*Beyond the Enclave* - Timothy Kondo 2011

*Beyond the Enclave* sets out to unravel the contradiction of a country, Zimbabwe, where a rich, diverse resource base co-exists with endemic poverty. One reason lies in the colonial economy, which was predicated on an ideology of white supremacy, creating an enclave formal economy employing one-fifth of the

labour force. Yet over three decades after independence, the non-formal segment has become even more entrenched. This book assesses Zimbabwe's economy through three main phases: 1980- 0 when a strong social policy framework proved difficult to sustain due to erratic growth, and 1991- 6, when "structural adjustment" demanded a market-driven approach to development. The

third phase is characterized by crisis-management leading to policy inconsistencies and reversals. Not surprisingly, such incoherence saw the economy descend into hyperinflation and paralysis in 2007- 8, leading to the signing of the Global Political Agreement in September 2008. In the absence of formal dollarization, economic recovery after the adoption of the multi-currency regime has remained fragile, leaving an estimated 70 per cent of the population outside the banking system. This has further entrenched uneven (enclave) growth as the economy remains locked in a low-income poverty trap. There is a need to facilitate transition towards formality to promote decent jobs. Furthermore, a strategic, developmental role for the state in the economy is now widely recognized as vital for development. Beyond the Enclave argues for a new approach to development in Zimbabwe based on pro-poor and inclusive strategies, which will contribute to the well-

being of all of its citizens and wise stewardship of its resources. It offers suggestions on policy formulation, implementation, monitoring and evaluation in all sectors, designed to promote inclusive growth and humane development.

**Africa's Lions** - Haroon Borat  
2016-11-08

Examining the economic forces that will shape Africa's future. Africa's Lions examines the economic growth experiences of six fast growing and/or economically dominant African countries. Expert African researchers offer unique perspectives into the challenges and issues in Ethiopia, Ghana, Kenya, Mozambique, Nigeria, and South Africa. Despite a growing body of research on African economies, very little has focused on the relationship between economic growth and employment outcomes at the detailed country level. A lack of empirical data has deprived policymakers of a robust evidence base on which to make informed decisions. By

harnessing country-level household, firm, and national accounts data together with existing analytical country research—the authors have attempted to bridge this gap. The growth of the global working-age population to 2030 will be driven primarily by Africa, which means that the relationship between growth and employment should be understood within the context of each country's projected demographic challenge and the associated implications for employment growth. A better understanding of the structure of each country's workforce and the resulting implications for human capital development, the vulnerably employed, and the working poor, will be critical to informing the development policy agenda. As a group, the six countries profiled in Africa's Lions will largely shape the continent's future. Each country chapter focuses on the complex interactions between economic growth and employment outcomes, within the individual Africa's Lions context.

**I Will Always Write Back** - Martin Ganda 2015-04-14

The New York Times bestselling true story of an all-American girl and a boy from Zimbabwe -- and the letter that changed both of their lives forever. It started as an assignment. Everyone in Caitlin's class wrote to an unknown student somewhere in a distant place. Martin was lucky to even receive a pen-pal letter. There were only ten letters, and fifty kids in his class. But he was the top student, so he got the first one. That letter was the beginning of a correspondence that spanned six years and changed two lives. In this compelling dual memoir, Caitlin and Martin recount how they became best friends--and better people--through their

long-distance exchange. Their story will inspire you to look beyond your own life and wonder about the world at large and your place in it.

Reading in the mobile era - West, Mark 2014-04-28  
Millions of people do not read for one reason: they do not have access to text. But mobile phones and cellular networks are transforming a scarce resource into an abundant one. Drawing on the analysis of over 4,000 surveys collected in seven developing countries and corresponding qualitative interviews, this report paints a

detailed picture of who reads books and stories on mobile devices and why. The findings illuminate, for the first time, the habits, beliefs and profiles of mobile readers in developing countries. This information points to strategies to expand mobile reading and, by extension, the educational and socio-economic benefits associated with increased reading. Mobile technology can advance literacy and learning in underserved communities around the world. This report shows how.

