Great Rivals in History -

Joseph Cummins 2008

When two supremely powerful political rivals lock horns in a clash of personality and ideology, they can change the course of human history.

The Politics of Resentment -

Katherine J. Cramer

2016-03-23

Since the election of Scott Walker, Wisconsin has been

seen as ground zero for debates about the appropriate role of government in the wake of the Great Recession. In a time of rising inequality, Walker not only survived a bitterly contested recall that brought thousands of protesters to Capitol Square, he was subsequently reelected. How could this happen? How is it that the very people who

stand to benefit from strong government services not only vote against the candidates who support those services but are vehemently against the very idea of big government? With *The Politics of Resentment*, Katherine J. Cramer uncovers an oft-overlooked piece of the puzzle: rural political consciousness and the resentment of the “liberal elite.” Rural voters are distrustful that politicians will respect the distinct values of their communities and allocate a fair share of resources. What can look like disagreements about basic political principles are therefore actually rooted in something even more fundamental: who we are as people and how closely a candidate’s social identity matches our own. Using Scott Walker and Wisconsin’s prominent and protracted debate about the appropriate role of government, Cramer illuminates the contours of rural consciousness, showing how place-based identities profoundly influence how people understand politics,

regardless of whether urban politicians and their supporters really do shortchange or look down on those living in the country. *The Politics of Resentment* shows that rural resentment—no less than partisanship, race, or class—plays a major role in dividing America against itself.

Who Gets What? - Frances McCall Rosenbluth 2021-07-29
As stable political alliances in democracies have dissolved, populism deepens social and economic divisions rather than addressing economic insecurity.

Politics in America - Thomas R. Dye 2008

With a focus on competition for resources, this balanced, but provocative text uses Harold Laswell’s classic definition of politics—“Who gets what, when, and how”—as a framework for presenting a clear, cohesive and stimulating introduction to the American political system. Thomas Dye, along with new co-author Bartholomew Sparrow, has written a lively and absorbing narrative examining the struggle for

power that is American politics: the participants, the stakes, the processes, and the institutions. Numerous feature boxes explore timely issues, draw cross-cultural comparisons, promote critical thinking, and provoke thoughtful opinions. The alternate edition of this classic text includes the exact same coverage as the comprehensive version but without the policy chapters. With the intense political conflict of the most expensive presidential campaign in American history and the hotly-contested primary campaigns that led to the national conventions in 2008, *Politics in America's* theme of the constant competition for power and resources—"who gets what"—has never been more relevant.

It's Time to Fight Dirty -

David Faris 2019-01-15

An accessible, actionable blueprint for how Democrats can build lasting, durable change—without having to amend the Constitution The American electoral system is clearly falling apart—more

than one recent presidential race has resulted in the clear winner of the popular vote losing the electoral college vote, and Trump's refusal to concede in 2020 broke with all precedents...at least for now. Practical solutions need to be implemented as soon as possible. And so in *It's Time to Fight Dirty*, political scientist David Faris outlines accessible, actionable strategies for American institutional reform which don't require a constitutional amendment, and would have a lasting impact on our future. With equal amounts of playful irreverence and persuasive reasoning, Faris describes how the Constitution's deep democratic flaws constantly put progressives at a disadvantage, and lays out strategies for "fighting dirty" though obstructionism and procedural warfare: establishing statehood for DC and Puerto Rico; breaking California into several states; creating a larger House of Representatives; passing a new voting rights act; and expanding the Supreme Court.

The Constitution may be the world's most difficult document to amend, but Faris argues that many of America's democratic failures can be fixed within its rigid confines—and, at a time when the stakes have never been higher, he outlines a path for long-term, progressive change in the United States so that the electoral gains of 2020 aren't lost again.

[The Political Writings of Harold D. Lasswell](#) - Harold Dwight Lasswell 2017-07-11

Excerpt from *The Political Writings of Harold D. Lasswell: Psychopathology and Politics; Politics: Who Gets What, When, How; Democratic Character* When we contemplate the ebb and flow of public life, it is possible to make sense Of it as marking the rise or fall Of social classes, or skill groups, or attitude groups, or personality types. If we think of politics from a manipulative standpoint, it is appropriate to consider the strategy and tactics of handling violence, goods, symbols, and practices. The succinct and abundant examples used in the *Politics* made it comprehensible to students and laymen alike. Politics: Who Gets What, When, How - Harold D. Lasswell
2018-12-05

