As the demand for English language education grows in Asia, there has been a parallel growth in the development and implementation of standardized tests at the local level. Chapters address the following well-known and developing high-stakes tests in different regions across Asia: the GEPT, the TEPS, the VSTEP, the CET, the EIKEN and TEAP, and the ELPA. Brought together by world-renowned testing assessment scholar Cyril Weir and the Language Training and Testing Center (LTTC), one of Asia's leading testing institutions based in Taiwan, this volume is a useful reference for

**Assessing Second Language  
Reading - Karim Sadeghi**

2021-08-25

This book investigates the issue  
of cloze-validity as a measure  
of second language reading  
comprehension. It starts off by  
making a distinction between  
general reading ability and the  
more specific reading  
comprehension followed by a  
thorough review of the related  
research on L2 reading  
comprehension and sorting out

the confusion in the literature  
in this categorization. A  
comprehensive account of  
cloze procedure is presented  
discussing its origin, different  
versions, its use for teaching  
and testing purposes, as well  
the latest research on cloze as  
measures of readability,  
language proficiency and  
second language reading. The  
book includes studies  
conducted at several stages on  
validating cloze as a measure  
of reading and interview and  
questionnaire techniques are  
applied to investigate the  
validity of eight cloze tests,  
criterion reading tests, and  
other cloze and reading tests in  
general. Two new cloze tests,  
i.e. reader-centered cloze test  
and phrase cloze test, are also  
introduced and researched as  
measures of reading ability.  
The book concludes with  
suggestions for developing  
tests that can better measure  
reading comprehension in light  
of recent research insights on  
the complex and dynamic  
nature of reading. This book  
will appeal to researchers,  
lecturers and graduate and

post-graduate students taking a course in Second Language Acquisition, Applied Linguistics, TESOL, Language Assessment, and Educational Measurement.

Research Questions in Language Education and Applied Linguistics - Hassan Mohebbi 2022-02-14

This volume encompasses the range of research questions on language-related problems that arise in language teaching, learning and assessment. The [150] chapters are written by experts in the field who each

offer their insights into current and future directions of research, and who suggest several highly relevant research questions. Topics include, but are not limited to: language skills teaching, language skills assessment and testing, measurement, feedback, discourse analysis, pragmatics, semantics, language learning through technology, CALL, MALL, ESP, EAP, ERPP, TBLT, materials development, genre analysis, needs analysis, corpus, content-based language teaching, language teaching and learning strategies, individual differences, research methods, classroom research, form-focused instruction, age effects, literacy, proficiency, and teacher education and teacher development. The book serves as a reference and offers inspiration to researchers and students in language education. An important skill in reviewing the research literature is following a study's "plan of attack." Broadly, this means that before accepting and acting upon the

findings, one considers a) the research question (Is it clear and focused? Measurable?), b) the subjects examined, the methods deployed, and the measures chosen (Do they fit the study's goal and have the potential to yield useful results?), and c) the analysis of the data (Do the data lead to the discussion presented? Has the author reasonably interpreted results to reach the conclusion?). Mohebbi and Coombe's book, *Research Questions in Language Education and Applied Linguistics: A Reference Guide*, helps budding researchers take the first step and develop a solid research question. As the field of language education evolves, we need continual research to improve our instructional and assessment practices and our understanding of the learners' language learning processes. This book with its remarkable 150 topics and 10 times the number of potential research questions provides a wealth of ideas that will help early career researchers conduct studies

that move our field forward and grow our knowledge base. Deborah J. Short, Ph.D., Director, Academic Language Research & Training, Past President, TESOL International Association (2021-22) As a teacher in graduate programs in TESOL I frequently come across the frustration of students at centering their research interests on a particular topic and developing research questions which are worth pursuing so as to make a contribution to the field. This frustration stems from the fact that our field is so vast and interrelated, that it is often impossible to properly address all that interests them. Hence, I wholeheartedly welcome this most relevant and innovative addition to the research literature in the field of TESOL and Applied Linguistics. Coombe and Mohebbi have created a real tour de force that stands to inform budding researchers in the field for many years to come. Additionally, the cutting-edge depiction of the field and all it has to offer will no doubt

update the research agendas of many seasoned researchers around the world. The 150 chapters are organized in a most powerful, yet, deceptively simple way offering a positioning within the topic, suggesting questions that might direct inquiry and offering a basic set of bibliographic tools to start the reader in the path towards research. What is more, the nine sections in which the chapters are organized leave no area of the field unexplored. Dr. Gabriel Díaz Maggioli, Academic Advisor, Institute of Education, Universidad ORT del Uruguay, President, IATEFL

New Cambridge Advanced  
English places a strong  
emphasis on vocabulary,  
collocation and idiom. It  
includes CAE exam-style

exercises but is suitable both  
for exam and non-exam  
candidates. This is a third  
edition, differing from the  
second edition by only one  
minor change in a reading  
passage.
