For Shame, Boone! For Shame, Iowa! The Disappearance of Norma Maynard - Sidney S. Louis 2017-08-28

For Shame, Boone! For Shame, Iowa! The Disappearance of Norma Maynard By: Sidney S. Louis If you have a hidden, secret, wish to be Sherlock Holmes—and who doesn't, really—the Norma Maynard story is for you. An innocent woman was murdered and made to vanish—as if she had

never existed. City of Boone, county of Boone and Iowa state level law enforcement were unable to determine what happened. To this day, it is not known: · Exactly when the missing woman was murdered · Who committed the murder · How it was done · Why it was done · Where the missing woman's remains are Join the author as he fights for twelve years to have his sister's murder properly investigated,

only to be met with a stone wall of resistance from Iowa officials at city, county and state level. The author provides readers with the ability to set up their own investigative files. He helps them devise a scale to measure the effectiveness of officials that are part of the story. The reader will be able to question, with some authority, why the Norma Maynard case has not been resolved. Was this a deliberate choice by Iowa law enforcement and legal and judicial officials? If you elect to sleuth along with the author, will you be the one to solve the almost forty year riddle of the disappearance of Norma Maynard?

[The First Decade of NAFTA: The Future of Free Trade in North America](#) - Kevin Kennedy
2021-10-25

This volume provides practitioners, academics and students with the first definitive coverage of NAFTA investment arbitration. Given the level of foreign direct investment within the NAFTA countries, the issue of redress for states in investment cases

is a major one. The state dispute settlement mechanisms within NAFTA's Chapter Eleven are recognized as a model worthy of close examination. The experts and scholars who have contributed to this work present a comprehensive overview of the first ten years of practice in the area of investment disputes under the NAFTA provision. As in any nascent undertaking, the successes, failures and controversies that have been the experience of the state parties involved in NAFTA, are keenly reflected in the Chapter 11 cases. It is in these experiences, as described by in the chapters of this timely volume, that the readers will find substantive and procedural insights into an emerging new area of public international economic law. Many see the workings of the NAFTA agreement, particularly Chapter 11, as a Rorschach test for how state parties can approach and effectively adjudicate investment disputes. For this reason all practitioners and scholars concerned with

international trade and foreign direct investment issues should consult this book. Published under the Transnational Publishers imprint.

*IBM IMS Solutions for
Automating Database
Management* - Paolo Bruni
2014-12-09
Over the last few years, IBM®
IMSTM and IMS tools have
been modernizing the
interfaces to IMS and the IMS
tools to bring them more in line
with the current interface
designs. As the mainframe

software products are
becoming more integrated with
the Windows and mobile
environments, a common
approach to interfaces is
becoming more relevant. The
traditional 3270 interface with
ISPF as the main interface is
no longer the only way to do
some of these processes. There
is also a need to provide more
of a common looking interface
so the tools do not have a
product-specific interface. This
allows more cross product
integration. Eclipse and web-
based interfaces being used in
a development environment,
tooling using those
environments provides
productivity improvements in
that the interfaces are common
and familiar. IMS and IMS
tools developers are making
use of those environments to
provide tooling that will
perform some of the standard
DBA functions. This book will
take some selected processes
and show how this new tooling
can be used. This will provide
some productivity
improvements and also provide
a more familiar environment

for new generations DBAs. Some of the functions normally done by DBA or console operators can now be done in this eclipse-based environment by the application developers. This means that the need to request these services from others can be eliminated. This IBM Redbooks® publication examines specific IMS DBA processes and highlights the new IMS and IMS tools features, which show an alternative way to accomplish those processes. Each chapter highlights a different area of the DBA processes like: PSB creation Starting/stopping a database in an IMS system Recovering a database Cloning a set of databases

Evaluating and Improving Undergraduate Teaching in Science, Technology, Engineering, and Mathematics - National Research Council 2003-01-19

Economic, academic, and social forces are causing undergraduate schools to start a fresh examination of teaching effectiveness. Administrators face the complex task of developing equitable, predictable ways to evaluate, encourage, and reward good teaching in science, math, engineering, and technology. *Evaluating, and Improving Undergraduate Teaching in Science, Technology, Engineering, and Mathematics* offers a vision for systematic evaluation of teaching practices and academic programs, with recommendations to the various stakeholders in higher education about how to achieve change. What is good undergraduate teaching? This book discusses how to evaluate undergraduate teaching of

science, mathematics, engineering, and technology and what characterizes effective teaching in these fields. Why has it been difficult for colleges and universities to address the question of teaching effectiveness? The committee explores the implications of differences between the research and teaching cultures-and how practices in rewarding researchers could be transferred to the teaching enterprise. How should administrators approach the evaluation of individual faculty

members? And how should evaluation results be used? The committee discusses methodologies, offers practical guidelines, and points out pitfalls. *Evaluating, and Improving Undergraduate Teaching in Science, Technology, Engineering, and Mathematics* provides a blueprint for institutions ready to build effective evaluation programs for teaching in science fields.
