The Commerce between the Roman Empire and India - E. H. Warmington
2014-09-25

Originally published in 1928, this detailed book examines the beginnings, progress and substance of the trade between India and the Roman Empire from Augustus to Marcus Aurelius. Warmington presents this history from a western point of view, and uses a wide range of ancient literary sources to explore what goods were traded between the two regions and the mechanisms of that trade. This thoroughly researched book will be of value to anyone with an interest in ancient trade and

connections between the Roman Empire and its neighbours.

The Dravidian Languages - Sanford B. Steever 2019-12-18

The Dravidian language family is the world's fourth largest with nearly 250 million speakers across South Asia from Pakistan to Nepal, from Bangladesh to Sri Lanka. This authoritative reference source provides a unique description of the languages, covering their grammatical structure and historical development, plus sociolinguistic features. Each chapter combines a modern linguistic perspective with traditional historical linguistics, and a uniform structure allows for easy typological comparison between the individual languages. New to this edition are chapters on Beṭṭa Kuṟumba, Kuṟux, Kūvi and Malayāḷam, and enlarged sections in various existing chapters, as well as updated bibliographies and demographic data throughout. The Dravidian Languages will be invaluable to students and researchers within linguistics, and will also be of interest to readers in the fields of comparative literature, areal linguistics and South Asian studies.

Adiyogi - Sadhguru 2017-02-23

"Shiva does not spell religion. Shiva spells responsibility -- our ability to take our very life process in our hands." -- Sadhguru 'Shi-va' is 'that which is not', a primordial emptiness; Shiva is also the first-ever yogi, Adiyogi, the one who first perceived this emptiness. Adiyogi is symbol and myth, historic figure and living presence, creator and destroyer, outlaw and ascetic, cosmic dancer and passionate lover, all at once. A book like no other, this extraordinary document is a tribute to Shiva, the Adiyogi, by a living yogi; a chronicle of the progenitor of mysticism by a contemporary mystic. Here science and philosophy merge seamlessly, so do silence and sound, question and answer--to capture the unspeakable enigma of Adiyogi in a spellbinding wave of words and ideas that will leave one entranced, transformed.

World Investment Report 2020 - United Nations Conference on Trade and Development (UNCTAD) 2020-07-15

The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated

section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action.

Groundwater Resources Development and Planning in the Semi-Arid Region - Chaitanya B. Pande 2021-05-27

This book addresses the various challenges in achieving sustainable groundwater development, management, and planning in semi-arid regions, with a focus on India, and discusses advanced remote sensing and GIS techniques for the estimation and management of groundwater resources. The book is timely as there is a need for a better

understanding of the various tools and methods required to efficiently and sustainably meet the growing demand for clean surface and groundwater in developing countries, and how these tools can be combined with other strategies in a multi-disciplinary fashion to achieve this goal in water-scarce regions. To wit, the book combines remote sensing and GIS techniques, runoff modeling, aquifer mapping, land use and land cover analyses, evapotranspiration estimation, crop coefficients, and water policy approaches. This will be of use to academics, policymakers, social scientists, and professionals involved in the various aspects of sustainable groundwater development, planning, and management.

The Philosophy of Psychology - George Botterill 1999-08-19

What is the relationship between common-sense, or 'folk', psychology and contemporary scientific psychology? Are they in conflict with one another? Or do they perform quite different, though perhaps complementary, roles? George Botterill and Peter Carruthers discuss these questions, defending a robust form of realism about the commitments of folk psychology and about the prospects for integrating those commitments into natural science. Their focus throughout the book is on the ways in which cognitive science presents a challenge to our common-sense self-image - arguing that our native conception of the

mind will be enriched, but not overturned, by science. The Philosophy of Psychology is designed as a textbook for upper-level undergraduate and beginning graduate students in philosophy and cognitive science, but as a text that not only surveys but advances the debates on the topics discussed, it will also be of interest to researchers working in these areas.

Madras Miscellany - Muthiah S 2011

This book marks a decade of a column that appears every Monday in The Hindu's Metro Plus, Madras edition. Madras Miscellany has, over that decade, created an awareness and a greater appreciation of the significant past of Madras and of the events and the people who over the years made Madras "the first city of modern India", a description of the City the writer of the column, S.Muthiah, never tires of reiterating. Over a 1500 or so items that appeared in the 514 columns published during Madras Miscellany's first decade appear in the book in three sections: 'People', 'Places' and 'Potpourri', the last named being everything else that doesn't fit into the other two sections. And in them there develops a rather comprehensive story of Madras over its nearly 375 years of history. In sum, this is a book for anyone interested in the development of Madras and its considerable contribution to modern India.

An Uncertain Glory - Jean Drèze 2013-08-11

When India became independent in 1947 after two centuries of colonial rule, it immediately adopted a firmly democratic political system, with multiple parties, freedom of speech, and extensive political rights. The famines of the British era disappeared, and steady economic growth replaced the economic stagnation of the Raj. The growth of the Indian economy quickened further over the last three decades and became the second fastest among large economies. Despite a recent dip, it is still one of the highest in the world. Maintaining rapid as well as environmentally sustainable growth remains an important and achievable goal for India. In *An Uncertain Glory*, two of India's leading economists argue that the

country's main problems lie in the lack of attention paid to the essential needs of the people, especially of the poor, and often of women. There have been major failures both to foster participatory growth and to make good use of the public resources generated by economic growth to enhance people's living conditions. There is also a continued inadequacy of social services such as schooling and medical care as well as of physical services such as safe water, electricity, drainage, transportation, and sanitation. In the long run, even the feasibility of high economic growth is threatened by the underdevelopment of social and physical infrastructure and the neglect of human capabilities, in contrast with the Asian approach of simultaneous pursuit of economic growth and human development, as pioneered by Japan, South Korea, and China. In a democratic system, which India has great reason to value, addressing these failures requires not only significant policy rethinking by the government, but also a clearer public understanding of the abysmal extent of social and economic deprivations in the country. The deep

inequalities in Indian society tend to constrict public discussion, confining it largely to the lives and concerns of the relatively affluent. Drèze and Sen present a powerful analysis of these deprivations and inequalities as well as the possibility of change through democratic practice.
