Terrorists on Trial - Beatrice de Graaf 2016

"This volume views terrorism trials as a form of theatre, where the 'show' that a trial may offer can develop often unexpected dynamics, which at times might inconvenience the government. Seeing terrorism trials as a stage where legal instruments are used (and abused) to argue the validity of contested political constructs, this study presents a performative perspective to draw attention to the mechanisms and effects of terrorism trials in and outside the courtroom. With a special focus on how the power of these performances may in turn shape new narratives of justice and/or injustice, it offers vital insights into terrorism

trials directed involving different types of terrorism suspects, from left-wing to ethno-nationalist and jihadist terrorists, in Spain, Russia, Germany, the Netherlands, and the United States"--Back cover.

Domains and Directions in the Development of TBLT - Martin Bygate 2015-11-15

This volume brings together contemporary position statements and research reviews which were originally presented as Plenary Addresses to the Biennial International Conference on Task-Based Language Teaching, between 2005 and 2013. It thus assembles up-to-date reflections, critiques, and recommendations from influential researchers working within the TBLT paradigm over the last 30 years, thereby also highlighting most of the major theoretical perspectives so far developed. While the plenarists structured their chapters around their original presentations, they have been invited to update their thinking as they feel appropriate and in response to recent developments in the field. The collection thus offers representative and accessible coverage of a range of approaches to the overall philosophy of TBLT, to the relationship between TBLT and the study of second language acquisition, and to the development and implementation of TBLT as a comprehensive approach to language education, curriculum, and pedagogy.

Rock Crystal - Adalbert Stifter 2015-12-15

Seemingly the simplest of stories—a passing anecdote of village life—Rock Crystal opens up into a tale of almost unendurable suspense. This jewel-like novella by the writer that Thomas Mann praised as "one of the most extraordinary, the most enigmatic, the most secretly daring and the most strangely gripping narrators in world literature" is among the most unusual, moving, and memorable of Christmas stories. Two children—Conrad and his little sister, Sanna—set out from their village high up in the Alps to visit their grandparents in the neighboring valley. It is the day before Christmas but the weather is mild, though of course night falls early in December and the children are warned not to linger. The grandparents welcome the children with presents and pack them off with kisses. Then snow begins to fall, ever more thickly and steadily. Undaunted, the children press on, only to take a wrong turn. The snow rises higher and higher, time passes: it is deep night when the sky clears and Conrad and Sanna discover themselves out on a glacier, terrifying and beautiful, the heart of the void. Adalbert Stifter's rapt and enigmatic

tale, beautifully translated by Elizabeth Mayer and Marianne Moore, explores what can be found between Christmas Eve and Christmas Day—or on any night of the year.

Philosophy, Psychoanalysis and Emancipation - Herbert Marcuse 2010-11-23

Edited by Douglas Kellner and Clayton Pierce, *Philosophy, Psychoanalysis and Emancipation* is the fifth volume of Herbert Marcuse's collected papers. Containing some of Marcuse's most important work, this book presents for the first time his unique syntheses of philosophy, psychoanalysis, and critical social theory, directed toward human emancipation and social transformation. Within philosophy, Marcuse engaged with disparate and often conflicting philosophical perspectives - ranging from Heidegger and phenomenology, to Hegel, Marx, and Freud - to create unique philosophical insights, often overlooked in favor of his theoretical and political interventions with the New Left, the subject of previous volumes. This collection assembles significant, and in some cases unknown texts from the Herbert Marcuse archives in Frankfurt, including: critiques of positivism and idealism, Dewey's pragmatism, and the tradition of German philosophy philosophical essays from the 1930s and 1940s that attempt to reconstruct philosophy on a materialist base Marcuse's unique attempts to bring together Freud and philosophy philosophical reflections on death, human aggression, war, and peace Marcuse's later critical philosophical perspectives on science, technology, society, religion, and ecology. A comprehensive introduction by Douglas Kellner, Tyson Lewis and Clayton Pierce places Marcuse's work in the context of his engagement with the main currents of twentieth century politics and philosophy. An Afterword by Andrew Feenberg provides a personal memory of Marcuse as scholar, teacher and activist, and summarizes the lasting relevance of his radical thought.