Politics: Who Gets What, When, How, which was first published in 1936, is the classic analysis of power and manipulation by ruling elites and counter-elites. The themes that occur throughout this essay have become the guideposts for most modern research in techniques of propaganda and political organization. "It is unquestionably one of the most influential treatments of politics published in this century."—David B. Truman, Prof. of Public Law and Government, Columbia University "This book is a

landmark of modern political science."—Daniel Lerner, Professor of Sociology, M.I.T. "For over three decades the students of politics have had their intellectual horizons constantly broadened by Harold Lasswell. There is probably no man in American political science who has brought to bear as many new approaches to the analysis of political behaviour as he has. There is perhaps no better way to get the essence of Lasswell's thought than in his book, *Politics: Who Gets What, When, How*."—Seymour Martin Lipset, Department of Sociology, U.C. Berkeley
Politics Lost - Joe Klein 2006
One of today's top political observers dissects the last 35 years of American politics as he shows how Democrats have lost the country's support and why the Republicans have, in so many instances, dominated the political agenda.

Who Enters Politics and Why? -

Weinberg, James 2020-07-22

Exploring unique survey and interview data on the personality characteristics of British politicians, this book provides a timely psychological analysis of those individuals who pursue political careers and how they represent their constituents once elected.

Focusing specifically on the Basic Human Values of more than 150 MPs as well as hundreds of local councillors, Weinberg offers original insights into three compelling questions: Who enters politics and how are they different to the general public? Do politicians' personality characteristics matter for their legislative behaviour? Do voters really get the 'wrong' politicians? Taking a fresh psychological approach to issues that are predominant in

political science, this book casts new light on the human side of representative democracy.

Forward - Andrew Yang
2021-10-05

NATIONAL BESTSELLER • A

lively and bold blueprint for moving beyond the “era of institutional failure” by transforming our outmoded political and economic systems to be resilient to twenty-first-century problems, from the popular entrepreneur, bestselling author, and political truth-teller “A vitally important book.”—Mark Cuban Despite being written off by the media, Andrew Yang’s shoestring 2020 presidential campaign—powered by his proposal for a universal basic income of \$1,000 a month for all Americans—jolted the political establishment, growing into a massive, diverse movement. In *Forward*, Yang reveals that UBI and the threat of job automation are only the beginning, diagnosing how a series of cascading problems within our antiquated systems keeps us stuck in the

past—imperiling our democracy at every level. With America’s stagnant institutions failing to keep pace with technological change, we grow more polarized as tech platforms supplant our will while feasting on our data. Yang introduces us to the various “priests of the decline” of America, including politicians whose incentives have become divorced from the people they supposedly serve. The machinery of American democracy is failing, Yang argues, and we need bold new ideas to rewire it for twenty-first-century problems. Inspired by his experience running for office and as an entrepreneur, and by ideas drawn from leading thinkers, Yang offers a series of solutions, including data rights, ranked-choice voting, and fact-based governance empowered by modern technology, writing that “there is no cavalry”—it’s up to us. This is a powerful and urgent warning that we must step back from the brink and plot a new way forward for our democracy.

The Analysis of Political Behaviour - Harold Dwight Lasswell 2002

Why American History Is Not What They Say -

Winner-Take-All Politics - Jacob S. Hacker 2010

Analyzes the growing divide between the incomes of the wealthy class and those of middle-income Americans, exonerating popular suspects to argue that the nation's political system promotes greed and under-representation.

The Big Sort - Bill Bishop 2009-05-11

The award-winning journalist reveals the untold story of why America is so culturally and politically divided in this groundbreaking book. Armed with startling demographic data, Bill Bishop demonstrates how Americans have spent decades sorting themselves into alarmingly homogeneous communities—not by region or by state, but by city and neighborhood. With ever-increasing specificity, we

choose the communities and media that are compatible with our lifestyles and beliefs. The result is a country that has become so ideologically inbred that people don't know and can't understand those who live just a few miles away. In *The Big Sort*, Bishop explores how this phenomenon came to be, and its dire implications for our country. He begins with stories about how we live today and then draws on history, economics, and our changing political landscape to create one of the most compelling big-picture accounts of America in recent memory.

