Denver Inside and Out -
Michael Childers 2011-08-01
Denver turned 150 just a few
years ago--not too shabby for a
city so down on its luck in 1868
that Cheyenne boosters

deemed it "too dead to bury."
Still, most of the city's history
is a recent memory: Denver's
entire story spans just two
human lifetimes. In Denver
Inside and Out, eleven authors

illustrate how pioneers built enduring educational, medical, and transportation systems; how Denver's social and political climate contributed to the elevation of women; how Denver residents wrestled with-and exploited-the city's natural features; and how diverse cultural groups became an essential part of the city's fabric. By showing how the city rose far above its humble roots, the authors illuminate the many ways that Denver residents have never stopped imagining a great city. Published in time for the opening of the new History Colorado Center in Denver in 2012, *Denver Inside and Out* hints at some of the social, economic, legal, and environmental issues that Denverites will have to consider over the next 150 years.

U.S. Landscape Ordinances -

Buck Abbey 1998-09-07
State-by-state listings and explanations of municipal landscape ordinances In *U.S. Landscape Ordinances*, Buck Abbey furnishes landscape

architects, planners, land-use attorneys, and students with a much-needed resource. This state-by-state presentation demystifies the complex planning laws and ordinances that determine landscape design parameters for more than 300 American cities. The author highlights sections of each ordinance that pertain to landscape architecture, boils the legalese down to plain English, explains the law's main purpose and regulatory function, and spells out the practical implications from a design perspective. With the help of more than fifty diagrams and drawings that clarify complex spatial concepts, *U.S. Landscape Ordinances* reviews the entire spectrum of green laws currently on the books, including ordinances that cover: * Parking lots and vehicular use areas * Landscape buffers and screens * Street tree plantings * Open space design * Irrigation * Land clearing and building sites The product of ten years of painstaking research and

analysis, U.S. Landscape Ordinances is a unique and invaluable tool for professionals in landscape design and municipal planning. It also offers a deep reservoir of information for students, municipal legislators, community activists, and anyone interested in understanding or developing a community's landscape ordinances.

Fractured Communities - Anthony E. Ladd 2018-03-23
While environmental disputes and conflicts over fossil fuel extraction have grown in recent years, few issues have been as contentious in the twenty-first century as those surrounding the impacts of unconventional natural gas and oil development using hydraulic drilling and

fracturing techniques—more commonly known as “fracking”—on local communities. In *Fractured Communities*, Anthony E. Ladd and other leading environmental sociologists present a set of crucial case studies analyzing the differential risk perceptions, socio-environmental impacts, and mobilization of citizen protest (or quiescence) surrounding unconventional energy development and hydraulic fracking in a number of key U.S. shale regions. *Fractured Communities* reveals how this contested terrain is expanding, pushing the issue of fracking into the mainstream of the American political arena.

Unfair Housing - Mara S. Sidney 2003

It is difficult to ignore the fact that, even as the United States becomes much more racially and ethnically diverse, our neighborhoods remain largely segregated. The 1968 Fair Housing Act and 1977 Community Reinvestment Act promised to end

discrimination, yet for millions of Americans housing options remain far removed from the American Dream. Why do most neighborhoods in American cities continue to be racially divided? The problem, suggests Mara Sidney, lies with the policies themselves. She contends that to understand why discrimination persists, we need to understand the political challenges faced by advocacy groups who implement them. In *Unfair Housing* she offers a new explanation for the persistent color lines in our cities by showing how weak national policy has silenced and splintered grassroots activists. Sidney explains how political compromise among national lawmakers with divergent interests resulted in housing legislation that influenced how community activists defined discrimination, what actions they took, and which political relationships they cultivated. As a result, local governments became less likely to include housing discrimination on their agendas, existing laws went

unenforced, and racial segregation continued. A former undercover investigator for a fair housing advocacy group, Sidney takes readers into the neighborhoods of Minneapolis and Denver to show how federal housing policy actually works. She examines how these laws played out in these cities and reveals how they eroded activists' capability to force more sweeping reform in housing policy. Sidney also shows how activist groups can cultivate community resources to overcome these difficulties, looking across levels of government to analyze how national policies interact with local politics. In the first book to apply policy design theories of Anne Schneider and Helen Ingram to an empirical case, Sidney illuminates overlooked impacts of fair housing and community reinvestment policies and extends their theories to the study of local politics and nonprofit organizations. Sidney argues forcefully that understanding the link between national

policy and local groups sheds light on our failure to reduce discrimination and segregation. As battles over fair housing continue, her book helps us understand the shape of the battlefield and the prospects for victory.

