**The Shriver Report** - Maria Shriver 2014-01-11  
Facts, figures, and essays on women and poverty by Barbara Ehrenreich, Kirsten Gillibrand, LeBron James, and other high-profile contributors. Fifty years after President Lyndon B. Johnson called for a War on Poverty and enlisted Sargent Shriver to oversee it, the most important social issue of our day is once again the dire economic straits of millions of Americans. One in three live in poverty or teeter on the brink—and seventy million are women and the children who depend on them. The fragile economic status of millions of American women is the shameful secret of the modern era—yet these women are also our greatest hope for change, and our nation’s greatest undervalued asset. **The Shriver Report: A Woman’s Nation Pushes Back from the Brink** asks—and answers—big questions. Why are millions of women financially vulnerable when others have made such great progress? Why are millions of women struggling to make ends meet even though they are hard at work? What is it about our nation—government, business, family, and even women themselves—that drives women to the financial brink? And what is at stake? To forge a path forward, this book brings together a power-packed roster of big thinkers and talented contributors, in a volume that combines academic research, personal reflections, authentic photojournalism, groundbreaking poll results, and insights from frontline workers; political, religious, and business leaders; and major celebrities—all focused on a single issue

of national importance: women and the economy. “A startling wake-up call for policymakers and anyone hoping to survive a culture that siphons wealth upward to a very powerful few.” —Booklist Contributors include: Carol Gilligan, PhD \* Barbara Ehrenreich \* Beyoncé Knowles-Carter \* LeBron James \* Anne-Marie Slaughter \* Kirsten Gillibrand \* Hillary Rodham Clinton \* Tory Burch \* Sister Joan Chittister \* Arne Duncan \* Kathleen Sibelius \* Howard Schultz \* and more!

Communities in Action - National Academies of

Sciences, Engineering, and Medicine 2017-04-27  
In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.