The Linguistic Integration of Adult Migrants - Jean Claude Beacco 2014

The linguistic integration of migrants affects every aspect of settling in a new country (employment, health, etc.). The aim of this collection of texts is to propose a number of specific measures member states can take to help adult migrants become acquainted with the language of the host country. The main focus is on organising language courses that meet migrants' real communication needs. It is not enough for authorities simply to consider the technical aspects of such courses, they should also design and conduct them in accordance with the fundamental values of the Council of Europe. A number of issues concerning the linguistic integration of adult migrants are presented here, beginning with the notion of linguistic integration itself. Family reunion, the nature of citizenship and the function of language tests, among others, are dealt with from the point of view of language and language use. Readers are invited to reflect on the type of language competences that need to be acquired as well as an appropriate use of the Common European Framework of Reference for Languages. The collection also sets out approaches and instruments designed to assist in implementing effective policies.

Marxism, Revolution and Utopia - Herbert Marcuse 2014-03-26

This collection assembles some of Herbert Marcuse's most important work and presents for the first time his responses to and development of classic Marxist approaches to revolution and utopia, as well as his own theoretical and political perspectives. This sixth and final volume of Marcuse's collected papers shows Marcuse's rejection of the prevailing twentieth-century Marxist theory and socialist practice - which he saw as inadequate for a thorough critique of Western and Soviet bureaucracy - and the development of his revolutionary thought towards a critique of the consumer society. Marcuse's later philosophical perspectives on technology, ecology, and human emancipation sat at odds with many of the classic tenets of Marx's materialist dialectic which placed the working class as the central agent of change in capitalist societies. As the material from this volume shows, Marcuse was not only a theorist of Marxist thought and practice in the twentieth century, but also proves to be an essential thinker for understanding the neoliberal phase of capitalism and resistance in the twenty-first century. A comprehensive introduction by Douglas Kellner and Clayton Pierce places Marcuse's philosophy in the context of his engagement with the main currents of twentieth century philosophy while also providing important analyses of his anticipatory theorization of capitalist development through a neoliberal restructuring of society. The volume concludes with an afterword by Peter Marcuse.

"B" is for Burglar - Sue Grafton 2010-04-01

B is for Burglar, from Sue Grafton's #1 New York Times bestselling Kinsey Millhone Alphabet mystery series Beverly Danziger looked like an expensive, carefully wrapped package from a good but conservative shop. Only her compulsive chatter hinted at the nervousness beneath her cool surface. It was a nervousness out of all proportion to the problem she placed before Kinsey Millhone. There was an absent sister. A will to be settled--a matter of only a few thousand dollars. Mrs. Danziger did not look as if she needed a few thousand dollars. And she didn't seem like someone longing for a family reunion. Still, business was slow, and even a private investigator has bills to pay. Millhone took the job. It looked routine. Elaine Boldt's wrappings were a good deal flashier than her sister's, but they signaled the same thing: The lady had money. A rich widow in her early forties, she owned a condo in Boca Raton and another in Santa Teresa. According to the manager of the California building, she was last seen draped in her \$12,000 lynx coat heading for Boca Raton. According to the manager of the Florida building, she never got there. But someone else had and she was camping out illegally in Mrs. Boldt's apartment. The job was beginning to seem a bit less routine. It turned tricky when Beverly Danziger ordered Millhone to drop the case and it took on an ominous quality when Aubrey Danziger surfaced, making all kinds of wild accusations about his wife. But it only became sinister when Millhone learned that just days before Elaine Boldt went missing, her next-door neighbor and bridge partner had been murdered and the killer was still at large. A house destroyed by arson. A brutally murdered woman. A missing lynx coat. An apartment burgled of valueless papers, another ransacked in a melée of mindless destruction. And more murder. As Millhone digs deeper into the case, she finds herself in a nightmarish hall of mirrors in which reality is distorted by illusion and nothing--except danger--is quite what it seems. The Acquisition of German - Anne Vainikka 2011-10-27
The Acquisition of German: Introducing Organic Grammar brings together work on the acquisition of German from over four decades of child L1 and immigrant L2 learner studies. The book's major feature is new longitudinal data from three secondary school students who began an exchange year in Germany with no German knowledge and attained fluency. Their naturalistic acquisition process — with a succession of stages described for the first time in L2 acquisition — is highly similar to that of younger learners. This has important implications for German teaching and for the theory of Universal Grammar and acquisition. Organic Grammar, a variant of generative syntax, is offered as a practical alternative to Chomsky's Minimalism. The analysis focuses on extensive monthly samples of the three students' German development in an input-rich environment. Similar to previous studies, the teenagers build syntactic structure from the bottom up. Two acquired correct word order by the end of the year, the third, who had greater conscious awareness of German grammar, had a divergent route of development, suggesting that language awareness can alter a natural developmental path. The results are addressed in light of recent debates in child-adult differences.

