[Polyglot: How I Learn Languages](#) - Kat— Lomb
2008-01-01

KAT LOMB (1909-2003) was one of the great polyglots of the 20th century. A translator and one of the first simultaneous interpreters in the world, Lomb worked in 16 languages for state and business concerns in her native Hungary. She achieved further fame by writing books on languages, interpreting, and polyglots. Polyglot: How I Learn Languages, first published in 1970, is a collection of anecdotes and reflections on language learning. Because Dr. Lomb learned her languages as an adult, after getting a PhD in chemistry, the methods she used will be of particular interest to adult learners who want to master a foreign language.

CLIL - Do Coyle 2010-04-01

CLIL (Content and Language Integrated Learning) has emerged since the millennium as a major trend in education. Written by Do Coyle, Philip Hood and David Marsh and drawing on their experience of CLIL in secondary schools, primary schools and English language schools across Europe, this book gives a comprehensive overview of CLIL. It summarises the theory which underpins the teaching of a content subject through another language and discusses its practical application, outlining the key directions for the development of research and practice. This book acknowledges the uncertainty many teachers feel about CLIL, because of the requirement for both language and subject knowledge, while providing theoretical and practical routes towards successful practice for all.

**Consumer Protection and Online Auction
Platforms** - Christine Riefa 2016-03-03

Online auctions have undergone many transformations and continue to attract millions of customers worldwide. However these popular platforms remain understudied by legal scholars and misunderstood by legislators. This book explores the legal classification of online auction sites across a range of countries in Europe. Including empirical studies conducted on 28 online auction websites in the UK, the research focusses on the protection of consumers' economic rights and highlights the shortcomings that the law struggles to control. With examinations into important developments, including the Consumer Rights Directive and the latest case law from the CJEU on the liability of intermediaries, Riefa anticipates changes in the law, and points out further changes that are needed to create a safe legal environment for consumers, whilst preserving the varied business model adopted by online auction sites. The study provides insights into how technical measures as well as a tighter legislative framework or enforcement pattern could provide consumers with better protection, in turn reinforcing trust, and ultimately benefiting the online auction platforms themselves.

The Cosmopolitan Imagination - Gerard Delanty 2009-10-08

Gerard Delanty provides a comprehensive assessment of the idea of cosmopolitanism in social and political thought which links cosmopolitan theory with critical social theory. He argues that cosmopolitanism has a critical dimension which offers a solution to one of the weaknesses in the critical theory tradition: failure to respond to the challenges of globalization and intercultural communication. Critical cosmopolitanism, he proposes, is an approach that is not only relevant to social scientific analysis but also normatively grounded in a critical attitude. Delanty's argument for a critical, sociologically oriented cosmopolitanism aims to avoid, on the one hand, purely normative

conceptions of cosmopolitanism and, on the other, approaches that reduce cosmopolitanism to the empirical expression of diversity. He attempts to take cosmopolitan theory beyond the largely Western context with which it has generally been associated, claiming that cosmopolitan analysis must now take into account non-Western expressions of cosmopolitanism.

Second Language Listening - John Flowerdew 2005-02-07

As an essential part of communicative competence, listening is a skill which deserves equal treatment with the other basic skills of speaking, reading, and writing. *Second Language Listening* combines up-to-date listening theory with case studies of actual pedagogical practice. The authors describe current models of listening theory and exemplify each with a textbook task. They address the role of technology in teaching listening, questioning techniques, and testing. *Second Language*

Listening is designed to be used with both pre-service and in-service teachers who are involved in the teaching of listening or the design of pedagogic materials for listening.

The Lost Beliefs of Northern Europe - Dr Hilda Ellis Davidson 2002-11-01

Fragments of ancient belief mingle with folklore and Christian dogma until the original tenets are lost in the myths and psychologies of the intervening years. Hilda Ellis Davidson illustrates how pagan beliefs have been represented and misinterpreted by the Christian tradition, and throws light on the nature of pre-Christian beliefs and how they have been preserved. *The Lost Beliefs of Northern Europe* stresses both the possibilities and the difficulties of investigating the lost religious beliefs of Northern Europe.

EBOOK: Engaging the Curriculum - Ronald Barnett 2004-10-16

There is greater interest than ever before in higher education: more money is being spent on it, more students are registered and more courses are being taught. And yet the matter that is arguably at the heart of higher education, the curriculum, is noticeable for its absence in public debate and in the literature on higher education. This book begins to redress the balance. Even though the term 'curriculum' may be missing from debates on higher education, curricula are changing rapidly and in significant ways. What we are seeing, therefore, is curriculum change by stealth, in which curricula are being reframed to enable students to acquire skills that have market value. In turn, curricula are running the risk of fragmenting as knowledge and skills exert their separate claims. Such a fragmented curriculum is falling well short of the challenges of the twenty-first century. A complex and uncertain world requires curricula in which students as human beings are

placed at their centre: what is called for are curricula that offer no less than the prospect of encouraging the formation of human being and becoming. A curriculum of this kind has to be understood as the imaginative design of spaces where creative things can happen as students become engaged. Based upon a study of curricula in UK universities, *Engaging the Curriculum in Higher Education* offers an uncompromising thesis about the development of higher education and is essential reading for those who care about its future.

