Studying Geography at University - Simon Tate 2020-10-28

Written by leading academics, this book is an invaluable 'how to ...' guide to studying for a Geography degree. Written in a practical and conversational style, it offers important insights into how to succeed in the first year of your degree course, covering everything from how to succeed in assessments to how to decide where to live. Some of the information the book provides is academic and some of it is non-academic, as negotiating both is important in order to be successful in the first year of a Geography degree. *Studying Geography at University* is ideal for those in the early stages of applying to university. Each chapter offers hints and tips and gives practical real-world insights into becoming a successful geography student that will enrich applications, open days and visit days. It is also possible to dip into the chapter summaries, 'What Do Students Say?' and 'Top Tip' boxes only. Written by current students, from a range of institutions, these provide unique insights into the book's key points. Current students should also keep and refer to the book as an invaluable guide through the first few months of their degree. This guide is a must-read for anyone starting their studies in Human Geography, Physical Geography, Environmental Science or any other related subject at university.

The SAGE Handbook of Qualitative Geography - Dydia DeLyser 2010

The process of learning qualitative research has altered dramatically and this Handbook explores the growth, change, and complexity within the topic and looks back over its history to assess the current state of the art, and indicate possible future directions. Moving beyond textbook rehearsals of standard issues, the book examines key methodological debates and conflicts, approaching them in a critical, discursive manner.

Conducting Research in Human Geography - Rob Kitchin 2013-12-02

Reading this book is your first step to becoming a competent human geography researcher. Whether you are a novice needing practical help for your first piece of research or a professional in search of an accessible guide to best practice, *Conducting Research in Human Geography* is a unique and indispensable book to have at hand. The book provides a broad overview of theoretical underpinnings in contemporary human geography and links these with the main research methodologies currently being used. It is designed to guide the user through the complete research process, whether it be a one day field study or a large project, from the nurturing of ideas and development of a proposal, to the design of an enquiry, the generation and analysis of data, to the drawing of conclusions and the presentation of findings.

Research Ethics for Human Geography - Helen F. Wilson 2020-10-12

Research Ethics for Human Geography is a lively and engaging introduction to key ethical issues in geographical research by leading figures in the discipline. It addresses the wide range of ethical issues involved in collecting, analysing and writing up research across the social sciences, and explores and explains the more specific ethical issues associated with different forms of geographical inquiry. Each chapter comprises detailed summaries and definitions, real-life case studies, student check-lists and annotated recommendations for reading, making the book a valuable toolkit for students undertaking all forms of geographical research, from local and overseas fieldwork, through to dissertation research, methods-training, and further research.

Unknown MIR Title - Iain Hay 2021-02-15

Qualitative Research Methods in Human Geography is a practical, in-depth guide to understanding and

conducting qualitative research in human geography. Reflecting both established and modern methods and written by some of the most authoritative voices in the discipline, the text teaches students how to plan, execute, interpret, and effectively communicate qualitative research. Organized into three parts, the fifth edition is a comprehensive, engaging resource for both students and new researchers in the field. The new edition brings on Meghan Cope as co-editor and has been revised to maintain its twenty-chapter length while also retaining its comprehensive but succinct coverage of the field. All revised chapters have been carefully updated with fresh references and a look at new issues and technologies in the field that have arisen in the past five years. Several chapters have been revised significantly by a new, invigorated group of authors, and features a wholly new addition on solicited journals and narrative maps. All seven of the new authors in this edition are women and/or scholars of colour, and there is rich topical diversity in their work, particularly an emphasis on social justice, Indigenous issues, and matters of race/racism.

Methods in Human Geography - Robin Flowerdew 1997

Methods in Human Geography offers an accessible overview of both qualitative and quantitative research techniques. Each chapter is written by an expert on the featured topic, and includes advice on preparing a research report.

Doing Gender, Doing Geography - Saraswati Raju 2012-12-06

Until the 1970s gender had been invisible in analyses of social space and place in the androcentric discipline of geography. While recent contributions to feminist geography have challenged this, in India the engagement of geographers with gender, by being conservative in its choice of focus and orthodox in methodology, has been unable to destabilise the established disciplinary order. However, with younger scholars becoming increasingly interested in studying gender in geography, novel and innovative methods that include combinations of quantitative and qualitative analyses, visual sources and in-depth case studies are being tried out and accepted in geography despite its masculine legacy. This pioneering study brings together Indian geographers' contributions to understanding gender, and through them, seeks to enrich the discipline of geography. It engages with the recent 'spatial turn' in the social sciences, which has reclaimed the explanatory power of space and place in social theory that had been nearly lost to deconstructive postmodernist scholarship. The volume draws entirely from the Indian scholarship, showcasing contextualised knowledge production, but hopes to initiate a dialogue with scholars elsewhere working with feminist methodologies.

