More Matter - John Updike 2009-02-19

In this collection of nonfiction pieces, John Updike gathers his responses to nearly two hundred invitations into print, each "an

opportunity to make something beautiful, to find within oneself a treasure that would otherwise remain buried." Introductions, reviews, and humorous essays, paragraphs on New York, religion, and lust—here is “more matter” commissioned by an age that, as the author remarks in his Preface, calls for “real stuff . . . not for the obliquities and tenuosities of fiction.” Still, the novelist’s shaping hand, his gift for telling detail, can be detected in many of these literary considerations. Books by Edith Wharton, Dawn Powell, John Cheever, and Vladimir Nabokov are incisively treated, as are biographies of Isaac Newton, Abraham Lincoln, Queen Elizabeth II, and Helen Keller. As George Steiner observed, Updike writes with a “solicitous, almost tender intelligence. The critic and the poet in him . . . are at no odds with the novelist; the same sharpness of apprehension bears on the object in each of Updike’s modes.”

Motherhood in the Twenty-First Century - Mariam Alizade 2018-02-10

Mothers in the twenty-first century confront us, both in clinical practice and in theory, with fascinating challenges that to some extent subvert the traditional maternal ideal: the motherhood of single women, motherhood in which the mother-child relationship seems minimal (in the case of very busy working mothers), teenage motherhood in which there is no true awareness of the maternal function, motherhood in couples of homosexual women, men who take upon themselves the maternal function (men-mothers), complex motherhood by virtue of the multiple variants that have nowadays become possible thanks to new reproductive techniques, shared motherhood, surrogate motherhood, sublimated motherhood, perverse motherhood. Psycho-history, the accumulation and variety of psychoanalytic theories of femininity and motherhood, the contribution of gender studies, cross-disciplinary research, and listening to what our patients have to say - all this has yielded, in the past few decades, much controversial data that

challenges orthodox classical thinking with respect to the role and function of women as mothers.

Most Likely to Succeed at Work - Wilma Davidson 2004-10-14

As Kurt Vonnegut once said, "True terror is to wake up one morning and discover that your high school class is running the country." When it comes down to it, work--with its know-it-alls, gossips, and brown-noser--is a lot like high school. This clever and useful book helps readers identify and better communicate with these and other common types we all remember from the days when report cards, not business reports, were our concern, and when the big social event was the prom, not the company picnic. You don't need to dig out your yearbook to get a glimpse of these types--just take a look around your office: the Teacher's Pet, the Player, the Cheerleader, the Go-Getter, the Underachiever, the Class Clown, and many more. With wit and uncanny accuracy, corporate coaches Wilma Davidson and Jack Dougherty outline all the members of the "class," offering tips on working efficiently with each type, whether they're your boss, your client, or a colleague. The book also delivers advice on handling authority, conformity, looks, popularity, "sex education," and other indignities from high school that live on in the workplace. Whether you're still the same as you were in high school, a combination of types, or a reformed Rebel turned Class President, you will delight in and learn from this unique guide.

The book is a useful and entertaining resource for writers and screenwriters, helping them find the information they need to frame a situation and write a convincing description. TV viewers,

More Lives than One: A Biography of Hans

Fallada - Jenny Williams 2012-02-02

Hans Fallada was a drug addict, womanizer, alcoholic, jailbird and thief. Yet he was also one of the most extraordinary storytellers of the twentieth century, whose novels, including *Alone in Berlin*, portrayed ordinary people in terrible times with a powerful humanity. This acclaimed biography, newly revised and completely updated, tells the remarkable story of Hans Fallada, whose real name was Rudolf Ditzen. Jenny Williams chronicles his turbulent life as a writer, husband and father, shadowed by mental torment and long periods in psychiatric care. She shows how Ditzen's decision to remain in Nazi Germany in 1939 led to his self-destruction, but also made him a unique witness to his country's turmoil. *More Lives Than One* unpicks the contradictory, flawed and fascinating life of a writer who saw the worst of humanity, yet maintained his belief in the decency of the 'little man'.