EBOOK: Assessment Matters In Higher Education - Sally Brown 1999-02-16

Assessment really does matter in higher education. Internationally, academics - and those who support them - are seeking better ways to assess students, recognizing that diverse methods are available which may solve many of the problems associated with the evaluation of learning. Assessment Matters in Higher Education provides both theoretical perspectives and pragmatic advice on how to conduct effective assessment. It draws clearly on both relevant research and on its contributors' practical first hand experience (warts and all!). It asks, for example: how can assessment methods best become an integral part of learning? what strategies can be used to make

assessment fairer, more consistent and more efficient? how effective are innovative approaches to assessment, and in what contexts do they prosper? to what extent can students become involved in their own assessment? how can we best assess learning in professional practice contexts? This is an important resource for all academics and academic managers involved in assessing their students.

The Language of the Birds - Alisher Nava'i 2006-03-06

The Language of the Birds is a masterpiece of Eastern Turkish literature (now Uzbek), and was written by one of Central Asia's most prominent poets, Alisher Nava'i, shortly before his death in 1501. The story begins with the birds of the world realizing they are far from their king and so they begin their arduous journey with the assistance of the wise bird Hoopoe as their guide. Hoopoe listens to their complaints and excuses along the way and encourages them to seek true life even though the journey is sometimes painful. This epic poem in prose form contains many anecdotes and stories from the oral history of the Silk Road and Islam. Through this story, people are exhorted to rise above any excuse they might have in their spiritual pilgrimage. Alisher Nava'i (1441-1501) is renowned in Central Asia for his numerous writings and lasting influence in Uzbekistan as well as the contemporary Central Asian republics. In modern Uzbekistan, Nava'i is revered above all other poets and his presence is still found - streets, museums, and even a province and city are named after him. His proverbs are found throughout Central Asia and he is considered the father of the Uzbek

language. His words for peace and against oppression are as timely today as they were 5 centuries ago. Nava'i lived in Herat, Afghanistan. His writings, endowments, and his life example have had lasting influence in Central Asia. In *The Language of the Birds*, we are introduced to what Nava'i thought is important in life. It is a world of love that goes beyond the rational and is ready to endure anything for the beloved. This book is for anyone who values great historical literature, as well as those needing inspiration in his or her own pilgrimage in life.

Sparkling Student Creativity - Patti Drapeau
2014-09-23

Teaching isn't merely transmitting knowledge to students; it's also about teaching students to approach learning in engaging and unexpected ways. In *Sparkling Student Creativity: Practical Ways to Promote Innovative Thinking and Problem Solving*, author and researcher Patti Drapeau explores and explains research related to creativity and its relevance in today's standards-based, critical thinking-focused classroom. The book vividly and comprehensively shows * How creative lessons can meet and extend the expectations of curriculum standards such as the Common Core State Standards, * How to incorporate creativity and assessment into daily classroom practices, * How to develop a "Creativity Road Map" to guide instruction, and * How to design lessons that prompt and support creative thinking. In addition, the book includes 40 "grab and go" ideas that infuse lesson plans with a spirit of exploration. No matter what grade levels or content areas you teach, *Sparkling Student Creativity* will help you to produce creative lesson components that directly address critical content, target specific standards, and require thoughtful products from students as they grow into independent learners and become successful students and adults.

Primitive Religion - Robert Harry Lowie 1924

Communicating Gender in Context - Helga Kotthoff 1997-01-01

The contributions to the book *Communicating Gender in Context* deal not only with grammatical gender, but also with discursive procedures for constructing gender as a relevant social category in text and context. Attention is directed to European cultures which till now have come up short in linguistic and discourse analytic gender studies, e.g., Austria, Spain, Turkey, Germany, Poland and Sweden. But also English speech communities and questions of English grammatical gender are dealt with. In accordance with recent sociolinguistic research the contributors refrain from generalizing theses about how men and women normally speak; no conversational style feature adheres so firmly to one sex as was thought in early feminism. The studies, however, show that even today the feminine gender is often staged in a way that leads to situative asymmetry to the advantage of men. The broader societal context of patriarchy does not determine all communicative encounters, but demands particular efforts from women and men to be subverted.

Language and the Sexes - Francine Frank 1983-01-01

In a highly readable and lively text, the authors explore the way language mirrors our cultural assumptions, especially those concerned with gender distinctions. Focusing on contemporary issues, they draw on their knowledge of sociolinguistics and other languages to illustrate

how sexism may be hidden by habits of language. In making the reader aware of these, they suggest options for change. Language and the Sexes synthesizes a wide range of up-to-date information and research under several topics: naming, stereotypes of language behavior, the politics of conversation, forms of address, asymmetry in vocabulary, and possibilities of reform. The book concludes with suggested projects related to these topics, guidelines for non-discriminatory language use, and an extensive bibliography.
