How to Rebuild VW Air-Cooled Engines - Prescott Phillips 2019-08-15

Covers rebuilding the VW Type 1, 2, and 3 engines beginning in the year 1961, when a significant redesign improved the reliability, durability, and horsepower of the basic initial design. For more than 70 years, automotive enthusiasts and the public in general have embraced the VW air-cooled engine for its simplicity, its capacity to be modified, and its bulletproof reliability. Offering beautiful color photos and insightful step-by-step captions for expertly rebuilding Volkswagen air-cooled engines, this book will provide in-depth hands-on information for disassembly, inspection, machining, parts selection, preassembly, final assembly, installation, and tuning. Not only are the procedures for rebuilding covered in depth but engine model types, identification codes, specifications, and details are also covered in a manner that allows the user to source a good later-model candidate for rebuilding and helps retrofit the modern engine designs into earlier chassis. One of the most widely used and versatile internal combustion engines in the world, this engine has powered VW Beetles, Buses, Porsche 914s, off-road buggies and rails, formula race cars, and many other machines both on and off-road. If you have any interest in reviving your old VW, or perhaps are researching purchasing one, this handy guide will cover all the bases in bringing that old air-cooled powerplant back to life.

Manual of Psychosocial Rehabilitation - Robert King 2012-08-06

Psychosocial Rehabilitation is a comprehensive ready-reference for mental health practitioners and

students, providing practical advice on the full range of interventions for psychosocial rehabilitation. It contextualises the interventions described and provides pointers to enable the reader to explore the theory and research. This manual recognises the wide-ranging impact of mental illness and its ramifications on daily life, and promotes a recovery model of psychosocial rehabilitation and aims to empower clinicians to engage their clients in tailored rehabilitation plans. The book is divided into five key sections. Section 1 looks at assessment covering tools available in the public domain, instruments, scoring systems, norms and applications for diagnosis and measurement of symptoms, cognitive functioning, impairment and recovery. Section 2 covers the full range of therapeutic interventions and offers advice on training and supervision requirements and evaluation of process, impact and outcome. Section 3 provides manuals and programs for intervention effectively provided as group activities. Section 4 explains how to design a full programme that integrates therapeutic interventions with group programmes as well as services provided by other agencies. The final section looks at peer support and self help, providing manuals and resources that support programmes and interventions not requiring professional or practitioner direction.