Marijuana Law, Policy, and Authority - Robert A. Mikos
2017-05-18

Marijuana Law, Policy, and Authority is a first-of-its-kind law school casebook in a rapidly-emerging and exciting new field. The accessible, comprehensive, and engaging material guides students through the competing approaches to regulating marijuana, the purposes and effects of those approaches, and the legal authorities for choosing among them. The helpful organization intersperses these issues of substantive law, policy, and authority throughout the discussion of users, suppliers, and third parties. Substantive law materials cover either prohibitions or regulations targeting users, suppliers, or third parties. Policy materials

cover the goals of marijuana law and policy as well as the research on the impact of different marijuana policies. Authority materials address the different levels of government—federal, state, and local. Notes, questions, and numerous problems in each chapter provide additional thought-provoking material and help to reinforce student learning. Current, news-headlining cases keep the discussion interesting and lively. Key Features: Internationally renowned author Robert Mikos is the premier authority on marijuana law. He draws upon nearly a decade of professional experience teaching, lecturing, consulting, and writing about marijuana law and policy. Three distinct but inter-woven topics are covered: the substantive law governing marijuana; the policy rationales behind and outcomes produced by different approaches to regulating the drug; and the legal authority to regulate the drug. Students are guided through the multi-faceted legal

and policy issues now confronting lawyers, lawmakers, judges, and policy analysts working in this emerging field. Written in a style that is familiar to law students, but also accessible to a much broader audience, including graduate and upper level undergraduate students in courses in policy studies, political science, and criminology. Cutting-edge issues are included that are intellectually engaging for students and professors alike—e.g., how are conflicts between state/ federal law resolved? What are the roles of courts and executive officers in terms of policy? Dives deeply into classic legal issues: contract enforceability and powers of court, Congress, and the state. Notes and Questions following cases offer stimulating fodder for discussion.

Seven Rules for Sustainable Communities

Patrick M. Condon 2012-02-13
Questions of how to green the North American economy, create a green energy and transportation infrastructure, and halt the deadly increase in greenhouse gas buildup dominate our daily news. Related questions of how the design of cities can impact these challenges dominate the thoughts of urban planners and designers across the U.S. and Canada. With admirable clarity, Patrick Condon discusses transportation, housing equity, job distribution, economic development, and ecological systems issues and synthesizes his knowledge and research into a simple-to-understand set

of urban design rules that can, if followed, help save the planet. No other book so clearly connects the form of our cities to their ecological, economic, and social consequences. No other book takes on this breadth of complex and contentious issues and distills them down to such convincing and practical solutions. And no other book so vividly compares and contrasts the differing experiences of U.S. and Canadian cities. Of particular new importance is how city form affects the production of planet-warming greenhouse gases. The author explains this relationship in an accessible way, and goes on to show how conforming to seven simple rules for community design could literally do a world of good. Each chapter in the book explains one rule in depth, adding a wealth of research to support each claim. If widely used, Condon argues, these rules would lead to a much more livable world for future generations—a world that is not unlike the better parts of our own.

Startup Communities - Brad Feld 2020-06-26

First published in 2012, *Startup Communities* became a blueprint for what it takes to build a supportive entrepreneurial community. Now regarded as a classic, the "Boulder Thesis" created and popularized by Feld within the book generated enormous media attention nearly a decade ago. At that time, Boulder was an emerging startup laboratory—a hub of innovation building new tech businesses. It quickly accelerated into a world class ecosystem for entrepreneurs. Boulder's entrepreneurial density, combined with the geographic concentration of entrepreneurial activity around the Boulder downtown core, made it a hotbed of startup activity. Feld was and is still there, as a keen observer and one of its leaders. As he notes

simply in the new edition, humans are wired to start things. In a sense, that short Feld-ism accurately describes the startup revolution still taking hold throughout the world. Boulder is proof that innovation can happen anywhere, in any city. Thanks in part to the book, what happens in Boulder now leaves Boulder. Rapidly growing startup communities in Atlanta, Detroit, Denver, Kansas City, Nashville, and Indianapolis are just a few examples. Over the last decade, Feld has dispelled the myth that startups can only thrive in Silicon Valley. Startup communities continue to pop up across the U.S. and around the world, prompting fresh new revelations and stories from Feld about what's happened over the last decade. Startup Communities 2e describes what makes a startup community ecosystem first click, then hum, and in time, excel. From Boulder to Beijing and beyond, entrepreneurial ecosystems are driving innovation. Startup Communities 2e discusses and

the necessary dynamics and pre-conditions of building communities of entrepreneurs who can feed off each other's talent, creativity, and support. In Startup Communities 2e, Feld will help you understand: The core principles of a vibrant startup community, re-examining his Boulder Thesis and exploring other historical frameworks. The attributes of leadership in a startup community that can help it thrive along with the classical problems any community will face during development. The importance of a university in a startup community, and how large companies can engage effectively with entrepreneurs. The importance of continuous improvement so growth does not stagnate. The common myths about startup communities. The opportunities to build startup communities in non-urban, or rural, places that are much less populated.

