Enter Title Here - Rahul Kanakia 2017-08-01

I'm your protagonist-Reshma Kapoor-and if you have the free time to read this book, then you're probably nothing like me. Reshma is a college counselor's dream. She's the top-ranked senior at her ultra-competitive Silicon Valley high school, with a spotless academic record and a long roster of extracurriculars. But there are plenty of perfect students in the country, and if Reshma wants to get into

Stanford, and into med school after that, she needs the hook to beat them all. What's a habitual over-achiever to do? Land herself a literary agent, of course. Which is exactly what Reshma does after agent Linda Montrose spots an article she wrote for Huffington Post. Linda wants to represent Reshma, and, with her new agent's help scoring a book deal, Reshma knows she'll finally have the key to Stanford. But she's convinced no one would want to read a novel about a study machine like her. To make herself a more relatable protagonist, she must start doing all the regular American girl stuff she normally ignores. For starters, she has to make a friend, then get a boyfriend. And she's already planned the perfect ending: after struggling for three hundred pages with her own perfectionism, Reshma will learn that meaningful relationships can be more important than success-a character arc librarians and critics alike will enjoy. Of course, even with a mastermind like Reshma in charge, things can't always go as planned. And when the valedictorian spot begins to slip from her grasp, she'll have to decide just how far she'll go for that satisfying ending. (Note: It's pretty far.) In this wholly unique, wickedly funny debut novel, Rahul Kanakia consciously uses the rules of storytelling-and then breaks them to pieces.

Improving Student Retention in Higher Education - Glenda Crosling 2008-11-19

Improving Student Retention in Higher Education provides a practical, curriculum-based response to the current situation in higher education, where participating students emanate from a range of backgrounds; international and lower socioeconomic backgrounds, mature aged students, students with disabilities as well as those for whom higher education is the first family experience. Underpinned by research indicating that students are more likely to continue with higher education if they are engaged in their studies and have developed networks and relationships with their fellow students, this book presents best practice examples of innovative and inclusive curriculum, from a range of countries.

Introduction to Policing - Steven M. Cox 2015-12-31

Introduction to Policing, Third Edition continues to focus on the thought-provoking, contemporary issues that underscore the challenging and rewarding world of policing. Steven M. Cox, Susan Marchionna, and experienced law enforcement officer Brian D. Fitch balance theory, research, and practice to give students a comprehensive, yet concise, overview of both the foundations of policing and the expanded role of today's

police officers. The accessible and engaging writing style, combined with stories from the field, make policing concepts and practices easy for students to understand and analyze. Unique coverage of policing in multicultural communities, the impact of technology on policing, and extensive coverage of policing strategies and procedures — such as those that detail the use of force — make this bestselling book a must-have for policing courses.

Belle Morte - Bella Higgin 2023-03-28

There's only one way out. Belle Morte. One of five houses where vampires reside as celebrities and humans are paid to be their living donors. While others came here seeking fortune, I came in search of my sister who walked into Belle Morte five months ago . . . and never walked back out. Now that I'm here, the secrets

about this world prove to be much bigger than I ever anticipated. And lurking around every corner are shocking insinuations regarding what happened to my sister. There's only one person who might have the answers I need, and the undeniable pull I feel toward him is terrifying: Edmond Dantès—a vampire, and my mortal enemy. The harder I try to resist him, the further I fall under his spell. And in one instant my life is irrevocably changed. My past becomes prologue and my fate becomes sealed behind these doors. Belle Morte has spoken. And it may never let me go.

Leadership for change - W.P. Wahl 2020-12-31

This edited volume reveals how the journey of transformation at the University of the Free State (UFS) became interwoven with student leadership development and global learning. The UFS initiated two intersecting co-curricular programmes, namely, the First-Year Leadership for Change (F1L4C) programme in 2010; and the triennial Global Leadership Summit (GLS) in 2012. Although these programmes changed over time, their core focus remained to be the development of transformational student leaders through the creation of global learning spaces. From its inception in 2010 to the last GLS in 2018, the UFS global learning project involved 780 students and 259 staff members from 109 institutions, across four continents. The goal of this edited volume is to create a deeper understanding of how the UFS F1L4C and GLS programmes enhanced student leadership development through global learning, especially in the context of higher education transformation.

