Climate Change Big Book Gr. 5-8 - Erika Gasper 2008-09-01

Get a well-rounded look at the causes, effects, and reduction of Climate Change with our 3-book BUNDLE. Start by providing insight into the science of our atmosphere with Climate Change: Causes. Create your own model of the carbon cycle. See firsthand how nitrogen-fixing bacteria can replace nitrogen fertilizers. Next,

understand the Effects of Climate Change on the environment and human life. Observe a homemade melting ice sheet to understand its effect on sea level. Then, create a model to show rising sea level in action. Finally, explore creative ways to Reduce human consumption and output. Design your own dream car that runs on alternative fuel. Find out what you can do to lower your own greenhouse gas emissions. Each concept is paired with hands-on activities. Written to Bloom's Taxonomy and STEAM initiatives, additional crossword, word search, comprehension quiz and answer key are also included.

Oh Say Can You Seed? - Bonnie Worth
2019-06-18

Get ready to bloom and learn all about flowers and plants with the Cat in the Hat--a perfect gift for aspiring gardeners on Earth Day and every day! The Cat in the Hat's Learning Library is a nonfiction picture book series that introduces beginning readers ages 5-8 to important basic concepts. An easy and fun introduction to plant biology! With the able assistance of Thing 1 and Thing 2 - the Cat in the Hat explores the world of plants. Kids will learn about the various parts of plants, seeds, and flowers; basic photosynthesis and pollination; and seed dispersal. Featuring beloved characters from Dr. Seuss's The Cat in the Hat, the Learning Library

are unjacketed hardcover picture books that explore a range of nonfiction topics about the world we live in and include an index, glossary, and suggestions for further reading.

Waste: The Global View: Waste from Mining

Gr. 5-8 - Erika Gombatz-Gasper 2015-10-01

****This is the chapter slice "Waste from Mining" from the full lesson plan "Waste: The Global View"**. What kind of waste is created from natural disasters, oil spills, agriculture and mining? From Hurricane Katrina and the tsunami in the Indian Ocean, to the Exxon Valdez oil spill, and even space junk, humans are managing all types of waste across the globe. Empower your students with important information about agricultural pesticides, radioactive waste from nuclear power plants, waste management success stories, and much more. Written to grade and using simplified language and vocabulary, social studies concepts are presented in a way that makes them more accessible to students and easier to understand. Comprised of reading passages, student activities for before and after reading, crossword, word search, test prep, final quiz, answer key and color mini posters. All of our content is aligned to your State Standards and are written to Bloom's Taxonomy.**

Economic Education Experiences of Enterprising Teachers - Joint Council on Economic Education 1977

Climate Change: Reduction: How Warm Will Earth Get? Gr. 5-8 - Erika Gombatz-Gasper 2019-07-01

****This is the chapter slice "How Warm Will Earth Get?" from the full lesson plan "Climate Change: Reduction"**. Explore creative ways to reduce human consumption and output in an effort to help clean up our planet and reduce operating costs. Advocates and skeptics of Climate Change will both benefit from our valuable resource. Start by looking ahead at Earth's future and finding out how warm it will get. Design your own dream car that runs on alternative fuel. Research different transportation choices in your region and create a pamphlet to showcase them. Find out about product life cycles and what industries can do to lower their emissions. Create a plan of your own green city that will run completely on clean energy. Learn how**

green buildings work and what components go into creating this fascinating technology. See what other countries are doing to create communities free of carbon dioxide emissions and waste. Then, find out what you can do to lower your own greenhouse gas emissions. Written to Bloom's Taxonomy and STEAM initiatives, additional hands-on activities, crossword, word search, comprehension quiz and answer key are also included.

Differentiating Instruction with Menus - Laurie E. Westphal 2007

Differentiating Instruction With Menus offers teachers everything they need to create a student-centered learning environment based on choice. Addressing the four main subject areas (language arts, math, science, and social

studies) and the major concepts taught within these areas, these books provide a number of different types of menus that elementary-aged students can use to select exciting products that they will develop so teachers can assess what has been learned—instead of using a traditional worksheet format. Each book contains attractive reproducible menus, each based on the levels of Bloom's revised taxonomy, for students to use to guide them in making decisions as to which products they will develop after studying a major concept or unit. Using creative and challenging choices found in Tic-Tac-Toe Menus, List Menus, 2-5-8 Menus, Baseball Menus, and Game Show Menus, students will look forward to sharing their newfound knowledge throughout the year. Also included are specific guidelines for products, rubrics for assessing student products, and teacher introduction pages for each menu. This book includes menus that teach students about physical science, earth science, and scientists and the tools they use.

