleistocene environmental unpredictability. McCall argues that human brain size did not arise to support the complex patterns of social behavior that pervade our lives today, but instead large human brains were co-opted for these purposes relatively late in prehistory, accounting for the striking archaeological record of the Upper Pleistocene.

Economics and Development Studies -

Michael Tribe 2010-09-13

Development studies textbooks and courses have sometimes tended to avoid significant economic content. However, without an understanding of the economic aspects of international development many of the more complex issues cannot be fully comprehended. Economics and Development Studies makes the economic dimension of discourse around controversial issues in international development accessible to second and third year undergraduate students working towards degrees in development studies. Following an introductory chapter outlining the connections between development economics and development studies, this book consists of eight substantive chapters dealing with the nature of development economics, economic growth and structural change, economic growth and developing countries, economic growth and economic development since 1960, the global economy and the Third World, developing countries and international trade, economics and development policy, and poverty, equality and development economists, with a tenth concluding chapter. This book synthesizes existing development economics literature in order to identify the salient issues and controversies and make them accessible and understandable. The concern is to distinguish differences within the economics profession, and between economists and non-economists, so that the reader can make informed judgments about the sources of these differences, and about their impact on policy analysis and policy advice. The book features explanatory text boxes, tables and diagrams, suggestions for further reading, and a listing of the economic concepts used in the

chapters.

People-Centered Social Innovation - Swati Banerjee 2019-07-10

Social Innovation is emerging as an alternate interdisciplinary development pathway of knowledge and practice that aims to understand and address contemporary complexities and multi - dimensional social realities. BEPA (2011) defines social innovation as, 'innovations that are social in both their ends and means'. However, though Social Innovation is a widely-used term; its conceptual understanding and the specific relation to social change remains under explored. People Centered Social Innovation: Global perspectives on an Emerging Paradigm attempts to revisit and extend the existing understanding of Social Innovation in practice by focusing upon the lived realities of marginalized groups and communities. The emerging field of people-centered development is placed in dialogue with theory and concepts from the more established field of social innovation to create a new approach; one that adopts a global perspective, engaging with very different experiences of marginality across the global north and south. Theoretically, 'People Centered Social Innovation: Global Perspectives on an Emerging Paradigm' draws upon 'northern' understandings of change and improvement as well as 'southern' theory concerns for epistemological diversity and meaning making. The result is an experiment aimed at reimagining research and practice that seriously needs to center the actor in processes of social transformation.

Engaging Minds - Brent Davis 2015-05-01
Engaging Minds: Cultures of Education and Practices of Teaching explores the diverse beliefs and practices that define the current landscape of formal education. The 3rd edition of this introduction to interdisciplinary studies of teaching and learning to teach is restructured around four prominent historical moments in formal education: Standardized Education, Authentic Education, Democratic Citizenship Education, Systemic Sustainability Education. These moments serve as the foci of the four sections of the book, each with three chapters dealing respectively with history, epistemology, and pedagogy within the moment. This structure makes it possible to read the book in two ways -

either "horizontally" through the four in-depth treatments of the moments or "vertically" through coherent threads of history, epistemology, and pedagogy. Pedagogical features include suggestions for delving deeper to get at subtleties that can't be simply stated or appreciated through reading alone, several strategies to highlight and distinguish important vocabulary in the text, and more than 150 key theorists and researchers included among the search terms and in the Influences section rather than a formal reference list.

Expanding Perspectives on Human Rights in Africa - M. Raymond Izarali 2019-03-14

This book draws attention to emerging issues around the rights of minorities, marginalized groups, and persons in Africa. It explores the gaps between human rights provisions and conditions, showing that although international human rights principles have been embraced in the continent, various minority groups and marginalized persons are denied such rights through criminalization and persecution. African countries have a good record of signing and ratifying international and regional rights instruments but the political will and capacity for enforcing these with respect to minorities remain weak. International contributors to the book provide new perspectives on the rights of marginalized and minority groups in different parts of Africa and the extent to which they are deprived or denied entitlement to the universality and equality articulated in law. The authors show that human rights, while having come of age as a moral ideal, has not been fully entrenched in practice towards groups such as children, indigenous populations, the mentally ill, persons with disabilities, and persons with albinism. This volume is geared toward scholars, students, human rights groups, policy makers, social workers, international organizations, and policy makers in the fields of criminology, security studies, development studies, political science, sociology, children studies, social psychology, international relations, postcolonial studies, and African Studies.