Fieldwork for Human Geography - Richard Phillips 2012-03-28

"A highly readable and superbly fun guide to the why and how of doing fieldwork in human geography... I recommend it highly to any geographer-wannabes and practicing-geographers. The latter group, including myself, might well rediscover the fun of doing geography." - Professor Henry Yeung, National University of Singapore "An excellent introduction to the art and science of fieldwork. It makes clear that fieldwork is not just about getting out of the classroom and gaining first-hand experience of places, it is about instilling passion about those places." - Professor Stuart C. Aitken, San Diego State University "An indispensable guide to fieldwork that will enrich the practice of geography in a myriad of different ways. In particular, the diverse materials presented here will encourage students and academics alike to pursue new approaches to their work and instil a greater understanding of the conceptual and methodological breadth of their discipline." - Professor Matthew Gandy, University College London "If fieldwork is an indispensable

component of geographical education then this book is equally essential to making the most of fieldwork...This book gives students the tools to realise the full potential of what, for many, is the highlight of their geography degree." - Professor Noel Castree, Manchester University Fieldwork is a core component of Human Geography degree courses. In this lively and engaging book, Richard Phillips and Jennifer Johns provide a practical guide to help every student get the most out of their fieldwork. This book: Encourages students to engage with fieldwork critically and imaginatively Explains methods and contexts Links the fieldwork with wider academic topics. It looks beyond the contents of research projects and field visits to address the broader experiences of fieldwork: working in groups, understanding your ethical position, developing skills for learning and employment and opening your eyes, ears and minds to the wider possibilities of your trip. Throughout the book, the authors present first person descriptions of field experiences and predicaments, written by fieldtrip leaders and students from around the world including the UK, Canada, Singapore, Australia and Africa.

Creative Methods for Human Geographers - Nadia von Benzon 2021-01-13

Introducing a broad range of innovative and creative qualitative methods, this accessible book shows you how to use them in research project while providing straightforward advice on how to approach every step of the process, from planning and organisation to writing up and disseminating research. It offers: Demonstration of creative methods using both primary or secondary data. Practical guidance on overcoming common hurdles, such as getting ethical clearance and conducting a risk assessment. Encouragement to reflect critically on the processes involved in research. The authors provide a complete toolkit for conducting research in geography, while ensuring the most cutting-edge methods are unintimidating to the reader.

Research Methods in Physical Geography - Jasper Knight 2020-11-17

Introduction to Scientific Geographic Research - L. Lloyd Haring 1992

This scientific geographic research text should help students to utilize their analytical skills and the scientific method for solving problems. This edition features: additional coverage of personal computer use in geographic research; expanded material reflecting technological developments in the discipline, including chapters with computer mapping information, geographic information systems (GIS), geographic surveys and geographic report writing; and expanded treatment of survey research design, including discussions of sampling types, questionnaire construction, and survey and administration techniques.

New Research Paradigms in Tourism Geography - Alan A. Lew 2017-10-02

This collection of papers from Tourism Geographies emphasizes new and emerging research paradigms in the geographic study of tourism. The papers included in this collection follow one of two threads: explicitly supporting specific research frameworks, or implicitly presenting new and emerging theoretical perspectives through empirical research on the geographical topics. These begin with three overview papers from themes that emerged from recent annual meetings of the Association of American Geographers, including evolutionary economic geography (EEG), political ecology and community resilience. Each of these theoretical and conceptual frameworks is leading to new explorations and insights in a wide variety of geographical and social science research, including tourism studies. These are followed by a series of papers that extend our knowledge and thinking on a range of key geographical topics, including development and underdevelopment (by Saarinen & Rogerson), sustainable tourism planning (by

Torres-Delgado & Saarinen), encounters with the natural environment (by Hill), and the geography of place names (by Light), as well as economic geography and new technologies and their applications to spatial behavior research. The papers in this special issue are especially relevant to tourism scholars, and very much represent the types of perspectives that Tourism Geographies seek to promote. This book was published as a special issue of Tourism Geographies.