Private Equity, Corporate Governance and the Dynamics of Capital Market Regulation - Justin O'Brien
2007

Global capital markets are in a state of flux. Castigated in the past as OC Barbarians at the GateOCO, private equity providers are once again proclaiming the end of the public corporation. This important book addresses the implications of private equity for the governance of corporations, the capital markets in which they operate and the professionals who provide corporate advisory services. The book evaluates and ranks the precise nature of the risk posed by private equity by situating it within an overarching analysis of the dynamics of financial capitalism. Key issues addressed include: the management of conflicts of interest, fiduciary duties, the role of enforcement, the efficacy of adopting a rules- or principles-based system of regulation, the form and function of compliance, and a detailed examination of how to embed accountability into an integrity system for the financial markets. The book therefore has enormous benefit

for industry, regulatory and academic communities alike. Sample Chapter(s). Introduction: The Dynamics of Capital Market Governance (157 KB). Chapter 1: The Conceptual Underpinnings of Australian Securities Regulation (116 KB). Contents: Introduction: The Dynamics of Capital Market Governance (J O'Brien); The Conceptual Underpinnings of Australian Securities Regulation (M Rodgers); Evolving OCyRules of the GameOCO in Corporate Governance Reform (J Hill); Overlapping Fields and Constructed Legalities: The Endogeneity of Law (L B Edelman); The Significance of Relative Autonomy in How Regulation of the Financial Services Sector Evolves (G Gilligan); ASIC v Citigroup: Investment Banks, Conflicts of Interest, and Chinese Walls (P F Hanrahan); Enforcement of Capital Markets Regulation: The United Kingdom and Its International Markets (I MacNeil); Why Auditors Don't Find Fraud (N M Hodson); Compliance, Ethics and

Responsibility: Emergent Governance Strategies in the US and UK (D McBarnet); Professional Norms (D Cocking); Sarbanes-Oxley and the Search for Accountable Corporate Governance (M J Dubnick); Charting an Icarian Flightpath: The Implications of the Qantas Deal Collapse (J O'Brien); Institutions, Integrity Systems and Market Actors (S Miller). Readership: Postgraduate law and business students; also suitable for general informed market (e.g. investment bankers, compliance professionals, providers of corporate advisory services including lawyers, tax advisors and auditors). *Sale of Communities* - United States. To view or download the 2021 Supplement to this book click [here](#). The authors of this casebook are committed to reflect fully the dynamism, controversy, and excitement that characterize contemporary constitutional law. While generally striving for brevity, the authors lightly edit cases where the Court appears to be embarking on a new doctrinal course so that sharply different constitutional philosophies are fully and fairly presented. Features of the new Eighth Edition include: *Hamdan v. Rumsfeld* -- the legality of the use of military commissions by the Executive Branch. *Boumediene v. Bush* -- alien enemy combatants detained at Guantanamo and "the constitutional privilege of habeas corpus". *District of Columbia v. Heller* and *McDonald v. City of Chicago* -- the personal right to keep and bear arms vis-a-vis federal and state governments. *Gonzales v. Carhart* -- limiting the abortion right. *United Haulers Association, Inc. v. Oneida-Herkimer Solid Waste*

Management Authority -- state regulation of solid waste and the dormant Commerce Clause
Parents Involved in Community Schools v. Seattle School District No. 1 -- affirmative action in the public schools. In the area of free expression, among the many cases featured are: Holder v. Humanitarian Law Project -- national security v. political advocacy. Snyder v. Phelps -- offensive speech and funeral picketing. Morse v. Frederick -- student speech in the high schools. Garcetti v. Ceballos -- free expression rights of government employees. United States v. Stevens -- animal cruelty and the limits of freedom of expression. Brown v. Entertainment Merchants Association -- protecting children from violent video games. Citizens United v. Federal Elections Commission - - unleashing campaign spending by corporations and unions. The new 8th edition includes some of the latest law review literature as well as the leading constitutional cases covered in the previous edition.

Constitutional Law: Principles and Policies is updated annually with a supplement addressing recent developments in the area of Constitutional Law. This book also is available in a three-hole punched, alternative loose-leaf version printed on 8.5 x 11 inch paper with wider margins and with the same pagination as the hardbound book.