Africa - Peter Lewis 2018-02-20

This book focuses on the historical construction of African states, the modes of political control in the region, and the character of political elites. It examines the nature of political

legitimacy and the avenues of participation or withdrawal pursued by various popular sectors. *Innovating Development Strategies in Africa* - Landry Signé 2017-08-31

This book examines postcolonial strategies for economic development in Africa from the 1960s to the present day.

The Routledge Handbook of EU-Africa Relations - Toni Haastrup 2020-12-31

This handbook provides a comprehensive overview of the changing dynamics in the relationship between the African continent and the EU, provided by leading experts in the field. Structured into five parts, the handbook provides an incisive look at the past, present and potential futures of EU-Africa relations. The cutting-edge chapters cover themes like multilateralism, development assistance, institutions, gender equality and science and technology, among others. Thoroughly researched, this book provides original reflections from a diversity of conceptual and theoretical perspectives, from experts in Africa, Europe and beyond. The handbook thus offers rich and comprehensive analyses of contemporary global politics as manifested in Africa and Europe. The Routledge Handbook of EU-Africa Relations will be an essential reference for scholars, students, researchers, policy makers and practitioners interested and working in a range of fields within the (sub)disciplines of African and EU studies, European politics and international studies. The Routledge Handbook of EU-Africa Relations is part of the mini-series Europe in the World Handbooks examining EU-regional relations and established by Professor Wei Shen.

The Diaspora's Role in Africa - Stella-Monica N. Mpande 2021-11-08

Africans living in the diaspora have a unique position as potential agents of change in helping to address Africa's political and socioeconomic challenges. In addition to sending financial remittances, their multiple, hybrid identities in and out of geographical and psychocultural spaces allow them to play a role as cultural and political ambassadors to foster social change and sustainable development back in their African homelands. However, this hybrid position is not without challenges, and this book reflects some of the conundrums faced by members of the

diaspora as they negotiate their relationships with their home countries. The author uses her lived experiences and empirical research to ask: are members of the diaspora conduits of Western cultural hegemony at the cost of their traditional preservation and meaningful development in Africa? How does the Western media's portrayal of Africa as the "Dark Continent" in the 21st century influence their decision-making process to invest back home? How could African nations' governments manage their relationships with citizens abroad to motivate them to invest in their home countries? How do some citizen-residents in Africa and African Diaspora communities perceive each other in the context of Africa's development? How could the African Diaspora collaborate with citizen-residents across growth sectors to impact Africa's development? The book hopes to inspire agents of change within the diaspora and features diverse African entrepreneurs' success stories and their experiences of tackling these challenges. The book will be of interest to aspiring entrepreneurs, researchers across African studies, and the expanding and vibrant field of diaspora research.

Scaling Impact - Robert McLean 2019-05-14
Scaling Impact introduces a new and practical approach to scaling the positive impacts of research and innovation. Inspired by leading scientific and entrepreneurial innovators from across Africa, Asia, the Caribbean, Latin America, and the Middle East, this book presents a synthesis of unrivalled diversity and grounded ingenuity. The result is a different perspective on how to achieve impact that matters, and an important challenge to the predominant more-is-better paradigm of scaling. For organisations and individuals working to change the world for the better, scaling impact is a common goal and a well-founded aim. The world is changing rapidly, and seemingly intractable problems like environmental degradation or accelerating inequality press us to do better for each other and our environment as a global community. Challenges like these appear to demand a significant scale of action, and here the authors argue that a more creative and critical approach to scaling is both possible and essential. To encourage uptake and co-development, the authors present actionable

principles that can help organisations and innovators design, manage, and evaluate scaling strategies. *Scaling Impact* is essential reading for development and innovation practitioners and professionals, but also for researchers, students, evaluators, and policymakers with a desire to spark meaningful change.

