"Imitation" is a selection from Adichie's collection *The Thing Around Your Neck*. An eBook short.

Castle Valley America - Nancy Taniguchi 2004-09

This is American history told through the stories of an atypical, for Utah, region. Castle Valley is roughly conterminous with two counties, Carbon and Emery, which together formed a rural, industrial enclave in a mostly desert environment behind the mountain range that borders Utah's principal corridor of settlement. In Castle Valley, coal mining and the railroad attracted diverse, multiethnic communities and a fair share of historic characters, from Butch Cassidy, who stole its largest payroll, to Mother Jones, who helped organize its workers against its mining companies. Among the last major segments of the state to be settled, it

was also a generally poor region that stretched the capabilities of people to scratch a living from a harsh landscape. The people of Castle Valley experienced complex, unusual combinations of both social cohesion and conflict, but they struggled through poverty, labor disputes, major mining disasters, and other challenges to build communities whose stories reflected the historical course of the nation as a whole. In order to convey her subject's both unique and representative qualities, Nancy Taniguchi has written an epic history that is not just local history, but American history written locally. Nancy J. Taniguchi, who lived for thirteen years in Castle Valley and was previously on the faculty of the College of Eastern Utah in Price, is professor of history at California State University, Stanislaus. She is the author of numerous published articles in mining, legal, women's, western, and Utah history and of one book, *Necessary Fraud: Progressive Reform and Utah Coal*.

Echoes in the Halls - Gordon McIntosh 1999-11

From the research labs at the University to remote lakes in Alberta and the Northwest Territories, *Echoes in the Halls* tells us the stories about the antics, the hijinks and the adventures of professors at the University of Alberta. A must-read for history buffs and University Alumni. "With so many wonderful memories, of people, events and achievements over the years, it's no wonder that the University of Alberta Drama Department

holds such a large place in my heart. And it's no wonder that I still come back for opening night." - Frank Bueckert "No matter what the setting, however, I always found it immensely satisfying to teach undergraduates. It was fun. It was hard work. And there was always something further to come." - Ralph Nursall

The Autobiography of Malcolm X - Malcolm X 2015-11-26

The *Autobiography of Malcolm X* was intended to be a true autobiography, with the name of Alex Haley appearing not at all or as a ghost writer or as a mere contributor or assistant. However, with the assassination of Malcolm X having occurred in Harlem in New York City on February 21, 1965 just before this book could be published, it became necessary to reveal the important role of Alex Haley in creating this book.

[The Silent Brotherhood](#) - Kevin Flynn 2018-07-14

A chilling inside story of America's racist underground—the most heinous domestic terror group in our nation's history. Two courageous investigative journalists deliver an insider's account of the "silent brotherhood"—the most dangerous radical-right hate group to surface since the Ku Klux Klan. They claim to be patriots, as American as apple pie, but they are this nation's deadly brotherhood—hate groups that package their alienation against the federal government under such names as the Aryan Nation, the Order, and other white supremacist militias. The group attracts seemingly average citizens with their call for pride in race, family, and religion and their mission to save white Christian America. They spout anti-black, anti-Semitic, neo-Nazi rhetoric, and their grievances have festered into full-blown paranoia and a call for an all-out race war. The *Silent Brotherhood* reveals in terrifying detail how the group became criminals and assassins in their effort to establish an Aryan homeland.

The Ancients and the Postmoderns - Fredric Jameson 2015-05-19

Fredric Jameson sweeps from the Renaissance to The Wire High

modernism is now as far from us as antiquity was for the Renaissance. Such is the premise of Fredric Jameson's major new work in which modernist works, this time in painting (Rubens) and music (Wagner and Mahler), are pitted against late-modernist ones (in film) as well as a variety of postmodern experiments (from SF to The Wire, from "Eurotrash" in opera to Altman and East German literature): all of which attempt, in their different ways, to invent new forms to grasp a specific social totality. Throughout the historical periods, argues Jameson, the question of narrative persists through its multiple formal changes and metamorphoses.

Useful Delusions: The Power and Paradox of the Self-Deceiving Brain - Shankar Vedantam 2021-03-02

From the New York Times best-selling author and host of Hidden Brain comes a thought-provoking look at the role of self-deception in human flourishing. Self-deception does terrible harm to us, to our communities, and to the planet. But if it is so bad for us, why is it ubiquitous? In Useful Delusions, Shankar Vedantam and Bill Mesler argue that, paradoxically, self-deception can also play a vital role in our success and well-being. The lies we tell ourselves sustain our daily interactions with friends, lovers, and coworkers. They can explain why some people live longer than others, why some couples remain in love and others don't, why some nations hold together while others splinter. Filled with powerful personal stories and drawing on new insights in psychology, neuroscience, and philosophy, Useful Delusions offers a fascinating tour of what it really means to be human.

A Carpenter's Life as Told by Houses - Larry Haun 2011

From one of "Fine Homebuilding's" best-loved authors, Larry Haun, comes a unique story that looks at American home building from the perspective of twelve houses he has known intimately. Part memoir, part cultural history, "A Carpenter's Life as Told by Houses" takes the reader house by house over an arc of 100 years. Along with period photos, the author shows us the sod house in Nebraska where his mother was born, the frame house of his childhood, the production houses he built in the San Fernando Valley, and the Habitat for Humanity homes he devotes his time to now. It's an engaging read written by a veteran builder with a thoughtful awareness of what was intrinsic to home building in the past and the many ways it has evolved. Builders and history lovers will appreciate his deep connection to the natural world, yearning for simplicity, respect for humanity, and evocative notion of what we mean by "home."

The Deeper the Roots - Michael Tubbs 2021-11-16

"Insightful, emotional, and enraging. By sharing his story in gripping detail, Michael Tubbs embodies an old feminist tradition whereby the personal is political. He empowers us to fight for equal opportunities for our communities, and encourages us to amass the courage to overcome loss and injustice." —Ibram X. Kendi, National Book Award-winning author of *Stamped from the Beginning* and *How to Be an Antiracist* The making of a visionary political leader—and a blueprint for a more equitable country "Don't tell nobody our business," Michael Tubbs's mother often told him growing up. For Michael, that meant a lot of things: don't tell anyone about the day-to-day struggle of being Black and broke in Stockton, CA. Don't tell anyone the pain of having a father

incarcerated for 25 years to life. Don't tell anyone about living two lives, the brainy bookworm and the kid with the newest Jordans. And also don't tell anyone about the particular joys of growing up with three "moms"—a Nana who never let him miss church, an Auntie who'd take him to the library any time, and a mother, "She-Daddy", who schooled him in the wisdom of hip-hop and taught him never to take no for an answer. So for a long time Michael didn't tell anyone his story, but as he went on to a scholarship at Stanford and an internship in the Obama White House, he began to realize the power of his experience, the need for his perspective in the halls of power. By the time he returned to Stockton to become, in 2016 at age 26, its first Black mayor and the youngest-ever mayor of a major American city, he knew his story meant something. The Deeper the Roots is a memoir astonishing in its candor, voice, and clarity of vision. Tubbs shares with us the city that raised him, his family of badass women, his life-changing encounters with Oprah Winfrey and Barack Obama, the challenges of governing in the 21st century and everything in between—en route to unveiling his compelling vision for America rooted in his experiences in his hometown.

Twelve Years a Slave - Solomon Northup 2021-01-01

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Who's Irish? - Gish Jen 2012-08-29

The stories in *Who's Irish?* show us the children of immigrants looking wonderingly at their parents' efforts to assimilate, while the older generation asks how so much selfless hard work on their part can have yielded them offspring who'd sooner drop out of life than succeed at it. With dazzling wit and compassion, Gish Jen—author of the acclaimed novels *Typical American* and *Mona in the Promised Land*—looks at ambition and compromise at century's end and finds that much of the action is as familiar—and as strange—as the things we know to be most deeply true about ourselves.

The Thing Around Your Neck - Chimamanda Ngozi Adichie 2010-06-01

These twelve dazzling stories from Chimamanda Ngozi Adichie — the Orange Broadband Prize-winning author of *Half of a Yellow Sun* — are her most intimate works to date. In these stories Adichie turns her penetrating eye to the ties that bind men and women, parents and children, Nigeria and the United States. In "A Private Experience," a medical student hides from a violent riot with a poor Muslim woman, and the young mother at the centre of "Imitation" finds her comfortable life in Philadelphia threatened when she learns that her husband has moved his mistress into their Lagos home. Searing and profound, suffused with beauty, sorrow and longing, this collection is a resounding confirmation of Adichie's prodigious literary powers.

