Understanding the War Industry - Christian
Sorensen 2020-08-01

"To an ever-increasing extent, the business of
America is the business of war. But although
Americans live in the shadow of a war economy,
few understand the full extent of its power and
influence. Thanks to Christian Sorensen's deeply
researched book into the military-industrial
complex that envelops our society, such
ignorance can no longer be an excuse." -
ANDREW COCKBURN, author of 'Kill Chain, The
Rise of the High Tech Assassins.' "A devastating
account of American militarism, brilliantly
depicted, and exhaustively researched in an
authoritative manner. Sorensen's book is urgent,
fascinating reading..." RICHARD FALK "I'm

adding Christian Sorensen's new book, *Understanding the War Industry*, to the list of books I think will convince you to help abolish war and militaries.." DAVID SWANSON *World Without War* "This meticulously researched book lays out in painstaking detail exactly how our nation has been captured by a war industry that profits from endless conflict and pursues profit at all costs. It will shock you, infuriate you, and hopefully inspire you." MEDEA BENJAMIN, co-director, *CODE PINK The War Industry* infests the American economy like a cancer, sapping its strength and distorting its creativity while devouring its treasure. Stunning in the depth of its research, *Understanding the War Industry* documents how the war industry commands the other two sides of the military-industrial-congressional triangle. It lays bare the multiple levers enabling the vast and proliferating war industry to wield undue influence, exploiting financial and legal structures, while co-opting Congress, academia and the media. Spiked with

insights into how corporate boardrooms view the troops, overseas bases, and warzones, it assiduously delineates how corporations reap enormous profits by providing a myriad of goods and services devoted to making war, which must be rationalized and used if the game is to go on: advanced weaponry, drones and nukes; invasive information technology; space-based weapons; and special operations—with contracts stuffed with ongoing and proliferating developmental, tertiary and maintenance products for all of it. **New Haven Free Public Library Bulletin** - New Haven Free Public Library 1913

Questing Excellence in Academia - Knut H.
Sørensen 2022-01-30

Unlike almost most other studies of neoliberal
universities and academic capitalism this book
ethnographically explores and interprets those
transformations and their contradictions
empirically in the everyday practices of students,
faculty members, and administrators at two
public universities: NTNU in Norway and UCLA
in California. Differently situated in global
political economies, both are ambitious,
prosperous campuses. The book reflexively
examines their disturbing disputes about quality,
competition, and innovation. It argues that some
academic, bureaucratic, and corporate

university governance practices are both unsustainable and undermining what some university students and faculty already do well: circulate interdisciplinary knowledge and its making globally across the diasporic domains of academia, society, industry, and government while addressing the world's immediate challenges: power, inequities, and sustainability. It shows the important, strategic work of domesticating, co- morphing, and meshworking at the faultlines of emerging knowledge. This book is for students, faculty, society members, and policy makers who want to engage more effectively with contemporary universities that increasingly serve as busy crossroads for sharing ideas and how to make them. It will be of interest to workers and scholars in the interdisciplinary fields of higher education studies, critical university studies, and critical public infrastructure studies, plus science, technology, and society studies.