Gender Roles - Linda L. Lindsey 2015-10-14
Offers a sociological perspective of gender that can be applied to our lives. Focusing on the most recent research and theory—both in the U.S. and globally—*Gender Roles, 6e* provides an in-depth, survey and analysis of modern gender roles and issues from a sociological perspective. The text integrates insights and research from other disciplines such as biology, psychology, anthropology, and history to help build more robust theories of gender roles.

The Emerging Middle Class in Africa - Mthuli Ncube 2014-10-10

The emergence of the African middle class as a driver of Africa's economic growth stands out as an important milestone in Africa's contemporary economic history. This growth, though uneven, is a source of hope for Africa, but also a signal to the rest of the world on the prospects for economic recovery and renewal, particularly because it has been steady despite the global downturn. *The Emerging Middle Class in Africa* analyses specific aspects of the lives of the middle class in Africa. It looks at how people become and remain in the middle class through a series of thematic chapters. It examines how behaviour changes in the process, in terms of consumption patterns and spending on health and education. A further dimension of this analysis is how class impacts on gender relations and whether women are able to reap the same benefits of social advancement available to men. Africa is a continent of such scale and diversity that experiences across countries vary widely. The book thus captures the common patterns across the continent. This text is primarily aimed at Africanist researchers, policy makers, development practitioners, and bilateral and multilateral institutions, as well as students of African studies, political science, political economy, development studies, and development economics.

Dynamics of International Business - Andrea Colli 2015-12-22

The Dynamics of International Business offers a comparative, chronological overview of the strategic and structural evolution of international firms. Organized around eras of global economic development, the text synthesizes research on the internationalization of firms, highlighting crucial turning points in the evolution of the international economy. A particular emphasis is placed on the relationship between historical evidence and the theoretical frameworks available for its interpretation. Each period is illustrated by a selection of short case studies from a variety of industry sectors, including the Levant Company, Nestlé, Singer, Saint Gobain and NEC. An essential textbook for courses in business and economic history, this book will also be a valuable resource for scholars and students of international business more generally.

The Political Economy of Africa - Vishnu Padayachee 2010-06-10

The Political Economy of Africa addresses the real possibilities for African development in the coming decades when seen in the light of the continent's economic performance over the last half-century. This involves an effort to emancipate our thinking from the grip of western economic models that have often ignored Africa's diversity in their rush to peddle simple nostrums of dubious merit. The book addresses the seemingly intractable economic problems of the African continent, and traces their origins. It also brings out the instances of successful economic change, and the possibilities for economic revival and renewal. As well as surveying the variety of contemporary situations, the text will provide readers with a firm grasp of the historical background to the topic. It explores issues such as: employment and poverty social policy and security structural adjustment programs and neo-liberal globalization majority rule and democratization taxation and resource mobilization. It contains a selection of country specific case studies from a range of international contributors, many of whom have lived and worked in Africa. The book will be of particular interest to higher level students in political economy, development studies, area studies (Africa) and economics in general.

The New Politics of Regionalism - Ulf Engel

2016-10-04

This edited volume approaches regionalism as one potential pattern in a changing global order. Since the end of the Cold War, different forms of territorialization have emerged and we are confronted with an increasing number and variety of actors that are establishing regional projects. This volume offers an innovative contribution to the study of this new complexity by exploring constellations of regional actors, spatial scales and imaginations beyond state-centred perspectives as well as on multiple, often overlapping levels. The chapters analyse the emergence, trajectories and outcomes of regionalisms from the perspective of the Global South, specifically concentrating on regional projects in Latin America and Africa, but also in the Asia-Pacific. They attempt to identify the specific conditions and junctures of different forms of region-making in their external (global) and internal (local/national) dimensions. The volume also places special emphasis on interactions, spatial entanglements and comparisons between regionalisms in different parts of the world. By expanding beyond the perspective of North-South transfers, this book seeks to better understand the dynamics and diversity of interregional interactions. This volume will appeal to scholars of global studies, international political economy, international relations, human geography, and development studies, as well as area studies specialists who focus on Latin America and Africa.