Culture and Education - Birgitta Qvarsell, Christoph Wulf
Although the educational system still fulfills the task of anchoring young generations within the national cultures that make up Europe, the progressive loss of significance of national states, which is connected to the process of unification and globalization, is creating new challenges to the various European cultures and to the education systems embodied in their people. Cultures are sustained and transformed through the manner in which they communicate with the younger generation; it is at this level that they constitute their particular power and dynamic.

From Germany to Germany - Günter Grass 2017-06-29

In 1990, Günter Grass - a reluctant diarist - felt compelled to make a record of the interesting times through which he was living. Following the fall of the Berlin Wall in November 1989 and the collapse of Communism, Germany and Europe were enduring a period of immense upheaval. Grass resolved to immerse himself in these political debates: he travelled widely throughout both Germanys, the former East and the former West, conducting a lively exchange with political enemies, friends and his own children about all the questions posed by reunification. His account gives the reader an unparalleled insight into a key moment in the life of modern Europe, seen through the eyes of one of its most acclaimed writers. It also provides a startling insight into the creative process as the reader witnesses ideas for novels occurring and then taking shape. From Germany to Germany is both a personal journal by a great creative artist and a penetrating commentary on recent European history by someone who was simultaneously an acute observer and a highly engaged participant.

Marxism and Ecology - Reiner Grundmann 1991

In this book Grundmann argues that Marx's theory of human nature and his evolutionary thinking are cogent tools for understanding basic traits of industrial countries and the ecological problems they produce. He challenges the widespread belief that the development of productive forces is by itself a threat to the environment, arguing that only specific technologies, not technology as such, lead to environmental degradation. He concludes that the pursuit of productivity and the development of a healthy environment need not be mutually exclusive.

Paradoxes of Interactivity - Uwe Seifert 2015-09-25

Current findings from anthropology, genetics, prehistory, cognitive and neuroscience indicate that human nature is grounded in a co-evolution of tool use, symbolic communication, social interaction and cultural transmission. Digital information technology has recently entered as a new tool in this co-evolution, and will probably have the strongest impact on shaping the human mind in the near future. A common effort from the humanities, the sciences, art and technology is necessary to understand this ongoing co-evolutionary process. Interactivity is a key for understanding the new relationships formed by humans with social robots as well as interactive environments and wearables underlying this process. Of special importance for understanding interactivity are human-computer and human-robot interaction, as well as media theory and New Media Art. »Paradoxes of Interactivity« brings together reflections on »interactivity« from different theoretical perspectives, the interplay of science and art, and recent technological developments for artistic applications, especially in the realm of sound.

Language Hacking German - Benny Lewis 2017-11-14

It's true that some people spend years studying German before they finally get around to speaking the language. But here's a better idea. Skip the years of study and jump right to the speaking part. Sound crazy? No, it's language hacking. Unlike most traditional language courses that try to teach you the rules of German, #LanguageHacking shows you how to learn and speak German through proven memory techniques, unconventional shortcuts and conversation strategies perfected by one of the world's greatest language learners, Benny Lewis, aka the Irish Polyglot. Using the language hacks -shortcuts that make learning simple - that Benny mastered while learning his 11 languages and his 'speak from the start' method, you will crack the language code and exponentially increase your language abilities so that you can get fluent faster. It's not magic. It's not a language gene. It's not something only "other people" can do. It's about being smart with how you learn, learning what's indispensable, skipping what's not, and using what you've learned to have real conversations in German from day one. The Method #LanguageHacking takes a modern approach to language learning, blending the power of online social collaboration with

traditional methods. It focuses on the conversations that learners need to master right away, rather than presenting language in order of difficulty like most courses. This means that you can have conversations immediately, not after years of study. Each of the 10 units culminates with a speaking 'mission' that prepares you to use the language you've learned to talk about yourself. Through the language hacker online learner community, you can share your personalized speaking 'missions' with other learners - getting and giving feedback and extending your learning beyond the pages of the book . You don't need to go abroad to learn a language any more.
