Liquor Store Theatre - Maya Stovall 2020-11-06

For six years Maya Stovall staged Liquor Store Theatre, a conceptual art and anthropology video project--- included in the Whitney Biennial in 2017---in which she danced near the liquor stores in her Detroit neighborhood as a way to start conversations with her neighbors. In this book of the same name, Stovall uses the project as a point of departure for understanding everyday life in Detroit and the possibilities for ethnographic research, art, and knowledge creation. Her conversations with her neighbors—which touch on everything from economics, aesthetics, and sex to the political and economic racism that undergirds Detroit's history—bring to light rarely acknowledged experiences of longtime Detroiters. In these exchanges, Stovall enacts an innovative form of ethnographic engagement that offers new modes of integrating the social sciences with the arts in ways

that exceed what either approach can achieve alone.

*The Dispossessed* - Szilard Borbely 2016-11-15

A literary sensation on its original publication in Hungary, this hypnotic, hauntingly beautiful first novel from the acclaimed, award-winning poet and author Szilárd Borbély depicts the poverty and cruelty experienced by a partly-Jewish family in a rural village in the late 1960s and early 1970s. "No one has ever written so beautifully and at the same time so without pity about the suffering in the isolated provincial villages of Hungary...His sentences have a surgical precision, and their sustained rhythm only reinforces the power of what they evoke."—Nicole Henneberg, Frankfurter Allgemeine Zeitung In a tiny

village in northeast Hungary, close to the Romanian border, a young, unnamed boy warily observes day-to-day life and chronicles his family's struggles to survive. Like most of the villagers, his family is desperately poor, but their situation is worse than most—they are ostracized because of his father's Jewish heritage and his mother's connections to the Kulaks, who once owned land and supported the fascist Horthy regime before it was toppled by Communists. With unflinching candor, the little boy's observations are related through a variety of narrative voices—crude diatribes from his alcoholic father, evocative and lyrical tales of the past from his grandparents, and his own simple yet potent prose. Together, these accounts reveal not only the history of his family but that of Hungary itself, through the physical and psychic traumas of two World Wars to the country's treatment of Jews, both past and present. Drawing heavily on Borbély's memories of his

own childhood, *The Dispossessed* is an extraordinarily realistic novel. Raw and often brutal, yet glimmering with hope, it is the crowning achievement of an uncompromising talent.

*Minority Serving Institutions - National Academies of Sciences, Engineering, and Medicine* 2019-03-05

There are over 20 million young people of color in the United States whose representation in STEM education pathways and in the STEM workforce is still far below their numbers in the general population. Their participation could help re-establish the United States' preeminence in STEM

innovation and productivity, while also increasing the number of well-educated STEM workers. There are nearly 700 minority-serving institutions (MSIs) that provide pathways to STEM educational success and workforce readiness for millions of students of color and do so in a mission-driven and intentional manner. They vary substantially in their origins, missions, student demographics, and levels of institutional selectivity. But in general, their service to the nation provides a gateway to higher education and the workforce, particularly for underrepresented students of color and those from low-income and first-generation to college backgrounds. The challenge for the nation is how to capitalize on the unique strengths and attributes of these institutions and to equip them with the resources, exceptional faculty talent, and vital infrastructure needed to educate and train an increasingly critical portion of current and future generations of scientists, engineers, and

health professionals. *Minority Serving Institutions* examines the nation's MSIs and identifies promising programs and effective strategies that have the highest potential return on investment for the nation by increasing the quantity and quality MSI STEM graduates. This study also provides critical information and perspective about the importance of MSIs to other stakeholders in the nation's system of higher education and the organizations that support them.

**Ethics in Comedy** - Steven A. Benko 2020-10-02

All humans laugh. However, there is little agreement about what is appropriate to laugh at. While laughter can unite people by showing how they share values and perspectives, it also has the power to separate and divide. Humor that "crosses the line" can make people feel excluded and humiliated. This collection of new essays addresses possible ways that moral and ethical lines can be drawn around humor and laughter. What would a Kantian approach to humor look like? Do games

create a safe space for profanity and offense? Contributors to this volume work to establish and explain guidelines for thinking about the moral questions that arise when humor and laughter intersect with medicine, gender, race, and politics. Drawing from the work of stand-up comedians, television shows, and ethicists, this volume asserts that we are never just joking.

How an understanding of the brain's workings can help teachers hone their teaching skills. "Mr. Willingham's answers apply just as well outside the classroom. ### **Honor Related Violence -**

Robert Ermers 2018-02-02

Honor related violence is generally associated with crimes committed by people from the Middle East and adjacent areas. Perpetrators sometimes justify their deeds saying they 'had to' restore their honor. Theorists have argued that men from these populations exclusively correlate honor with the behaviour of their womenfolk, which they use as a pretext to further oppress and dominate women. Due to large-scale migration, western societies have become acquainted with honor related violence and honor killings. In this book, Robert Ermers addresses a number of questions related to honor related violence, including the use of predominantly negative frames regarding the cultural and social background of non-westerners and immigrants. In many publications, including the press, crimes committed by

non-western individuals are often attributed to their cultural background rather than specific contexts or circumstances, in contrast to western cases. Vague and insufficiently defined concepts such as 'honor' and 'culture' strongly contribute to this bias. Honor Related Violence deals with honor and honor related violence, their background and contexts, what honor is, and what it is not. It examines stigma in relation to honor and based upon stigma research, reliably explains, analyses, and predicts honor related violence. The book argues that people all over the world can be stigmatized, excluded and ostracized when they commit misbehavior, and therefore find themselves in a state of dishonor which can lead to honor related violence. A timely intervention into the psychology of honor related violence, this is an essential resource for students and researchers in the fields of social psychology, sociology, law, criminology and anthropology.
