THE EVALUATION OF FINANCIAL RISK PROFILE OF THE COMPANIES AND THE MANDATORY DISCLOSURE ON Liquidity AND Credit RISK - Olga Cucaro 2020-10-18

THE EVALUATION OF FINANCIAL RISK PROFILE OF THE COMPANIES AND THE MANDATORY DISCLOSURE ON LIQUIDITY AND CREDIT RISK is a work born from a careful study of the evolution of the Italian and European legislation on the subject of financial risk communication and in particular of IFRS 7, Financial Instruments: Disclosure. Thanks to this international accounting standard, Italian listed companies have included a greater number of disclosures on financial risks in their financial statements, but while there is no doubt the quantitative increase in information, the qualitative value of this communication is doubtful. In this regard, the study analyzes the usefulness of the disclosure introduced by IFRS 7 for financial analysts. The choice of analysts is a natural choice due to the importance they hold as intermediaries in the communication channel between companies and the market.

Financial Accounting - Robert Libby 2019-02-28

Accounting, Organizations, and Institutions - Christopher S. Chapman 2009-08-13

Accounting has an ever-increasing significance in contemporary society. Indeed, some argue that its practices are fundamental to the development and functioning of modern capitalist societies. We can see accounting everywhere: in organizations where budgeting, investing, costing, and performance appraisal rely on accounting practices; in financial and other audits; in corporate scandals and financial reporting and regulation; in corporate governance, risk management, and accountability, and in the corresponding growth and influence of the accounting profession. Accounting, too, is an important part of the curriculum and research of business and management schools, the fastest growing sector in higher education. This growth is largely a phenomenon of the last 50 years or so. Prior to that, accounting was seen mainly as a mundane, technical, bookkeeping exercise (and some still share that naive view). The growth in accounting has demanded a corresponding engagement by scholars to examine and highlight the important behavioural, organizational, institutional, and social dimensions of accounting. Pioneering work by accounting researchers and social scientists more generally has persuasively demonstrated to a wider social science, professional, management, and policy audience how many aspects of life are indeed constituted, to an important extent, through the calculative practices of accounting. Anthony Hopwood, to whom this book is dedicated, has been a leading figure in this endeavour,

which has effectively defined accounting as a distinctive field of research in the social sciences. The book brings together the work of leading international accounting academics and social scientists, and demonstrates the scope, vitality, and insights of contemporary scholarship in and on accounting and auditing.

Corporate Performance - Julia Koralun-Bereźnicka 2013-05-23

This book presents the comparative evaluation of international and industrial factors affecting the financial condition of enterprises. In the theoretical part, the results of previous research on the occurrence of the country and industry effect in the financial health of companies are reviewed. The aim of the empirical study is to determine such factors – national or industrial ones – that have a greater impact on the corporate performance in the selected European Union countries. Corporate performance is measured and described with the use of a large set of

fundamental ratios. Corporate performance is therefore treated as a more complex matter influenced by such aspects as profitability, liquidity, working capital and solvency. The book especially analyses the importance of non-public companies of all sizes, which is also rare as current research focuses mainly on public companies due to the data constraints.