Major Trends in Education, 1981-1983 - 1984

Education and Development in Zimbabwe - Edward Shizha 2012-01-01

The book represents a contribution to policy formulation and design in an increasingly knowledge economy in Zimbabwe. It challenges scholars to think about the role of education, its funding and the egalitarian approach to widening access to education. The nexus between education, democracy and

policy change is a complex one. The book provides an illuminating account of the constantly evolving notions of national identity, language and citizenship from the Zimbabwean experience. The book discusses educational successes and challenges by examining the ideological effects of social, political and economic considerations on Zimbabwe's colonial and postcolonial education. Currently, literature on current educational challenges in Zimbabwe is lacking and there is very little published material on these ideological effects on educational development in Zimbabwe. This book is likely to be one of the first on the impact of social, political and economic meltdown on education. The book is targeted at local and international academics and scholars of history of education and comparative education, scholars of international education and development, undergraduate and graduate students, and professors who are interested in educational

development in Africa, particularly Zimbabwe. Notwithstanding, the book is a valuable resource to policy makers, educational administrators and researchers and the wider community. Shizha and Kariwo's book is an important and illuminating addition on the effects of social, political and economic trajectories on education and development in Zimbabwe. It critically analyses the crucial specifics of the Zimbabwean situation by providing an in depth discourse on education at this historical juncture. The book offers new insights that may be useful for an understanding of not only the Zimbabwean case, but also education in other African countries. Rosemary Gordon, Senior Lecturer in Educational Foundations, University of Zimbabwe Ranging in temporal scope from the colonial era and its elitist legacy through the golden era of populist, universal elementary education to the disarray of contemporary socioeconomic crisis; covering elementary through higher

education and touching thematically on everything from the pernicious effects of social adjustment programmes through the local deprofessionalization of teaching, this text provides a comprehensive, wide ranging and yet carefully detailed account of education in Zimbabwe. This engagingly written portrayal will prove illuminating not only to readers interested in Zimbabwe's education specifically but more widely to all who are interested in how the sociopolitical shapes education- how ideology, policy, international pressures, economic factors and shifts in values collectively forge the historical and contemporary character of a country's education. Handel Kashope Wright, Professor of Education, University of British Columbia

*A History of Zimbabwe* - Alois S. Mlambo 2014-04-07

The first single-volume history of Zimbabwe with detailed coverage from pre-colonial times to the present, this book examines Zimbabwe's pre-colonial, colonial and

postcolonial social, economic and political history and relates historical factors and trends to recent developments in the country. Zimbabwe is a country with a rich history, dating from the early San hunter-gatherer societies. The arrival of British imperial rule in 1890 impacted the country tremendously, as the European rulers exploited Zimbabwe's resources, giving rise to a movement of African nationalism and demands for independence. This culminated in the armed conflict of the 1960s and 1970s and independence in 1980. The 1990s were marked by economic decline and the rise of opposition politics. In 1999, Mugabe embarked on a violent land reform program that plunged the nation's economy into a downward spiral, with political violence and human rights violations making Zimbabwe an international pariah state. This book will be useful to those studying Zimbabwean history and those unfamiliar with the country's past.

**Implementing Deeper Learning and 21st Century Education Reforms** -

Fernando M. Reimers  
2020-11-04

This open access book is a comparative analysis of recent large scale education reforms that broadened curriculum goals to better prepare students for the 21st century.

The book examines what governments actually do when they broaden curriculum goals, with attention to the details of implementation. To this end, the book examines system level reforms in six countries at various levels of development. The study includes system level reforms in jurisdictions where students achieve high levels in international assessments of basic literacies, such as Singapore and Ontario, Canada, as well as in nations where students achieve much lower levels, such as Kenya, Mexico, Punjab-Pakistan and Zimbabwe. The chapters examine system-level reforms that focus on strengthening the capacity to teach the basics, as in Ontario and Pakistan, as well as reforms that aim at building the capacity to teach a much broader set of competencies and skills, such as Kenya, Mexico, Singapore and Zimbabwe. The volume includes systems at very different levels of spending per student and reforms at various points in the cycle of policy implementation, some just

starting, some struggling to survive a governmental transition, and others that have been in place for an extended period of time. From the comparative study of these reforms, we aim to provide an understanding of how to build the capacity of education systems to teach 21st century skills at scale in diverse settings.