Reframing the Urban Challenge in Africa -

Ntombini Marrengane 2020-12-03

This book explores the changing dynamics and challenges behind the rapid expanse of Africa's urban population. Africa's urban age is underway. With the world's fastest growing urban population, the continent is rapidly transforming from one that is largely rural, to one that is largely urban. Often facing limited budgets, those tasked with managing African cities require empirical evidence on the nature of demands for infrastructure, escalating environmental hazards, and ever-expanding informal settlements. Drawing on the work of the African Urban Research Initiative, this book brings together contributions from local researchers investigating key themes and challenges within their own contexts. An

important example of urban knowledge co-production, the book demonstrates the regional diversity that can be seen as the main feature of African urbanism, with even well-accepted concepts such as informality manifesting in markedly different ways from place to place. Providing an important nuanced perspective on the heterogeneity of African cities and the challenges they face, this book will be an important resource for researchers across development studies, African studies, and urban studies. The Open Access version of this book, available at

<http://www.taylorfrancis.com/books/e/9781003008385>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license

Theories and Practices of Development -

Katie Willis 2005

Throughout the twentieth century, governments sought to achieve 'development' not only in their own countries, but also in other regions of the world; particularly in Africa, Asia, Latin America and the Caribbean. This focus on 'development' as a goal has continued into the twenty-first century, for example through the United Nations Millennium Development Targets. While development is often viewed as something very positive, it is also very important to consider the possible detrimental effects it may have on the natural environment, different social groups and on the cohesion and stability of societies. In this important book, Katie Willis investigates and places in a historical context, the development theories behind contemporary debates such as globalization and transnationalism. The main definitions of 'development' and 'development theory' are outlined with a description and explanation of how approaches have changed over time. The differing explanations of inequalities in development, both spatially and socially, and the reasoning behind different development policies are also considered. By drawing on pre-twentieth century European development theories and examining current policies in Europe and the USA, the book not only stresses commonalities in development theorizing over time and space, but also the importance of context in theory construction. This topical book provides an ideal introduction to development theories for students in

geography, development studies, area studies, anthropology and sociology. It contains student-friendly features, including boxed case studies with examples, definitions, summary sections, suggestions for further reading, discussion questions and website information.

Mapping Vulnerability - Greg Bankoff

2013-06-17

Raging floods, massive storms and cataclysmic earthquakes: every year up to 340 million people are affected by these and other disasters, which cause loss of life and damage to personal property, agriculture, and infrastructure. So what can be done? The key to understanding the causes of disasters and mitigating their impacts is the concept of 'vulnerability'. Mapping Vulnerability analyses 'vulnerability' as a concept central to the way we understand disasters and their magnitude and impact. Written and edited by a distinguished group of disaster scholars and practitioners, this book is a counterbalance to those technocratic approaches that limit themselves to simply looking at disasters as natural phenomena. Through the notion of vulnerability, the authors stress the importance of social processes and human-environmental interactions as causal agents in the making of disasters. They critically examine what renders communities unsafe - a condition, they argue, that depends primarily on the relative position of advantage or disadvantage that a particular group occupies within a society's social order. The book also looks at vulnerability in terms of its relationship to development and its impact on policy and people's lives, through consideration of selected case studies drawn from Africa, Asia and Latin America. Mapping Vulnerability is essential reading for academics, students, policymakers and practitioners in disaster studies, geography, development studies, economics, environmental studies and sociology.

EBOOK: Sexual Health: A Public Health Perspective - Kaye Wellings 2012-10-16

This timely book introduces social aspects of the study of sexual health and their application to public health practice. The book addresses five key themes: Conceptual and theoretical aspects of sexual health, Sexual health outcomes of Risk and Vulnerability, Improving sexual health status and Measuring and assessing sexual

health status. The authors consider each of these themes within their cultural and historical context and illustrate topics with international examples and case studies. Key features of the book include: A spotlight on populations rather than individuals, and a focus on the prevention of ill health and promotion of well being. A global perspective; the book makes the distinction between developing and developed countries, but recognises that inequalities are to be found within as well as between countries. A view of sexual behaviour as socially learned rather than biologically given and so as amenable to change and intervention to improve sexual health status. An emphasis on ways in which risk and vulnerability are products, not only of individual behaviours, but of the social context in which they are practiced. Written by authors with a wide range of experience, this book will be a valuable resource for public health practitioners and those studying and working in the area of sexual health.