Qualitative Research Methods in Human Geography - Iain Hay 2005

This book offers a comprehensive, accessible, and practical guide on how to conduct qualitative research in human geography. Enhanced and greatly expanded by nine new chapters, the latest edition shows students how to plan, conduct, interpret, and communicate qualitative research.

Your Human Geography Dissertation - Kimberley Peters 2017-02-09

An undergraduate dissertation is your opportunity to engage with geographical research, first-hand. But completing a student project can be a stressful and complex process. Your Human Geography Dissertation breaks the task down into three helpful stages: Designing: Deciding on your approach, your topic and your research question, and ensuring your project is feasible Doing: Situating your research and selecting the best methods for your dissertation project Delivering: Dealing with data and writing up your findings With information and task boxes, soundbites offering student insight and guidance, and links to online materials, this book offers a complete and accessible overview of the key skills needed to prepare, research, and write a successful human geography dissertation.

The Routledge Handbook of Methodologies in Human Geography - Mark W. Rosenberg 2022

"The Routledge Handbook of Methodologies in Human Geography is the defining reference for academics and postgraduate students seeking an advanced understanding of the debates, methodological developments, and methods transforming research in human geography. Part I reviews how the methods of contemporary human geography are part of processes that reflect the changing intellectual history of human geography and events both within human geography and society in general. In Part II, authors critically appraise key methodological and theoretical challenges/opportunities that are shaping contemporary research in various parts of human geography. Contemporary directions within the discipline will be elaborated on by established and emerging researchers who are leading ontological debates and the adoption of innovative methods in geographic research. In Part III authors' take on debates that human geographers implicitly and explicitly engage with in their thinking around methodology and the practice of research. The chapters range across issues like the use of multiple methods versus mixed methods research or the growing application of thematic analysis in qualitative research in human geography and the methodological implications for the discipline. Contributors emphasize examples from their research and the research of others to reflect the fluid, emotional, and pragmatic realities of research. In this the handbook captures key developments and disciplinary influences emerging from the various sub-disciplines of human geography"--

Rediscovering Geography - Rediscovering Geography Committee 1997-04-11

As political, economic, and environmental issues increasingly spread across the globe, the science of geography is being rediscovered by scientists, policymakers, and educators alike. Geography has been made a core subject in U.S. schools, and scientists from a variety of disciplines are using analytical tools originally developed by geographers. Rediscovering Geography presents a broad overview of geography's renewed importance in a changing world. Through discussions and highlighted case studies, this book illustrates geography's impact on international trade, environmental change, population growth, information infrastructure, the condition of cities, the spread of AIDS, and much more. The committee examines some of the more significant tools for data collection, storage, analysis, and display, with examples of major contributions made by geographers. Rediscovering Geography provides a blueprint for the future of the discipline, recommending how to strengthen its intellectual and institutional foundation and meet the demand for geographic expertise among professionals and the public.

Researching Human Geography - Anna Davies 2014-04-04

Researching Human Geography is an essential new text for any geography student about to embark on a research project. An understanding of how different theories of knowledge have influenced research methodologies is crucial in planning and designing effective research; this book makes this link clear and

explores how various philosophical positions, from positivism to post-structuralism, have become associated with particular methodologies. The book gives an overview of a wide range of methods and data collection, both quantitative and qualitative, and explores their strengths and weaknesses for different kinds of research. 'Researching Human Geography' also looks at the various techniques available for the analysis of data, which is presented as an integral and ongoing part of the research process. Clearly written, with extensive use of examples from previous research to show 'methodology in action', this new text is an invaluable addition to both the theory and method of research in human geography.

Geography, Art, Research - Harriet Hawkins 2020-09-27

This book explores the intersection of geographical knowledge and artistic research in terms of both creative methods and practice-based research. In doing so it brings together geography's 'creative turn' with the art world's 'research turn.' Based on a decade and a half of ethnographic stories of working at the intersection of creative arts practices and geographical research, this book offers a much-needed critical account of these forms of knowledge production. Adopting a geohumanities approach to investigating how these forms of knowledge are produced, consumed, and circulated, it queries what imaginaries and practices of the key sites of knowledge making (including the field, the artist's studio, the PhD thesis, and the exhibition) emerge and how these might challenge existing understandings of these locations. Inspired by the geographies of science and knowledge, art history and theory, and accounts of working within and beyond disciplines, this book seeks to understand the geographies of research at the intersection of geography and creative arts practices, how these geographies challenge existing understandings of these disciplines and practices, and what they might contribute to our wider discussions of working beyond disciplines, including through artistic research. This book offers a timely contribution to the emerging fields of artistic research and geohumanities, and will appeal to undergraduate and postgraduate students and researchers.

