Advanced PHP and OpenERP / Odoo 7 Interfacing - Akhmad Daniel Sembiring
Versi PDF atau Pembayaran Lewat Paypal/BCA/Mandiri disini: http://shop.vitraining.co OpenERP / Odoo provides an application programming interface using it's XML-RPC webservices. The service is ready to be accessed by any programming language that is capable on communication through XML-RPC interface. This book explain in details on how to setup, configure, and do the integration of external system into OpenERP/ Odoo. Started with the OpenERP installation steps both for Linux and Windows, then PHP XAMPP installation for both operating systems, and the required preparation steps to take in order that the systems are ready to be integrated together. Taking PHP as the interfacing scripting languange using it's XML-RPC library, this book explains how to create a PHP class that contains methods for login, search, read, create, delete, and update data stored on OpenERP. Then how to use that class for real life example on accessing a legacy MySQL database and importing the data into OpenERP, and managing the status of already imported data. PHP provides a wide variety of object oriented frameworks, so this book also explain on how to use the class from inside a PHP framework, taking Yii Framework as an example. At the end of the topics, it's explained on how to automate the integration process periodically. In Linux we utilize the cron job, and in Windows we use the Task Scheduler. A Computational Method in Plasma Physics - F. Bauer 2012-12-06
In this book, we report on research in methods of computational magneto hydrodynamics supported by the United States Department of Energy under Contract EY-76-C-02-3077 with New York University. The work has re sulted in a computer code for mathematical analysis of the equilibrium and stability of a plasma in three dimensions with toroidal geometry but no sym metry. The code is listed in the final chapter. Versions of it have been used for the design of experiments at the Los Alamos Scientific Laboratory and the Max Planck Institute for Plasma Physics in Garching. We are grateful to Daniel Barnes, Jeremiah Brackbill, Harold Grad, William Grossmann, Abraham Kadish, Peter Lax, Guthrie Miller, Arnulf Schliiter, and Harold Weitzner for many useful discussions of the theory. We are especially indebted to Franz Herrnegger for theoretical and pedagogical comments. Constance Engle

has provided outstanding assistance with the typescript. We take pleasure in acknowledging the help of the staff of the Courant Mathematics and Com puting Laboratory at New York University. In particular we should like to express our thanks to Max Goldstein, Kevin McAuliffe, Terry Moore, Toshi Nagano and Tsun Tam.