Understanding Public Health is an innovative series published by Open University Press in collaboration with the London School of Hygiene & Tropical Medicine. Series Editors: Ros Plowman and Nicki Thorogood Contributors: Sevgi O Aral, Chris Bonell, Helen Burchett, Joanna Busza, Martine Collumbien, Simon Forrest, Rebecca French, Claudia Garcia-Moreno, Anna Glasier, Jami Leichter, Kirstin Mitchell, Will Nutland, Thomas Peterman, Elisabeth Pisani, Kaye Wellings, Meg Wiggins and Maria Zuurmond.

Inclusive Organizational Transformation - Rica Viljoen 2016-05-23

Globalization, consumerism, legislation and human rights issues impact on workplace demographics, changing the very nature thereof. It is of strategic importance to ensure that the benefits of diverse viewpoints and stakeholders are leveraged. However the underlying worldviews of economists, business leaders and consultants are often informed from a Western paradigm and solutions proposed and interventions facilitated are not integrated, integral, systemic or congruent with the containing environment or ecology. In *Inclusive Organizational Transformation*, Dr Rica Viljoen acknowledges that diversity of thought presents both gifts and challenges to leadership in multi-

national organizations. The existential question with which an individual is confronted impacts on his or her worldview. By continuously applying a specific worldview, certain gifts manifest. These are called Human Niches. Here, Inclusivity is positioned as a radical transformational methodology with the purpose of unleashing the benefits of engagement and diversity of thought. The process of Inclusivity enables organizations to optimize the gifts of and contributions from a diverse workforce and unleash tacit knowledge. Case studies from Ghana, South Africa, and one where the same strategy had to be implemented in Australia, Peru and Tanzania are included and insights gained from the dynamics observed are shared. A synthesis of Inclusivity is presented in a model, meta-insights are derived and the prerequisites for Inclusivity on individual, group and organizational domain are illustrated.

Diversity in the Workforce - Marilyn Y. Byrd
2014-01-23

Diversity in the Workforce is a comprehensive, integrated teaching resource providing students with the tools and methodologies they need to negotiate effectively the multicultural workplace, and to counter issues of discrimination and privilege. Written from an American perspective, the book not only covers the traditional topics of race, gender, ethnicity and social class, but moves beyond this to explore emerging trends around 'isms' (racism, sexism), as well as transgender issues, spirituality, intergenerational workforce tensions, cross-cultural teams, physical appearance stigmatizing, visible and invisible disabilities, and racial harassment. The book: Presents theoretical models to help students think critically about the issues that emerge from workforce diversity Includes a historical perspective that explains the roots of the issues in the workplace today Covers potential legal and ethical issues Introduces a social justice paradigm to encourage social action Illustrates strategies organizations are using to leverage diversity effectively With end of chapter questions encouraging students to engage in difficult conversations, and case studies to stimulate students' awareness of the real problems and issues that emerge from diversity, this book will help students develop the critical,

analytical, problem solving and decision making skills they need to mediate or resolve diversity issues as future professionals.

Non-Governmental Organizations and Development - David Lewis 2009-09-10

Non-governmental organizations (NGOs) are high profile actors in the field of international development, both as providers of services to vulnerable individuals and communities and as campaigning policy advocates. This book provides a critical introduction to the wide-ranging topic of NGOs and development. Written by two authors with more than twenty years experience of research and practice in the field, the book combines a critical overview of the main research literature with a set of up-to-date theoretical and practical insights drawn from experience in Asia, Europe, Africa and elsewhere. It highlights the importance of NGOs in development, but it also engages fully with the criticisms that the increased profile of NGOs in development now attracts. Non-Governmental Organizations and Development begins with a discussion of the wide diversity of NGOs and their roles, and locates their recent rise to prominence within broader histories of struggle as well as within the ideological context of neo-liberalism. It then moves on to analyze how interest in NGOs has both reflected and informed wider theoretical trends and debates within development studies, before analyzing NGOs and their practices, using a broad range of short case studies of successful and unsuccessful interventions. David Lewis and Nazneen Kanji then moves on to describe the ways in which NGOs are increasingly important in relation to ideas and debates about 'civil society', globalization and the changing ideas and practices of international aid. The book argues that NGOs are now central to development theory and practice and are likely to remain important actors in development in the years to come. In order to appreciate the issues raised by their increasing diversity and complexity, the authors conclude that it is necessary to deploy a historically and theoretically informed perspective. This critical overview will be useful to students of development studies at undergraduate and masters levels, as well as to more general readers and practitioners. The format of the