Divided Politics, Divided Nation

- Darrell M. West 2019-03-26
Why are Americans so angry with each other? The United States is caught in a partisan hyperconflict that divides politicians, communities—and even families. Politicians from the president to state and local office-holders play to strongly-held beliefs and sometimes even pour fuel on the resulting inferno. This polarization has become so intense that many people no longer trust anyone

from a differing perspective. Drawing on his personal story of growing up as a fundamentalist Christian on a dairy farm in rural Ohio, then as an academic in the heart of the liberal East Coast establishment, Darrell West analyzes the economic, cultural, and political aspects of polarization. He takes advantage of his experiences inside both conservative and liberal camps to explain the views of each side and offer insights into why each is angry with the other. West argues that societal tensions have metastasized into a dangerous tribalism that seriously threatens U.S. democracy. Unless people can bridge these divisions and forge a new path forward, it will be impossible to work together, maintain a functioning democracy, and solve the country's pressing policy problems.

The Politics - Aristotle

1981-09-17

Twenty-three centuries after its compilation, 'The Politics' still has much to contribute to this central question of political

science. Aristotle's thorough and carefully argued analysis is based on a study of over 150 city constitutions, covering a huge range of political issues in order to establish which types of constitution are best - both ideally and in particular circumstances - and how they may be maintained. Aristotle's opinions form an essential background to the thinking of philosophers such as Thomas Aquinas, Machiavelli and Jean Bodin and both his premises and arguments raise questions that are as relevant to modern society as they were to the ancient world.

Making Politics Work for Development - World Bank
2016-07-14

Governments fail to provide the public goods needed for development when its leaders knowingly and deliberately ignore sound technical advice or are unable to follow it, despite the best of intentions, because of political constraints. This report focuses on two forces—citizen engagement and transparency—that hold the key to solving government

failures by shaping how political markets function. Citizens are not only queuing at voting booths, but are also taking to the streets and using diverse media to pressure, sanction and select the leaders who wield power within government, including by entering as contenders for leadership. This political engagement can function in highly nuanced ways within the same formal institutional context and across the political spectrum, from autocracies to democracies. Unhealthy political engagement, when leaders are selected and sanctioned on the basis of their provision of private benefits rather than public goods, gives rise to government failures. The solutions to these failures lie in fostering healthy political engagement within any institutional context, and not in circumventing or suppressing it. Transparency, which is citizen access to publicly available information about the actions of those in government, and the consequences of these actions, can play a crucial role

by nourishing political engagement.

Producing Politics - Daniel Laurison 2022-06-14

The first book to uncover the hidden and powerful role campaign professionals play in shaping American democracy by delving into the exclusive world of politicos through off-the-record interviews. We may think we know our politicians, but we know very little about the people who create them. *Producing Politics* will change the way we think about our country's political candidates, the campaigns that bolster them, and the people who craft them. Political campaigns are designed to influence voter behavior and determine elections. They are supposed to serve as a conduit between candidates and voters: politicos get to know communities, communicate their concerns to candidates, and encourage individuals to vote. However, sociologist Daniel Laurison reveals a much different reality: campaigns are riddled with outdated strategies, unquestioned conventional

wisdom, and preconceived notions about voters that are more reflective of campaign professionals' implicit bias than the real lives and motivations of Americans. Through over 70 off-the-record interviews with key campaign staff and consultants, Laurison uncovers how the industry creates a political environment that is confusing, polarizing, and alienating to voters. Campaigns are often an echo chamber of staffers with replicate backgrounds and ideologies; most political operatives are white men from middle- to upper-class backgrounds who are driven more by their desire to climb the political ladder than the desire to create an open conversation between voter and candidate. *Producing Politics* highlights the impact of national campaign professionals in the US through a sociological lens. It explores the role political operatives play in shaping the way that voters understand political candidates, participate in elections, and perceive our democratic process—and is an

essential guide to understanding the current American political system. Essential von Mises, The - Murray Newton Rothbard 2009

Democracy and Political Ignorance - Ilya Somin
2013-10-02

One of the biggest problems with modern democracy is that most of the public is usually ignorant of politics and government. Often, many people understand that their votes are unlikely to change the outcome of an election and don't see the point in learning much about politics. This may be rational, but it creates a nation of people with little political knowledge and little ability to objectively evaluate what they do know. In *Democracy and Political Ignorance*, Ilya Somin mines the depths of ignorance in America and reveals the extent to which it is a major problem for democracy. Somin weighs various options for solving this problem, arguing that political ignorance is best mitigated and its effects lessened by

decentralizing and limiting government. Somin provocatively argues that people make better decisions when they choose what to purchase in the market or which state or local government to live under, than when they vote at the ballot box, because they have stronger incentives to acquire relevant information and to use it wisely.