The Geography of Scientific Collaboration - Agnieszka Olechnicka 2018-10-08

Science is increasingly defined by multidimensional collaborative networks. Despite the unprecedented growth of scientific collaboration around the globe – the collaborative turn – geography still matters for the cognitive enterprise. This book explores how geography conditions scientific collaboration and how collaboration affects the spatiality of science. This book offers a complex analysis of the spatial aspects of scientific collaboration, addressing the topic at a number of levels: individual, organizational, urban, regional, national, and international. Spatial patterns of scientific collaboration are analysed along with their determinants and consequences. By combining a vast array of approaches, concepts, and methodologies, the volume offers a comprehensive theoretical framework for the geography of scientific collaboration. The examples of scientific collaboration policy discussed in the book are taken from the European Union, the United States, and China. Through a number of case studies the authors analyse the background, development and evaluation of these policies. This book will be of interest to researchers in diverse disciplines such as regional studies, scientometrics, R&D policy, socio-economic geography and network analysis. It will also be of interest to policymakers, and to managers of research organisations.

The Routledge Research Companion to Media Geography - Dr Jason Dittmer 2014-09-28

This Companion provides an authoritative source for scholars and students of the nascent field of media geography. While it has deep roots in the wider discipline, the consolidation of media geography has started only in the past decade, with the creation of media geography's first dedicated journal, *Aether*, as well as the publication of the sub-discipline's first textbook. However, at present there is no other work which provides a comprehensive overview and grounding. By indicating the sub-discipline's evolution and hinting at its future, this volume not only serves to encapsulate what geographers have learned about media but also will help to set the agenda for expanding this type of interdisciplinary exploration. The contributors-leading scholars in this field, including Stuart Aitken, Deborah Dixon, Derek McCormack, Barney Warf, and Matthew Zook-not only review the existing literature within the remit of their chapters, but also articulate arguments about where the future might take media geography scholarship. The volume is not simply a collection of individual offerings, but has afforded an opportunity to exchange ideas about media geography, with contributors making connections between chapters and developing common themes.

Research Ethics in Human Geography - Sebastian Henn 2021-10-18

This book explores common ethical issues faced by human geographers in their research. It offers practical guidance for research planning and design that incorporates geographic disciplinary knowledge to conceptualise research ethics. The volume brings together international insights from researchers in geography and related fields to provide a comprehensive overview of relevant ethical frameworks and challenges in human geography research. It includes in-depth reflections on a range of ethical dilemmas that arise in certain contextual conditions and spatial constructions that face those researching and teaching on spatial dimensions of social life. With a focus on the increased need for specialist ethics training as part of postgraduate education in the Humanities and Social Sciences and the necessity for fostering sensitivity in cross-cultural comparative research, the book seeks to enable people to engage in ethical decision-making and moral reasoning while conducting research. Chapters examine the implications of geographical research for conceptualising ethics and discuss specific case studies from which more general conclusions, linked to conceptual debates, are drawn. As a research-based reference guide for tackling ethically sensitive projects and international differences in legal and institutional standards and requirements, the book is useful for postgraduate and undergraduate students as well as academics teaching at senior levels.

