Dear Ally, How Do You Write a Book? - Ally Carter
2019-03-26

From bestselling author Ally Carter, the definitive guide to writing a novel for the NaNoRiMo generation, including helpful tips from other YA stars. Have you always wanted to write a book, but don't know where to start? Or maybe you're really great at

writing the first few chapters . . . but you never quite make it to the end? Or do you finally have a finished manuscript, but you're not sure what to do next? Fear not -- if you have writing-related questions, this book has answers! Whether you're writing for fun or to build a career, bestselling author Ally Carter is ready to help you make your work shine. With honesty, encouragement, and humor, Ally's ready here to answer the questions that writers struggle with the most. Filled with practical tips and helpful advice, Dear Ally is a treasure

for aspiring writers at any stage of their careers. It offers a behind-the-scenes look at how books get made, from idea to publication, and gives you insight into the writing processes of some of the biggest and most talented YA authors writing today.

Modern Business Statistics with Microsoft Excel - David

R. Anderson 2014-01-01
MODERN BUSINESS STATISTICS, 5E allows students to gain a strong conceptual understanding of statistics with a balance of real-world applications and a focus on the integrated strengths of Microsoft Excel 2013. To ensure student understanding, this best-selling, comprehensive text carefully discusses and clearly develops each statistical technique in a solid application setting. Microsoft Excel 2013 instruction, which is integrated in each chapter, plays an integral part in strengthening this edition's applications orientation. Immediately after each easy-to-follow presentation of a statistical

procedure, a subsection discusses how to use Excel to perform the procedure. This integrated approach emphasizes the applications of Excel while focusing on the statistical methodology. Step-by-step instructions and screen captures further clarify student learning. A wealth of timely business examples, proven methods, and additional exercises throughout this edition demonstrate how statistical results provide insights into business decisions and present solutions to contemporary business problems. High-quality problems noted for their unwavering accuracy and the authors' signature problem-scenario approach clearly show how to apply statistical methods to practical business situations. New case problems and self-tests allow students to challenge their personal understanding. Pocket Genius Bugs - DK

2016-01-19

Whether it's the industrious ant, the breathtaking Monarch butterfly, or the multi-legged centipede, children will discover the fastest, strongest, and most harmful species in DK's Pocket Genius: Bugs. Profiling more than 200 insects and bugs, from beetles and butterflies to spiders and scorpions, find out what bugs eat, which are poisonous, which live the longest, and which can be found in your own backyard. Plus, learn about the products we get from bugs, such as honey, ink, silk, and jewelry, and how bugs and insects play important roles in our world. Catalog entries include facts provide at-a-glance information, while locator icons offer immediately recognizable references to aid navigation and understanding, and fact files round off the book with fun facts such as record breakers and timelines. Each mini-encyclopedia is filled with facts on subjects ranging

from animals to history, cars to dogs, and Earth to space and combines a child-friendly layout with engaging photography and bite-size chunks of text that will encourage and inform even the most reluctant readers.

Mood Mapping - Liz Miller

2010-03-05

Mood mapping simply involves plotting how you feel against your energy levels, to determine your current mood. Dr Liz Miller then gives you the tools you need to lift your low mood, so improving your mental health and wellbeing. Dr Miller developed this technique as a result of her own diagnosis of bipolar disorder (manic depression), and of overcoming it, leading her to seek ways to improve the mental health of others. This innovative book illustrates: * The Five Keys to Moods: learn to identify the physical or emotional factors that affect your moods * The Miller Mood Map: learn to visually map your mood to

increase self-awareness *
Practical ways to implement
change to alleviate low mood
Mood mapping is an essential
life skill; by giving an
innovative perspective to your
life, it enables you to be
happier, calmer and to bring
positivity to your own life and
to those around you. 'A
gloriously accessible read from
a truly unique voice' Mary
O'Hara, Guardian 'It's great to
have such accessible and
positive advice about our
moods, which, after all, govern
everything we do. I love the
idea of MoodMapping' Dr Phil
Hammond 'Can help you find
calm and take the edge off your
anxieties' Evening Standard
'MoodMapping is a fantastic
tool for managing your mental
health and taking control of
your life' Jonathan Naess,
Founder of Stand to Reason

**Radio Frequency and
Microwave Electronics
Illustrated** - Matthew M.
Radmanesh 2001

Foreword by Dr. Asad Madni,
C. Eng., Fellow IEEE, Fellow
IEE Learn the fundamentals of
RF and microwave electronics
visually, using many thoroughly
tested, practical examples RF
and microwave technology are
essential throughout industry
and to a world of new
applications-in wireless
communications, in Direct
Broadcast TV, in Global
Positioning System (GPS), in
healthcare, medical and many
other sciences. Whether you're
seeking to strengthen your
skills or enter the field for the
first time, Radio Frequency and
Microwave Electronics

Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable

considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave

Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. About the Web Site The accompanying web site has an "E-Book" containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for a new design.

Introduction to Radar Using Python and MATLAB - Lee Andrew (Andy) Harrison 2019-10-31

This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems. It provides information about how to produce synthetic aperture (SAR) images by giving a tomographic formulation and

implementation for SAR imaging. Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are covered, along with waveform selection analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Users have full access to both the Python and MATLAB source code to modify for their application. With examples using the tool suite are given at the end of each

chapter, this text gives readers a clear understanding of how important target scattering is in areas of target detection, target tracking, pulse integration, and target discrimination.

Fred the Clown - Roger Langridge 2004-11-10

The signature creation of cartoonist Roger Langridge, Fred the Clown is the thinking man's idiot. Fred has an eye for the ladies, as well as several other organs, but the only part of themselves they're willing to share with him is a carefully placed kneecap. Fred the Clown's misadventures are a curious balance of bleakness and joyful absurdism; the universe may dump on Fred from a great height, but he never gives up. More often than not, they involve the pursuit of a lady—any lady will do, it seems, but bearded ladies are at the top of the list. Disappointment seems inevitable, and it usually is; yet, almost despite himself, Langridge will occasionally give Fred a happy ending out of nowhere... p.p1 {margin:
