Nitrogen in Agriculture - Takuji Ohyama 2021-09-29

Nitrogen is the most important nutrient in agricultural practice because the availability of nitrogen from the soil is generally not enough to support crop yields. To maintain soil fertility, the application of organic matters and crop rotation have been practiced. Farmers can use convenient chemical nitrogen fertilizers to obtain high crop yields. However, the inappropriate use of nitrogen fertilizers causes environmental problems such as nitrate leaching, contamination in groundwater, and the emission of N₂O gas. This book is divided into the following four sections: "Ecology and Environmental Aspects of Nitrogen in Agriculture", "Nitrogen Fertilizers and Nitrogen Management in Agriculture", "N Utilization and Metabolism in Crops", "Plant-Microbe Interactions".

New Perspectives on the Cultural Revolution - William A. Joseph 1991

Since the Cultural Revolution, data have been uncovered to illuminate that tumultuous decade. In this volume 13 scholars examine the gap between the ideology of the Revolution and the harsh and contradictory reality of its outcome. They focus particularly on the violence, coercion, and constant tension between the need for centralization to enforce policies and the need for decentralizing decision-making if those goals were to be achieved.

Every Cradle Is a Grave - Sarah Perry 2014-11-21

Millions of years ago, humans just happened. Accidents of environment and genetics contributed to the emergence of sentient beings like us. Today, however, people no longer "just happen"; they are created by the voluntary acts of other people. This book examines several questions about the ethics of human existence. Is it a good thing, for humans, that humans "happened"? Is it ethical to keep making new humans, now that reproduction is under our control? And given that a person exists (through no fault or choice of his own), is it immoral or irrational for him to refuse to live out his natural lifespan? Sarah Perry answers these questions in the negative--not out of misanthropy, but out of empathy for human suffering and respect for human autonomy. "Every Cradle Is a Grave undertakes a difficult task-to write on discomfiting matters from a perspective that is socially unsanctioned. Strange as it may seem to some of us, there are scads of volumes that praise the abuses we endure in our lives. Such works have always been well thumbed, though they are only prayer-books for the purpose of worshiping misery. Sarah Perry is more honest and less perverse on the subject of suffering, treating pain as both a philosophical and a practical problem to which, it is admitted, there is no ultimate solution. Nonetheless, in her view there still remains intelligence and compassion as a means for confronting the insoluble. That is what makes this book as much a necessity as it is a rarity." -- Thomas Ligotti, author of *The Conspiracy against the Human Race* Meaning. Value. Birth. Death. Sanctity. These subjects and others are reexamined through the lens of suicide rights and procreation ethics in Sarah Perry's *Every Cradle Is a Grave*. If you're at all fond of asking the truly Big Questions, this is the read you've been waiting for. Why are we here, and why do we stay? Prepare to have your assumptions dissected and turned on their heads. It's a bumpy ride, but then, so is this little journey we're on as we spin aimlessly around a sun that's destined to burn out, just as surely as each individual life will one day fall back down into the mud from which all life arises. Asking the hard questions is one thing, but hearing answers that might shake us to the core can be something else again. --Jim Crawford, author of *Confessions of an Antinatalist* "In this eminently rational, clear and serious book, Sarah Perry is courageous and strong enough to confront the forbidden truths of human life. *Every Cradle Is a Grave* should be mandatory reading for anyone who plans to have children." -Mikita Brottman, author of *Thirteen Girls*

E-Commerce Strategy - Sanjay Mohapatra 2012-08-16

E-Commerce Strategy: Text and Cases provides the fundamental

literature required for graduate students and practitioners to understand electronic commerce. Each chapter provides clearly designed learning objectives and review questions to highlight the major topics and goals. This book covers many of the new innovations and technologies that have been established for e-commerce site development. Unlike similar books, topics such as e-channel adoption, factors affecting e-commerce adoption, and strategy design are reviewed in greater depth. Additionally, the book examines areas not normally covered like open source, online research, and peer-to-peer systems. E-Commerce Strategy: Text and Cases is divided into two parts. Part 1 examines the evolution of e-commerce, analyzes different sectors such as B2B and m-Commerce, and explores the challenges they face. Case studies of well known companies reinforce the concepts learned to demonstrate both successes and failures in the field. Part 2 deals with developing strategies in e-Commerce and looks at future trends including Web 2.0. Overall, the useful guidelines provided should prove valuable to students and researchers in the field.