Key Methods in Geography - Nicholas Clifford 2010-05-30

"Its range is far broader than the majority of methods texts, being concerned with both human and physical geography... Given the seriousness with which Key Methods in Geography approaches all aspects of research, it will continue to find wide favour among undergraduate geographers." - Times Higher Education Textbook Guide "All geographers, whatever their interest, need to do research. This book will help them get started in the best possible way, with thoughtful advice on everything from project design, through choice of methods, to data analysis and presentation. The editors have assembled an impressive array of authors, all experts in their chosen field." - Tim Burt, University of Durham "Excellent book. Valuable teaching aid. Well written and covers a wide range of methods thoroughly." - Sue Rodway-Dyer, Exeter University "This is an excellent book and deals with a number of topics (which I teach) outside of the tutorial module where it is a recommended text for geographers. A very useful textbook throughout a 3 year Geography programme." - Ian Harris, Bangor University Key Methods in Geography is an introduction to the principal methodological issues involved in the collection, analysis and presentation of geographical information. It is unique in the reference literature for providing an overview of qualitative and quantitative methods for human and physical geography. An accessible primer, it will be used by students as a reference throughout their degree, on all issues from research design to presentation. This second edition has been fully revised and updated and includes new chapters on internet mediated research, diaries as a research method, making observations and measurements in the field, and the analysis of natural systems. Organized into four sections: Getting Started in Geographical Research; Generating and Working with Data in Human Geography; Generating and Working with Data in Physical Geography; Representing and Interpreting Geographical Data; each chapter comprises: A short definition A summary of the principal arguments A substantive 5,000-word discussion Use of real-life examples Annotated notes for further reading. The teaching of research methods is integral to all geography courses: Key Methods in Geography, 2nd Edition explains all of the key methods with which geography undergraduates must be conversant.

Methods in Human Geography - Robin Flowerdew 2013-10-08

First published in 2004. This text is an essential guide to current research approaches in human geography, covering all aspects of undertaking a geography research project, from the selection of an appropriate topic through to the organisation and writing of the final report. Covering a wide range of contemporary research methods, the authors provide practical advice on how to actually undertake a project.

Research Methods in Geography - Basil Gomez 2010-06-29

This comprehensive textbook offers a conceptual and practical introduction to research methodology, data collection, and techniques used in both human and physical geography. Explores a full range of contemporary geographic techniques, including statistics, mathematical analysis, GIS, and remote sensing. Unique in both content and organization, it brings together a team of internationally recognized specialists to create a balanced approach between physical geography, human geography, and research techniques.

Includes a series of foundational chapters offering multiple perspectives on the central questions in research methods Examines the conceptual frameworks and practical issues behind data acquisition and analysis, and how to interpret results Includes explanations of key terminology and exercises throughout

Research Ethics for Human Geography - Helen F. Wilson 2020-11-13

Research Ethics for Human Geography is a lively and engaging introduction to key ethical issues in geographical research by leading figures in the discipline. It addresses the wide range of ethical issues involved in collecting, analysing and writing up research across the social sciences, and explores and explains the more specific ethical issues associated with different forms of geographical inquiry. Each chapter comprises detailed summaries and definitions, real-life case studies, student check-lists and annotated recommendations for reading, making the book a valuable toolkit for students undertaking all forms of geographical research, from local and overseas fieldwork, through to dissertation research, methods-training, and further research.

International Encyclopedia of Human Geography - 2009-07-16

The International Encyclopedia of Human Geography provides an authoritative and comprehensive source of information on the discipline of human geography and its constituent, and related, subject areas. The encyclopedia includes over 1,000 detailed entries on philosophy and theory, key concepts, methods and practices, biographies of notable geographers, and geographical thought and praxis in different parts of the world. This groundbreaking project covers every field of human geography and the discipline's relationships to other disciplines, and is global in scope, involving an international set of contributors. Given its broad, inclusive scope and unique online accessibility, it is anticipated that the International Encyclopedia of Human Geography will become the major reference work for the discipline over the coming decades. The Encyclopedia will be available in both limited edition print and online via ScienceDirect - featuring extensive browsing, searching, and internal cross-referencing between articles in the work, plus dynamic linking to journal articles and abstract databases, making navigation flexible and easy. For more information, pricing options and availability visit

http://info.sciencedirect.com/content/books/ref_works/coming/ Available online on ScienceDirect and in limited edition print format Broad, interdisciplinary coverage across human geography: Philosophy, Methods, People, Social/Cultural, Political, Economic, Development, Health, Cartography, Urban, Historical, Regional Comprehensive and unique - the first of its kind in human geography

Research In Geography: Trends And Techniques - Dr. R. M. Raina 2011-01-01

Feminist Geography in Practice - Pamela Moss 2002-02-01

This is the first feminist geography text devoted to methodology and provides a basic framework for students wishing to undertake gendered work in the discipline

Geography of Agriculture - Howard F. Gregor 1970

How to Do Your Dissertation in Geography and Related Disciplines - Tony Parsons 2015-02-01