Hooked - Markus Prior
2018-12-13

Political interest is the strongest predictor of 'good citizenship', yet little is known about it. This book explains why some people find politics interesting while others don't. Nation of Victims - Vivek Ramaswamy 2022-09-13
The New York Times bestselling author of *Woke Inc.* makes the case that the essence of true American identity is to pursue excellence unapologetically and reject victimhood culture. Hardship is now equated with victimhood. Outward displays of vulnerability in defeat are celebrated over winning

unabashedly. The pursuit of excellence and exceptionalism are at the heart of American identity, and the disappearance of these ideals in our country leaves a deep moral and cultural vacuum in its wake. But the solution isn't to simply complain about it. It's to revive a new cultural movement in America that puts excellence first again. Leaders have called Ramaswamy "the most compelling conservative voice in the country" and "one of the towering intellects in America," and this book reveals why: he spares neither left nor right in this scathing indictment of the victimhood culture at the heart of America's national decline. Following the success of his instant bestseller *Woke Inc.*, Ramaswamy explains in his new book that we're a nation of victims now. It's one of the few things we still have left in common—across black victims, white victims, liberal victims, and conservative victims. Victims of each other, and ultimately, of ourselves. This fearless, provocative book is for readers who dare to look in

the mirror and question their most sacred assumptions about who we are and how we got here. Intricately tracing history from the fall of Rome to the rise of America, weaving Western philosophy with Eastern theology in ways that moved Jefferson and Adams centuries ago, this book describes the rise and the fall of the American experiment itself—and hopefully its reincarnation.

Political Animals - Rick Shenkman 2016-01-05

Why, when it comes to politics, do we often seem so gullible and uninformed? In *Political Animals*, the bestselling historian and journalist Rick Shenkman reveals the hidden biases at work in all of us when we enter the voting booth. Drawing on cutting-edge research in neuroscience, evolutionary psychology, and behavioral psychology, he

explains that evolution has left us with a brain wired for the Stone Age. While these ancient instincts often work to our advantage in our personal lives, in politics they usually don't. Modern cues set off ancient instinctive responses that prompt us to behave in ways contrary to the good governance of our nation. Shenkman illuminates not only the curious habits of the American voter today but also the ways in which voter biases have shaped American political history from the shark attacks that got Woodrow Wilson elected to the people who still defend Richard Nixon against the Watergate charges. In so doing, Shenkman probes the depths of the human mind to reveal what we must do to fix our floundering democracy.

Psychopathology and Politics - Harold Lasswell 2020-10-28

Psychopathology and Politics by Harold D. Lasswell is a study of personality types as they relate to politicians, business leaders, and church officials. First published in 1930, the work applies the

concepts of clinical psychology to the future prediction and prevention of societal and political conflict. Born in 1902 to a schoolteacher mother and clergyman father, Lasswell was devoted to scholarship and philosophy from a young age. He dedicated his life to studying, teaching, and writing about the intersection of political science, psychology, and sociology. Lasswell received his Ph.D. from the University of Chicago in 1926. His dissertation, *Propaganda Technique in the World War*, analyzed the various government "information" campaigns of WWI. This expertise in propaganda would later lead to Lasswell's appointment as Chief of the Experimental Division for the Study of War Time Communications at the Library of Congress during WWII. His role was to review and evaluate Nazi propaganda films to understand how their persuasion methods earned the Nazis the support of the German people. Upon completing his Ph.D., Lasswell

became an Assistant Professor of Political Science at the University of Chicago. Shortly after, he began work on *Psychopathology and Politics*, the first of over 30 books he would write over the next 45 years. The book argues that we must have insight into the hidden motivations and impulses of societal leaders in order to channel the desire to lead into healthy expression. Lasswell uses case studies to explore how early experiences inform the opinions that leaders hold later in life. As an example, we follow the preacher "A" through his childhood, youth, and adulthood. We learn about A's intense competition with his brother for their father's affection in childhood. And we're told that this is the cause of A's support for socialism. Looking after one's "brother" is compensation for his own fraternal dislike. Instead of relying on politicians to resolve conflict, Lasswell argues that it should be the purview of political psychologists to prevent it altogether by

"reducing the strain and maladaptation in society." The "politics of prevention," he theorized, would require intense auditing of the effects of politics upon the politicians. For example, "When a judge has been on the bench thirty years, what manner of man has he become? When an agitator has been agitating for thirty years, what has happened to him?" After WWII, Lasswell became a Professor of Law and Political Science at Yale Law School and served as the President of the American Political Science Association and continued to write dozens of books and hundreds of scholarly articles. In one of these works, he pioneered the "five-questions model of communication." Also known as the Lasswell Communication Model, it requires identifying and analyzing each of the following five questions: Who (says) What (to) Whom (in) What Channel (with) What Effect This model is still in use in the studies of communication and public relations. Lasswell's works are

still studied today. After his death in 1978, political scientist Gabriel Almond said that Lasswell "ranked among the half dozen creative innovators in the social sciences in the twentieth century."