The New Evolution Diet - Arthur De Vany 2011-12-20

Believe it or not, our DNA is almost exactly the same as that of our ancestors. While scientific advances in agriculture, medicine, and technology have protected man, to some degree, from dangers such as starvation, illness, and exposure, the fact remains that our cave-dwelling cousins were considerably healthier than we are. Our paleolithic ancestors did not suffer from heart disease, diabetes, high blood pressure, or obesity. In fact, a good deal of what we view as normal aging is a modern condition that is more akin to disease than any natural state of growing older. Our predecessors were incomparably better nourished than we are, and were incredibly physically fit. And certainly none of them ever craved a doughnut, let alone tasted one. In fact, the human preference for sweet tastes and fatty textures was developed in an environment where such treats were rare, and signaled dense, useful energy. This once-helpful adaptation is the downfall of many a dieter today. It's what makes it hard to resist fats and sweets, especially when they are all around us. We are not living as we were built to live. Our genes were forged in an environment where activity was mandatory—you were active or you starved or were eaten. This created strong selective pressure for genes encoding a smart, physically adept individual capable of very high activity levels. Humans are among the most active of species, and we carry energetically expensive brains to boot. Our energy expenditures rank high among all animals. At least they once did. The *New Evolution Diet* by Arthur De Vany, PhD is a roadmap back to the better health our ancestors once enjoyed. By eliminating modern foods, including carbohydrates, dairy, and all processed foods from our diets, we can undo much of the damage caused by our modern food environment. The plan is based on three simple principles: 1. Enjoy the pleasure of food and do not count or restrict calories. Eat three satisfying meals a day filled with non-starchy vegetables, fruits, and high-quality, lean proteins 2. Do not starve yourself, but do go hungry episodically, for brief periods, to promote a low fasting blood insulin level and increase metabolic fat-burning. 3. Exercise less, not more, but with more playfulness and intensity. The goal is to create a strong body with a high resting metabolism and a large physiologic capacity to move through life easily—not to burn calories.

Zoo Renewal - Lisa Uddin 2015-04-01

Why do we feel bad at the zoo? In a fascinating counterhistory of American zoos in the 1960s and 1970s, Lisa Uddin revisits the familiar narrative of zoo reform, from naked cages to more naturalistic enclosures. She argues that reform belongs to the story of cities and feelings toward many of their human inhabitants. In *Zoo Renewal*, Uddin demonstrates how efforts to make the zoo more natural and a haven for particular species reflected white fears about the American city—and, pointedly, how the shame many visitors felt in observing confined animals drew on broader anxieties about race and urban life. Examining the campaign against cages, renovations at the National Zoo in Washington, D.C. and the San Diego Zoo, and the cases of a rare female white Bengal tiger and a collection of southern white rhinoceroses, Uddin unpacks episodes that challenge assumptions that zoos are about other worlds and other creatures and expand the history of U.S. urbanism. Uddin shows how the drive to protect endangered species and to ensure larger, safer zoos was shaped by struggles over urban decay, suburban growth, and the dilemmas of postwar American whiteness. In so doing, *Zoo Renewal* ultimately reveals how feeling bad, or good, at the zoo is connected to our feelings about American cities and their residents.

Reading Zoos - Randy Malamud 1998

Through an examination of modern depictions of zoos, *Reading Zoos* presents a paradigm of how these institutions, and a range of reactions to them, illuminate the workings of our cultural sensibilities. The book explores how the nature of zoos and their significance to cultural consumers is portrayed in over 100 works. It explores what animals' captivity signifies about the people who create, maintain, and patronize zoos; Malamud argues that zoos represent a cultural danger, a deadening of our sensibilities, because the institutions - rather than

fostering an appreciation for animals' attributes - convince spectators that people are the imperial species.

