Emotional Agility - Susan David 2016-09-06
#1 Wall Street Journal Best Seller USA Today Best Seller Amazon Best Book of the Year TED Talk sensation - over 3 million views! The counterintuitive approach to achieving your true potential, heralded by the Harvard Business Review as a groundbreaking idea of the year. The path to personal and professional fulfillment is rarely straight. Ask anyone who has achieved his or her biggest goals or whose relationships thrive and you'll hear stories of many unexpected detours along the way. What separates those who master these challenges and those who get derailed? The answer is agility—emotional agility. Emotional agility is a revolutionary, science-based approach that allows us to navigate life's twists and turns with self-acceptance, clear-sightedness, and an open mind. Renowned psychologist Susan David developed this concept after studying emotions, happiness, and achievement for more than twenty years. She found that no matter how intelligent or creative people are, or what type of personality they have, it is how they navigate their inner world—their thoughts, feelings, and self-talk—that ultimately determines how successful they will become. The way we respond to these internal experiences drives our actions, careers, relationships, happiness, health—everything that matters in our lives. As humans, we are all prone to common hooks—things like self-doubt, shame, sadness, fear, or anger—that can too easily steer us in the wrong direction. Emotionally agile people are not immune to stresses and setbacks. The key difference is that they know how to adapt,

aligning their actions with their values and making small but powerful changes that lead to a lifetime of growth. Emotional agility is not about ignoring difficult emotions and thoughts; it's about holding them loosely, facing them courageously and compassionately, and then moving past them to bring the best of yourself forward. Drawing on her deep research, decades of international consulting, and her own experience overcoming adversity after losing her father at a young age, David shows how anyone can thrive in an uncertain world by becoming more emotionally agile. To guide us, she shares four key concepts that allow us to acknowledge uncomfortable experiences while simultaneously detaching from them, thereby allowing us to embrace our core values and adjust our actions so they can move us where we truly want to go. Written with authority, wit, and empathy, Emotional Agility serves as a road map for real behavioral change—a new way of acting that will help you reach your full potential, whoever you are and whatever you face.

Diversity, Equity and Inclusion in Honors Education - Graeme Harper 2019-01-15

In education, sorting students according to attainment is common. Such sorting clearly sets up the potential for exclusion, based on the attainment ideals and on the modes of selection. Ideals of inclusion suggest diversity, and those of equity, by reference to impartiality, suggest freedom from bias. Honors education, which

celebrates excellence, and references “honor” and all that word and concept infers, heightens and promotes the principled recognition of attainment, giving rise to questions of diversity, equity and inclusion. The Organization for Economic Co-Operation and Development (OECD), in its Ten Steps to Equity in Education, notes that inclusion is intertwined with fairness. How can honors education—and in the case of the discussions in this book, largely honors in US higher education—promote fairness, be diverse, and support equity? If it does not do so, how can it at all claim to be offering a principled version of what the National Collegiate Honors Council (USA) says are “opportunities for measurably broader, deeper, and more complex learning-centered and learner-directed experiences for its students”? In 2015, the National Society for Minorities in Honors (www.nsfmih.org) was launched in the USA to specifically explore, support and promote diversity, equity and inclusion in and across honors colleges and programs. The first annual NSFMIH conference was held at Oakland University, Michigan. This book began at that inaugural conference, and has been enhanced by enthusiastic contributions beyond that event as well.

Does It Matter? - Alan W. Watts 2010-09-07 This classic series of essays represents Alan Watts's thinking on the astonishing problems caused by our dysfunctional relationship with the material environment. Here, with characteristic wit, a philosopher best known for his writings and teachings about mysticism and Eastern philosophy gets down to the nitty-gritty problems of economics, technology, clothing, cooking, and housing. Watts argues that we confuse symbol with reality, our ways of describing and measuring the world with the world itself, and thus put ourselves into the absurd situation of preferring money to wealth and eating the menu instead of the dinner. With our attention locked on numbers and concepts, we are increasingly unconscious of nature and of our total dependence on air, water, plants, animals, insects, and bacteria. We have hallucinated the notion that the so-called external world is a cluster of objects separate from ourselves, that we encounter it, that we come into it instead of out of it. Originally published in 1972, *Does It Matter?* foretells the environmental problems that arise from this mistaken mind-set. Not all of Watts's predictions have come to pass, but his unique insights will change the way you look at the world.

Young Rebels in Contemporary Chinese Cinema - Zhou Xuelin 2007-09-01

In the 1980s, a new type of central character emerged in contemporary Chinese films - angry and alienated youth. Filmmakers treated youth as a separate category and showed them in urban situations behaving in unconventional and socially rebellious ways. *Young Rebels in Contemporary Chinese Cinema* looks for evidence in films that exemplify this trend.