The Right to Higher Education - Penny Jane Burke 2013-06-19

The landscape of higher education has undergone change and transformation in recent years, partly as a result of diversification and massification. However, persistent patterns of under-representation continue to perplex policy-makers and practitioners, raising questions about current strategies, policies and approaches to widening participation. Presenting a comprehensive review and critique of contemporary widening participation policy and practice, Penny Jane Burke interrogates the underpinning assumptions, values and perspectives shaping current concepts and understandings of widening participation. She draws on a range of perspectives within the field of the sociology of education – including feminist post-structuralism, critical pedagogy and policy sociology – to examine the ways in which wider societal inequalities and misrecognitions, which are related to difference and diversity, present particular challenges for the project to widen participation in higher education. In particular, the book: focuses on the themes of difference and diversity to shed light on the operations of inequalities and the politics of access and participation both in terms of national and institutional policy and at the level of student and practitioner experience. draws on the insights of the sociology of education to consider not only the patterns of under-representation in higher education but also the politics of mis-representation, critiquing key discourses of widening participation. interrogates assumptions behind WP policy and practice, including assumptions about education being an unassailable good provides an analysis of the accounts and perspectives of students, practitioners and policy-makers through in-depth interviews, observations and reflective journal entries. offers insights for future developments in the policy, practice and strategies for widening participation The book will be of great use to all those working in and researching Higher Education.

Lessons for Education from COVID-19 - 2020

The COVID-19 pandemic has shaken long-accepted beliefs about education, showing that learning can occur anywhere, at any time, and that education systems are not too heavy to move. When surveyed in May 2020, only around one-fifth of OECD education systems aimed to reinstate the status quo. Policy makers must therefore maintain the momentum of collective emergency action to drive education into a new and better normal. This Handbook provides practical guidance to support them to do just that. It presents the

current state-of-play in over 40 education systems, and efforts to improve pedagogical practices in the midst of the pandemic. It proposes three key lessons and related policy pointers for the current academic term and beyond. Drawing on concrete examples of COVID-19 policy responses from primary to tertiary, as well as impactful pre-crisis policies, it addresses the policy areas of flexible learning, educator skills, and student equity. The Handbook has been prepared with evidence from the Education Policy Outlook series - the OECD's analytical observatory of education policy. As such, it benefits from a decade of policy analysis, outcomes from the Education Policy Reform Dialogues 2020, and the development of an actionable Framework for Responsiveness and Resilience in education.

Creativity and Giftedness - Roza Leikin 2016-08-24

This volume provides readers with a broad view on the variety of issues related to the educational research and practices in the field of Creativity in Mathematics and Mathematical Giftedness. The book explores (a) the relationship between creativity and giftedness; (b) empirical work with high ability (or gifted) students in the classroom and its implications for teaching mathematics; (c) interdisciplinary work which views creativity as a complex phenomena that cannot be understood from within the borders of disciplines, i.e., to present research and theorists from disciplines such as neuroscience and complexity theory; and (d) findings from psychology that pertain the creatively gifted students. As a whole, this volume brings together perspectives from mathematics educators, psychologists, neuroscientists, and teachers to present a collection of empirical, theoretical and philosophical works that address the complexity of mathematical creativity and giftedness, its origins, nature, nurture and ways forward. In keeping with the spirit of the series, the anthology substantially builds on previous ZDM volumes on interdisciplinarity (2009), creativity and giftedness (2013).

It intends to provide valuable and fresh insights from research studies and examples of best practices from Europe and all over the world. The authors deal with the strengths and limitations of different models, strategies, approaches and policies related to teacher education and professional development in and for changing times (digitization, multiculturalism, pressure to perform).

Education and Development - Simon McGrath 2018-04-30

This title explores the place of education in development debates and provides a systematic as well as a theoretical overview of the main approaches to education and development. It emphasises the fact that education is profoundly shaped by national and local cultures even if many issues are shared across institutions in different locations. Education and Development discusses different theoretical accounts from different disciplinary traditions to help students understand the complexity of the overall debate. The text does not shy away from discussions of education's negative impacts, and insists that an account of education must include consideration of early childhood development, adult, vocational and higher education, as well as the growing range of informal and distance forms. It includes chapters on human capital, human rights and human development, and on education, gender and development, and draws on examples from a wide range of countries and regions such as India, Hong Kong, Kenya and South Africa.

The book has a well-developed pedagogy including text boxes, chapter summaries, key questions, links to websites and videos, and annotated further reading sections. Particular attention is paid to ensuring that a plurality of voices, contexts and educational sub-sectors are represented in the boxes, weblinks and references. Education and Development provides an introductory overview to the field, aimed at the undergraduate level, while critically engaging with key themes and questions. The book will also be of interest to development practitioners, policymakers, entrepreneurs and corporate employees engaged in aspects of education and development work.

FCS Introduction to Systems Development L2 - Vaughan Van Dyk 2009

Opening Up Education - Toru Iiyoshi 2008

Online version of MIT Press book has brief overview of book's content and provides links to open access PDF version of ebook, as well as an iPaper version and a link to the MIT Press store for buying the print version. In this collection of essays the authors who are leaders in open education, explore the potential of open education to transform the economics and ecology of education. The authors argue that we must develop not only the technical capability but also the intellectual capacity for transforming tacit pedagogical knowledge into commonly usable and visible knowledge by providing incentives for faculty to use (and contribute to) open education goods, and by looking beyond institutional boundaries to connect a variety of settings and open source entrepreneurs.
