The Laws of Human Nature - Robert Greene
2019-10-01

From the #1 New York Times-bestselling author of *The 48 Laws of Power* comes the definitive new book on decoding the behavior of the people around you. Robert Greene is a master guide for millions of readers, distilling ancient wisdom and philosophy into essential texts for seekers of power, understanding and mastery. Now he turns to the most important subject of all - understanding people's drives and motivations, even when they are unconscious of them themselves. We are social animals. Our very lives depend on our relationships with people. Knowing why people do what they do is the most important tool we can possess, without which our other talents can only take us so far.

Drawing from the ideas and examples of Pericles, Queen Elizabeth I, Martin Luther King Jr, and many others, Greene teaches us how to detach ourselves from our own emotions and master self-control, how to develop the empathy that leads to insight, how to look behind people's masks, and how to resist conformity to develop your singular sense of purpose. Whether at work, in relationships, or in shaping the world around you, *The Laws of Human Nature* offers brilliant tactics for success, self-improvement, and self-defense.

_____ (From the
Playboy interview with Jay-Z, April 2003)

PLAYBOY: Rap careers are usually over fast: one or two hits, then styles change and a new guy

comes along. Why have you endured while other rappers haven't? JAY-Z: I would say that it's from still being able to relate to people. It's natural to lose yourself when you have success, to start surrounding yourself with fake people. In *The 48 Laws of Power*, it says the worst thing you can do is build a fortress around yourself. I still got the people who grew up with me, my cousin and my childhood friends. This guy right here (gestures to the studio manager), he's my friend, and he told me that one of my records, Volume Three, was wack. People set higher standards for me, and I love it.

[The Second Self, Twentieth Anniversary Edition](#) - Sherry Turkle 2005-09-30

A new edition of the classic primer in the psychology of computation, with a new introduction, a new epilogue, and extensive notes added to the original text. In *The Second Self*, Sherry Turkle looks at the computer not as a "tool," but as part of our social and psychological lives; she looks beyond how we use computer games and spreadsheets to explore how the computer affects our awareness of ourselves, of one another, and of our relationship with the world. "Technology," she writes, "catalyzes changes not only in what we do but in how we think." First published in 1984, *The Second Self* is still essential reading as a primer in the psychology of computation. This

twentieth anniversary edition allows us to reconsider two decades of computer culture—to (re)experience what was and is most novel in our new media culture and to view our own contemporary relationship with technology with fresh eyes. Turkle frames this classic work with a new introduction, a new epilogue, and extensive notes added to the original text. Turkle talks to children, college students, engineers, AI scientists, hackers, and personal computer owners—people confronting machines that seem to think and at the same time suggest a new way for us to think—about human thought, emotion, memory, and understanding. Her interviews reveal that we experience computers as being on the border between inanimate and animate, as both an extension of the self and part of the external world. Their special place betwixt and between traditional categories is part of what makes them compelling and evocative. (In the introduction to this edition, Turkle quotes a PDA user as saying, "When my Palm crashed, it was

like a death. I thought I had lost my mind.") Why we think of the workings of a machine in psychological terms—how this happens, and what it means for all of us—is the ever more timely subject of *The Second Self*.

Human Spirits: A Cultural Account of Trance in Mayotte - Michael Lambek 1981-11-30

Based on intensive ethnographic fieldwork, this book describes and interprets trance behaviour among the Malagasy speakers of Mayotte, a small island in the Comoro Archipelago in the Indian Ocean, off the coast of East Africa. Professor Lambek describes how the people of Mayotte (most often women) enter into trances, during which they believe their bodies are inhabited by spirits. He then analyses the conventions for behaviour in trance and the

process by which the individuals come to terms with the spirits in their midst. The book presents thorough case studies of spirit possession over time, providing one of the most detailed accounts of possession phenomena available for a single society. The author argues that trance can best be understood as a social activity within a defined system of cultural meaning rather than as a psychological problem, a simple deception or a means of manipulating others. This book should be of particular interest to those concerned with the study of ritual, symbols and non-Western religious systems.

The Adventures of Flash Jackson - William Kowalski 2009-06-02

Haley Bombauer, aka Flash Jackson, confronts the summer of her seventeenth year with

glorious anticipation. She envisions herself roaming the hillsides and forests on her beloved horse, venturing farther and farther away from her sleepy hometown and her overprotective mother. But when Haley falls through the rotted roof of the barn, she is destined to spend the summer in a thigh-high cast, stuck at home with her mother, enduring visits from her spooky grandmother, and pondering the error of her impulsive ways. The year that follows will, in fact, transform not only her life but also the lives of those around her. Set in Mannville, New York, William Kowalski's signature town, here is the story of one young woman's emergence into a world that, in her words, "was not designed with girls in mind" and her efforts to find a way to fit in without giving up her independence.