Climate Change: Reduction: Transportation Gr. 5-8 - Erika Gombatz-Gasper 2019-07-01

**This is the chapter slice "Transportation" from the full lesson plan "Climate Change: Reduction" Explore creative ways to reduce human consumption and output in an effort to help clean up our planet and reduce operating costs. Advocates and skeptics of Climate Change will both benefit from our valuable resource. Start by looking ahead at Earth's future and finding out how warm it will get. Design your own dream car that runs on alternative fuel. Research different transportation choices in your region and create a pamphlet to showcase them. Why Don't Students Like School? - Daniel T. Willingham 2009-06-10

Easy-to-apply, scientifically-based approaches for engaging students in the classroom Cognitive scientist Dan Willingham focuses his acclaimed research on the biological and cognitive basis of learning. His book will help teachers improve their practice by explaining how they and their students think and learn. It reveals-the importance of story, emotion, memory, context, and routine in building knowledge and creating lasting learning experiences. Nine, easy-to-understand principles with clear applications for the classroom Includes surprising findings, such as that intelligence is malleable, and that you cannot develop "thinking skills" without facts How an understanding of the brain's workings can help teachers hone their teaching skills "Mr. Willingham's answers apply just as well outside the classroom. Corporate trainers, marketers and, not least, parents -anyone who cares about how we learn-should find his book valuable reading." —Wall Street Journal

The Best Science Books & A-V Materials for Children - Susan M. O'Connell 1988

Some scientists and science educators believe that the most effective strategy for raising science literacy among future workers and voters is to focus on the youngest members of the public. The reviews in this publication were undertaken to increase public understanding and appreciation of the importance and promise of the methods of science in human progress. This publication is directed towards librarians, teachers, and parents who are concerned about science information and education for children 5 through 12 years of age and covers science and mathematics books, films, filmstrips, and videocassettes. These materials cover the life and physical sciences, mathematics, engineering and technology, medicine, and the social and

behavioral sciences. A wide range of topics is covered including science museums, environmental problems, careers in science, oceanography, insect culture, robots, and the ancient world. Audiovisual materials include such diverse topics as energy and resources, chemical interactions, meteorology, aquatic environments, zoological sciences, medicine, and engineering. The indexes list authors, titles and subjects, series titles, and distributors.

Availability and cost information are provided in the annotations. (RT)

Help your future genius become the smartest baby in the room! Written by an expert, Optical Physics for Babies is a colorfully simple introduction to the principles of linear optics. Babies (and grownups!) will learn the difference between reflection and refraction and why both are necessary to create wonderful things like rainbows. With a tongue-in-cheek approach that adults will love, this installment of the Baby University board book series is the perfect way to introduce basic concepts to even the youngest scientists. After all, it's never too early to become a physicist! Baby University: It only takes a small spark to ignite a child's mind. *Differentiating Instruction With Menus for the*

Inclusive Classroom - Laurie E. Westphal
2021-09-03

Differentiating Instruction With Menus for the Inclusive Classroom: Science for grades 3-5 offers teachers everything they need to create a student-centered learning environment based on choice. This book provides six different types of menus that students can use to select exciting products that they will develop so teachers can assess what has been learned—instead of using a traditional worksheet format. Topics addressed include physical science, biological science, Earth science, and tools scientists use.

Differentiating Instruction With Menus for the Inclusive Classroom: Science provides numerous types of leveled menus that lower and on-level elementary-aged students can use to demonstrate learning through a method of their choice. Menus with similar formats but geared towards varying ability levels allow teachers to differentiate easily. Using the creative and challenging choices found in Tic-Tac-Toe menus, List menus, 2-5-8 menus, Three Shape menus, Baseball menus, and Game Show menus, students will look forward to sharing their newfound knowledge throughout the year. Also included are specific guidelines for products, rubrics for assessing student products, and teacher introduction pages for each menu. This is a must-have for any teacher wanting to differentiate for a wide range of learners!

Grades 3-5

Reducing Your Community's Carbon Footprint: Reduce, Reuse, Recycle, and Plant Gr. 5-8 - George Graybill 2017-05-18

This is the chapter slice "Reduce, Reuse, Recycle, and Plant Gr. 5-8" from the full lesson plan "Reducing Your Community's Carbon Footprint". Encourage students to make a difference on a larger scale by examining their community's carbon footprint. Our resource illustrates the causes and effects of global climate change on communities and habitats. Identify the cause and effect events between a commuter driving to work and a distant island becoming smaller. Explore the evolution of living in cities to moving to the suburbs and how this

affected a community's travel footprint. Find out how Cuba transformed their farming system to one that uses no fossil fuels in just 10 years. Learn about the heat island effect caused by cities, and how this changes the local climate. Brainstorm what recycled items will become in their next life. Get inspired by reading about some green towns and cities all over the world. Explore ways in which you can help your community see a green future. Written to Bloom's Taxonomy and STEAM initiatives, additional graphic organizers, carbon footprint calculator, crossword, word search, comprehension quiz and answer key are also included.

Waste: The Global View: Oils Spills Gr. 5-8 - Erika Gombatz-Gasper 2015-10-01

This is the chapter slice "Oil Spills" from the full lesson plan "Waste: The Global View". What kind of waste is created from natural disasters, oil spills, agriculture and mining? From Hurricane Katrina and the tsunami in the Indian Ocean, to the Exxon Valdez oil spill, and even space junk, humans are managing all types of waste across the globe. Empower your students with important information about agricultural pesticides, radioactive waste from nuclear power plants, waste management success stories, and much more.