book includes figures, photographs and case studies as well as reader material in the form of summary points and questions. Despite the growing importance of the topic, no single short, up-to-date book exists that sets out the main issues in the form of a clearly written, academically-informed text: until now.

Africa - Tony Binns 2012

This text introduces and de-mystifies Africa's diversity and dynamism, and considers how its peoples and environments have interacted through time and space. The book explores the background and diversity of Africa's social, cultural, economic, political and environmental systems.

Routledge Handbook of International Human Rights Law - Scott Sheeran 2014-08-07

The Routledge Handbook of International Human Rights Law provides the definitive global survey of the discipline of international human rights law. Each chapter is written by a leading expert and provides a contemporary overview of a significant area within the field. As well as covering topics integral to the theory and practice of international human rights law the volume offers a broader perspective through examinations of the ways in which human rights law interacts with other legal regimes and other international institutions, and by addressing the current and future challenges facing human rights. Providing up-to-date and authoritative articles covering key aspects of international human rights law, this book work is an essential work of reference for scholars, practitioners and students alike. Chapter 35 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license.

Diversity in America - Vincent N. Parrillo 2015-12-03

The updated and expanded fourth edition of *Diversity in America* addresses key controversial topics generating debate in US society today. The book answers these and many other questions by using history and sociology to shed light on socially constructed myths. Vincent N. Parrillo takes the reader through different American eras, beginning with the indigenous populations and continuing through colonial

times, the industrial age, the information age and today. The book uses intergenerational comparisons and extrapolation of present trends into future probabilities to offer the reader a holistic analytic commentary to provide additional helpful insights and understanding.

Routledge Companion to Christianity in Africa - Elias Kifon Bongmba 2015-12-22

The Routledge Companion to Christianity in Africa offers a multi-disciplinary analysis of the Christian tradition across the African continent and throughout a long historical span. The volume offers historical and thematic essays tracing the introduction of Christianity in Africa, as well as its growth, developments, and effects, including the lived experience of African Christians. Individual chapters address the themes of Christianity and gender, the development of African-initiated churches, the growth of Pentecostalism, and the influence of Christianity on issues of sexuality, music, and public health. This comprehensive volume will serve as a valuable overview and reference work for students and researchers worldwide.

Inclusive Leadership - Bernardo M. Ferdman 2020-09-22

In a time of increasing divisiveness in politics and society there is a desperate need for leaders to bring people together and leverage the power of diversity and inclusion. *Inclusive Leadership: Transforming Diverse Lives, Workplaces, and Societies* provides leaders with guidance and hands-on strategies for fostering inclusion and explains how and why it matters. *Inclusive Leadership* explores cutting-edge theory, research, practice, and experience on the pivotal role of leadership in promoting inclusion in diverse teams, organizations, and societies. Chapters are authored by leading scholars and practitioners in the fields of leadership, diversity, and inclusion. The book is solidly grounded in research on inclusive leadership development, diversity management, team effectiveness, organization development, and intergroup relations. Alongside the exhaustive scholarship are practical suggestions for making teams, groups, organizations, and the larger society more inclusive and, ultimately, more productive. Leaders and managers at all levels, HR professionals, and members of diverse teams will find *Inclusive Leadership* invaluable in

becoming more effective at cultivating inclusive climates and realizing its many benefits—including innovation, enhanced team

and organizational performance, and social justice. For more, visit: <https://inclusiveleader.com>