Inclined to Liberty - Louis E. Carabini 2008

The Age of Acrimony - Jon Grinspan 2021-04-27

A raucous history of American democracy at its wildest--and a bold rethinking of the relationship between the people and their politics. Democracy was broken. Or that was what many Americans believed in the decades after the Civil War. Shaken by economic and technological disruption, they sought safety in aggressive, tribal partisanship. The results were the loudest, closest, most violent elections in U.S. history, driven by vibrant campaigns that drew our highest-ever voter turnouts. At the century's end, reformers finally restrained this wild system, trading away

participation for civility in the process. They built a calmer, cleaner democracy, but also a more distant one. Americans' voting rates crashed and never fully recovered. This is the origin story of the "normal" politics of the 20th century. Only by exploring where that civility and restraint came from can we understand what is happening to our democracy today. The Age of Acrimony charts the rise and fall of 19th-century America's unruly politics through the lives of a remarkable father-daughter dynasty. The radical congressman William "Pig Iron" Kelley and his fiery, Progressive daughter Florence Kelley led lives packed with drama, intimately tied to their nation's politics. Through their friendships and feuds, campaigns and crusades, Will and Florie trace the narrative of a democracy in crisis. In telling the tale of what it cost to cool our republic, historian Jon Grinspan reveals our divisive political system's enduring capacity to reinvent itself.

The Memorable Thoughts of Socrates - Xenophon 2021-01-01

Xenophon gives us an alternative to Plato's accounts of the lessons of Socrates. As you probably know if you are reading this, Socrates left nothing behind by way of written teachings. All we know of the great philosopher's teachings come from the accounts of his students. Xenophon's version (*Memorabilia of Socrates*) is stylistically different from Plato's dialogues (e.g. *Euthyphro*, *Apology*, *Crito*, and *Phaedo*), though Socrates' wisdom and method

(questioning) remain consistent.

The Politics of Bitcoin -

David Golumbia 2016-09-26
Since its introduction in 2009, Bitcoin has been widely promoted as a digital currency that will revolutionize everything from online commerce to the nation-state. Yet supporters of Bitcoin and its blockchain technology subscribe to a form of cyberlibertarianism that depends to a surprising extent on far-right political thought.

The Politics of Bitcoin exposes how much of the economic and political thought on which this cryptocurrency is based emerges from ideas that travel the gamut, from Milton Friedman, F.A. Hayek, and Ludwig von Mises to Federal Reserve conspiracy theorists. Forerunners: Ideas First is a thought-in-process series of breakthrough digital publications. Written between fresh ideas and finished books, Forerunners draws on scholarly work initiated in notable blogs, social media, conference plenaries, journal articles, and the synergy of academic exchange. This is gray literature publishing: where intense thinking, change, and speculation take place in scholarship.

How Politics Makes Us Sick - T. Schrecker 2015-05-19
Ted Schrecker and Clare Bambra argue that the obesity, insecurity, austerity and inequality that result from neoliberal (or 'market fundamentalist') policies are hazardous to our health, asserting that these neoliberal

epidemics require a political cure.

The Price of Politics - Bob Woodward 2013-09-24
Based on 18 months of reporting, Woodward's 17th book is an intimate, documented examination of how President Obama and the highest profile Republican and Democratic leaders in the United States Congress attempted to restore the American economy and improve the federal government's fiscal condition over three and one half years. Drawn from memos, contemporaneous meeting notes, emails and in-depth interviews with the central players, THE PRICE OF POLITICS addresses the key issue of the presidential and congressional campaigns: the condition of the American economy and how and why we got there. Providing verbatim, day-by-day, even hour-by-hour accounts, the book shows what really happened, what drove the debates, negotiations and struggles that define, and will continue to define, the

American future.

**Politics Who Gets What,
When and How** - Harold D.
Lasswell 1990-01-01

Politics in America - Thomas R.
Dye 1997

Utilizing Harold Laswell's

definition of politics, Who gets what, when, and how, as a framework for presenting an introduction to the American political system, this text examines the struggle for power, the participants, the stakes, the processes and the institutional arena.