More Equal Than Others - Godfrey Hodgson
2009-01-10

During the past quarter century, free-market capitalism was recognized not merely as a successful system of wealth creation, but as the key determinant of the health of political and cultural democracy. Now, renowned British journalist and historian Godfrey Hodgson takes aim at this popular view in a book that promises to become one of the most important political histories of our time. *More Equal Than Others* looks back on twenty-five years of what Hodgson calls "the conservative ascendancy" in America, demonstrating how it has come to dominate American politics. Hodgson disputes the notion that the rise of conservatism has spread affluence and equality to the American people. Quite the contrary, he writes, the most distinctive feature of American society in the closing years of the twentieth century was its great and growing inequality. He argues that the combination of conservative ideology and corporate power and dominance by mass media obsessed with lifestyle and celebrity have caused America to abandon much of what was best in its past. In fact, he writes, income and wealth inequality have become so extreme that America now resembles the class-stratified societies of early twentieth-century Europe. *More Equal Than Others* addresses a broad range of issues, with chapters on politics, the new economy, immigration, technology, women, race, and foreign policy, among others. A fitting sequel to the author's critically acclaimed *America In Our Time*, *More Equal Than Others* is not only an outstanding synthesis of history, but a trenchant commentary on the state of the American Dream.

Mother Box and Other Tales - Sarah Blackman
2013-10-04

The eleven stories and one novella of *Mother Box, and Other Tales* bring together everyday reality and something that is dramatically not in compelling narratives of new possibilities. In language that is both barb and bauble, bitter and unbearably sweet, Sarah Blackman spins the threads of stories where everything is probable and nothing is constant. The stories in *Mother Box, and Other Tales* occur in an in-between world of outlandish possibility that has become irrefutable reality: a woman gives birth to seven babies and realizes at one of their weddings that they were foxes all along; a girl with irritating social quirks has been raised literally by cardboard boxes; a young woman throws a dinner party only to have her elaborate dessert upstaged by one of the guests who, as it turns out, is the moon. Love between mothers and children is a puzzling thrum that sounds at the very edge of hearing; a muted pulse that, nevertheless, beats and beats and beats. In these tales, the prosaic details of everyday life—a half-eaten sandwich, an unopened pack of letters on a table—take on fevered significance as the characters blunder into revelations that occlude even as they unfold.

More Common Ground for International Competition Law? - Josef Drexl 2011-01-01

'This volume contains many excellent chapters on some of the most cutting edge topics in competition law today. Among the contributions are assessments of new approaches to competition law analysis, analyses of central and controversial topics in the relationship between competition law and intellectual property, and explorations of new transnational developments in China and elsewhere. The chapters range from studies of specific cases to broad interpretations of major trends. I found many of them to be highly insightful and very useful.' - David J. Gerber, Chicago-Kent College of Law, US 'This fresh collection of essays by scholars from around the world lives up to its title: it stakes out more common ground for the competition law systems of nations. The chapters result from the fourth annual conference of the Academic Society for Competition Law (ASCOLA). The essays cover major issues that reverberate around the world today, including: How should we think about the economic foundations of competition law in view of new research on behavioral economics and consumer choice? What is the future of the treatment of resale price maintenance? What is the proper fit of intellectual property with competition law? And how do we promote competition law and policy across borders? The collection offers insight from law, economics, political science, business strategy, and history.' - Eleanor Fox, New York University, US In recent years, an impressive proliferation of competition laws has been seen around the world. Whilst this development may lead to greater diversity of approaches, economic arguments may promote convergence. The contributions to this book look at a number of

most topical issues by asking whether the competition world is turning more towards convergence or diversity. These issues include, among others, the changing role of economics in times of economic crises and political change, the introduction of criminal sanctions, resale-price maintenance, unilateral conduct and the application of competition law to intellectual property and state-owned enterprises. More Common Ground for International Competition Law will appeal to academics, PhD students, and postgraduate students law and economics, members of competition agencies, legal practice and international business.

Neuroengineering - Daniel J. DiLorenzo 2007-12-07

Based on a foundation of science and empirical observation, engineering research and design has brought science fiction into science fact. The convergence of neuroscience and technology is facilitating the development of therapies that not long ago would have seemed unimaginable, if not impossible. With contributions from pioneers in industry, academia, and clinical medicine, Neuroengineering provides an understanding of the history, physiology and the most promising

engineering technologies. The book presents clinical applications of neuromodulation and a detailed review of the science and mechanisms of action underlying deep brain stimulation. Contributions include discussions of seizure control, clinical, surgical, and technological aspects of responsive neurostimulation, and a thorough review of spinal cord stimulation for pain control. The book highlights promising technologies and applications for neural augmentation, brain and computer interfaces, and motor prostheses. It concludes with coverage of the science underlying current neurostimulation techniques and new paradigm-shifting neuromodulation technologies. We are on the cusp of a technological revolution that promises to have more of an impact on human health, disease, and quality of life than any other in recent history.