Covering such key areas as risk theory, risk calculation, scenario modeling, and communicating risk within the organization, *Measuring and Managing*

Information Risk helps managers make better business decisions by understanding their organizational risk. Uses factor analysis of information risk (FAIR) as a methodology for measuring and managing risk in any organization. Carefully balances theory with practical applicability and relevant stories of successful implementation. Includes examples from a wide variety of businesses and situations presented in an accessible writing style.

Bad - James Edward Carr 2002-10-01

THE prison autobiography from the man who never stopped fighting.

Marie Antoinette's Watch - John Biggs 2015-04-15

"Marie Antoinette's Watch is a wonderful book." - William Gibson, author of *Neuromancer*. Across continents and into and out of the hands of royalty, revolutionaries, smugglers, thieves, and the world's greatest tech engineers, was Marie Antoinette's watch, the "160," worth an estimated \$40 million in today's dollars. Perhaps the most sought after personal technology device of the last 200 years, the timepiece, designed by the legendary Abraham-Louis Breguet, is the launching point for a thrilling and fluidly woven set of narratives that are, in part, forbidden love story, historical document, and police procedural. Marie Antoinette's Watch also deftly lays out the history of horology and the 18th Century engineering feats attained in Paris's answer to Silicon Valley, the Ile de la Cite, that made the watch the most intricate and prized personal device of its time - something that's come full circle today. In the hands of Techcrunch's East Coast Editor, John Biggs, Marie Antoinette's Watch is by turns edifying and lurid, historical and utterly modern. Culminating in a heist in a Tel Aviv antiquities museum in the 1980s, Biggs tells the story of how one object can transform countries, cultures, high technology, and time itself."

YouTube Channel - Virginia Loh-Hagan 2017-01-01

a lower level of complexity with clear visuals to help struggling readers along. A table of contents, glossary with simplified pronunciations, and index all enhance achievement and comprehension.

Looters and Grabbers - Joe Khamisi 2018

The Art of Invention - Steven J. Paley 2011-03

The lowly paperclip attracts little attention in our world of advanced gadgets and increasingly sophisticated technology. But to veteran inventor and design engineer Steven J. Paley, it is a prime example of the qualities that often characterize a great invention-simplicity, elegance, and robustness-and it provided a lasting solution to a common problem. In this entertaining and insightful exploration of the process of invention, Paley shows why these same three qualities are essential not only to the success of simple devices, but equally to complex inventions from computer chips to nuclear power plants. Whether you're an aspiring inventor or an experienced designer, Paley's expertise, personal examples, and case studies offer detailed guidance on conceptualizing your ideas and turning them into reality. Paley begins by exploring the essential aspects of creative thinking, from identifying a problem or need, which is often hidden in plain sight, to finding an inspired solution. He shows how ideas can come from a variety of sources such as the natural world, basic physical principles, life experience, or even chance observations. He examines how intuition and the harnessing of subconscious information are key ingredients for the inventive process. Next, Paley focuses on the three fundamental themes of simplicity, elegance, and robustness. He vividly and persuasively illustrates through many examples how great inventions embody these crucial characteristics. The author concludes with an in-depth look at the business of invention and the typical inventor's toolkit. He addresses the real-world challenges of turning a good idea into a practical, marketable application, including patents, marketing, and entrepreneurship. He is candid about the realities of hard work and the need to learn from the inevitable mistakes along the way. Full of insights and practical guidance from a successful inventor and entrepreneur, *The Art of Invention* will

open new avenues of creativity for budding and accomplished inventors alike. Steven J. Paley (Paramus, NJ) holds nine US patents and numerous international patents. He is the founder of Arise Technologies, Inc., which teaches robotics and engineering to special needs and gifted children. From 1985 to 2001, he was the CEO and Chief Technical Officer of the Texwipe Company, which manufactured and sold specialized consumable products for the control of microcontamination in semiconductor fabrication, disk drive manufacture, biotechnology, and aerospace.
