Becoming a teacher - Josef de Beer 2020-12-31

This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

Spud - Learning to Fly - John van de Ruit 2012-09-18

As Spud Milton continues his diabolical stagger through adolescence, he learns one of life's most important lessons: when dealing with women and cretins, nothing is ever quite as it seems. 'I'm practically a man in

most areas,' writes Spud confidently on his sixteenth birthday. The year is 1992 and, as always in South Africa, radical change is in the air. The country may be on the bumpy road to an uncomfortable redemption, but Spud Milton is hoping for a smooth ride as he returns to boarding school as a senior. Instead, he discovers that his vindictive arch enemy is back to taunt him and that a garrulous Malawian has taken residence in his dormitory, along with the regular inmates and misfits he calls friends. Spud's world has never seemed less certain. He attempts to master Shakespeare, wrestles constantly with God and the power of negative thinking, and develops an aversion to fried fish after a shocking discovery about his grandmother, Wombat. Spud - Learning to Fly transports the reader on an authentic tragicomic journey, deep into the sublime and ridiculous world of being a teenager. It is the third and penultimate instalment in the series of Spud Milton's schoolboy diaries, following on the best-selling Spud and Spud - The Madness Continues....

The International status of education about the Holocaust - Carrier, Peter 2015-01-14

How do schools worldwide treat the Holocaust as a subject? In which countries does the Holocaust form part of classroom teaching? Are representations of the Holocaust always accurate, balanced and unprejudiced in curricula and textbooks? This study, carried out by UNESCO and the Georg Eckert Institute for International Textbook Research, compares for the first time representations of the Holocaust in school textbooks and national curricula. Drawing on data which includes countries in which there exists no or little information about representations of the Holocaust, the study shows where the Holocaust is established in official guidelines, and contains a close textbook study, focusing on the comprehensiveness and accuracy of representations and historical narratives. The book highlights evolving practices worldwide and thus provides education stakeholders with comprehensive documentation about current trends in curricula directives and textbook representations of the Holocaust. It further formulates recommendations that will help policy-makers provide the educational means by which pupils may develop Holocaust literacy.