The Persistence of Gender Inequality - Mary Evans 2016-12-20

Despite centuries of campaigning, women still earn less and have less power than men. Equality remains a goal not yet reached. In this incisive account of why this is the case, Mary Evans argues that optimistic narratives of progress and emancipation have served to obscure long-term structural inequalities between women and men, structural inequalities which are not only about gender but also about general social inequality. In widening the lenses on the persistence of gender inequality, Evans shows how in contemporary debates about social inequality gender is often ignored, implicitly side-lining critical aspects of relations between women and men. This engaging short book attempts to join up some of the dots in the ways that we think about both social and gender inequality, and offers a new perspective on a problem that still demands society's full attention.

Mikhail Bakhtin - Mikhail Bakhtin 2019-08-09

Whenever Bakhtin, in his final decade, was queried about writing his memoirs, he shrugged it off. Unlike many of his Symbolist generation, Bakhtin was not fascinated by his own self-image. This reticence to tell his own story was the point of access for Viktor Duvakin, Mayakovsky scholar, fellow academic, and head of an oral history project, who in 1973 taped six interviews with Bakhtin over twelve hours. They remain our primary source of Bakhtin's personal views: on formative moments in his education and exile, his reaction to the Revolution, his impressions of political, intellectual, and theatrical figures during the first two decades of the twentieth century, and his non-conformist opinions on Russian and Soviet poets and musicians. Bakhtin's passion for poetic language and his insights into music also come as a surprise to readers of his essays on the novel. One remarkable thread running through the conversations is Bakhtin's love of poetry, masses of which he knew by heart in several languages. Mikhail Bakhtin: The Duvakin Interviews, 1973, translated and annotated here from the complete transcript of the tapes, offers a fuller, more flexible image of Bakhtin than we could have imagined beneath his now famous texts. Published by Bucknell University Press. Distributed worldwide by Rutgers University Press.

Homosexual No More - William Consiglio 1991

Tranimacies - Eliza Steinbock 2021-05-25

Tranimacies is a neologism that pushes and pulls together transness and animality so as to better germinate unruly, wily, perverse relationships between them, and their spawn. Through tranimacies the book aims at rethinking the linking of liberation struggles amongst former colonized peoples and lands, minoritized genders and sexualities, racially marked persons and non-human animals, and does so in a variety of geopolitical and temporal sites. This rich compendium includes original scholarship and dialogues as well as poetry, comix, bioart, and performance documentation. The composite term of tranimacies enmeshes several everyday and scholarly concepts: transgender, animal, animacy, intimacies. This edited volume's bundle of theoretical and artistic works insists on the beating heart of embodied experiences and political pulses at the core of these concepts. The authors show that tranimacies are spread throughout what Mel Y. Chen describes as the "animacy hierarchies" that delimit zones of possibility and agency, confounding the vertical order with transversal movements. As an intervention into the burgeoning debates within and across trans, animal, critical race, and posthuman studies this publication seeks to destabilize the logic of "turns" in critical theory, and through sticky intimacies uncover how animality, race, and gender underscore the humanist production of meanings. By taking a decolonial approach (in the main, but not exclusively) the authors hope to shift debates in animal studies towards accounting for and delinking from colonial mentalities. Three poems interweave our selection of chapters, which together forge three lines of inquiry defined by a certain ethos: transhistories of the present, lessons from the bestiary, and #animatingephemera. The chapters in this book were originally published as a special issue of *Angelaki*.

Fighting Scholars - Raúl Sánchez García 2014-12-01

'Fighting Scholars' offers the first book-length overview of the ethnographic study of martial arts and combat sports. The book's main claim is that such activities represent privileged grounds to access different social dimensions, such as emotion, violence, pain, gender, ethnicity and religion. In order to explore these dimensions, the concept of 'habitus' is presented prominently as an epistemic remedy for the academic distant gaze of the effaced academic body. The book's most innovative features are its empirical focus and theoretical orientation. While ethnographic research is a widespread and popular approach within the social sciences, combat sports and martial arts have yet to be sufficiently interrogated from an ethnographic standpoint. The different contributions of this volume are aligned within the same project that began to crystallize in Loïc Wacquant's 'Body and Soul': the construction of a 'carnal sociology' that constitutes an exploration of the social world 'from' the body.

Contemporary Digital Architecture - Jacobo Krauel 2010

This book shows how to best present theoretical-technical information, data and images, making this title itself a cutting-edge addition to literature on the subject. These issues examined and discussed fully in this volume.