This book provides undergraduates with a step-by-step guide to successfully carrying out an independent research project or dissertation. The book addresses each stage of the project by answering the questions that a student is likely to ask as the work progresses from choosing the subject area and planning the data collection through to producing illustrations and writing the final report. Most undergraduates in geography and related disciplines are required to undertake individual projects as part of their degree course; this book is a source of constructive, practical advice. This new third edition continues the tradition of friendly, well-informed but informal support, and continues to focus on answering the specific questions that students typically ask at each stage of the project. The new edition brings the text completely up to date by taking into account changes within the discipline and changes in the ways that students work. New digital media, social networking, mobile technology, e-journals, anti-plagiarism software, ethics approval rules and risk assessments are among the issues that this new edition takes into account. The new edition also broadens the book's appeal by extending its coverage of the wide range of different approaches to geographical research, with expanded coverage of qualitative research, Geographic Information Systems, and new approaches to research design in both physical and human geographies

Researching Human Geography - Anna Davies 2014-04-04

21st Century Geography - Joseph P. Stoltman 2011-10-20

Via approximately 80 entries or "mini-chapters," the SAGE 21st Century Reference Series volumes on geography will highlight the most important topics, issues, questions, and debates any student obtaining a degree in this field ought to have mastered for effectiveness in the 21st century. The purpose is to provide undergraduate majors with an authoritative reference source that will serve their research needs with more detailed information than encyclopedia entries but not so much jargon, detail, or density as a journal article or a research handbook chapter. Features & Benefits: Curricular-driven to provide students with initial footholds on topics of interest in writing research term papers, in preparing for GREs, in consulting to determine directions to take in pursuing a senior thesis, graduate degree, etc. Comprehensive to offer full coverage of major subthemes and subfields within the discipline of geography, including regional geography, physical geography, global change, human and cultural geography, economic geography and locational analysis, political geography, geospatial technology, cartography, spatial thinking, research methodology, geographical education, and more. Uniform in chapter structure to make it easy for students to locate key information, with a more-or-less common chapter format of Introduction, Theory, Methods, Applications, Comparison, Future Directions, Summary, Bibliography & Suggestions for Further Reading, and Cross References. Available in print and electronic formats to provide students with convenient, easy access.

Participatory Action Research Approaches and Methods - Sara Kindon 2007-12-18

This book examines the justification, theorization, practice and implications of Participatory Action Research approaches and methods in the social and environmental sciences.

Period and Place - Alan R. H. Baker 1982-05-06

This 1982 volume of essays attempts to promote discussion about the purpose and practice of historical geography.

Researching Geography - Gopal Krishan 2016-11-03

This book is a one-stop comprehensive guide to geographical inquiry. A step-by-step account of the hows and the whys of research methodology. Introduces students to the complexities of geographical perspective and thought, essentials of fieldwork, formulation of research topics, data collection, analysis and interpretation as well as presentation and dissemination. Includes inputs and specific examples to help practitioners negotiate between theory and practice. Uses a lucid, engaging and literary style. It will be an essential companion for researchers and students of geography, social sciences, and South Asian studies.

An Introduction to Scientific Research Methods in Geography and Environmental Studies - Daniel Montello 2012-12-10

"Covers a broad range of subjects that undergraduates in the discipline should be familiar and comfortable with upon graduation. From chapters on the scientific method and fundamental research concepts, to experimental design, sampling and statistical analysis, the text offers an excellent introduction to the key concepts of geographical research. The content is applicable for students at the beginning of their studies right through to planning and conducting dissertations. The book has also been of particular support in designing my level 1 and 2 tutorials which cover similar ground to several of the chapters." - Joseph Mallalieu, School of Geography, Leeds University "Montello and Sutton is one of the best texts I've used in seminars on research methodology. The text offers a clear balance of quantitative vs. qualitative and

physical vs. human which I've found particularly valuable. The chapters on research ethics, scientific communication, information technologies and data visualization are excellent." - Kenneth E. Foote, Department of Geography, University of Colorado at Boulder This is a broad and integrative introduction to the conduct and interpretation of scientific research, covering both geography and environmental studies. Written for undergraduate and postgraduate students, it: Explains both the conceptual and the technical aspects of research, as well as all phases of the research process Combines approaches in physical geography and environmental science, human geography and human-environment relations, and geographic and environmental information techniques (such as GIS, cartography, and remote sensing) Combines natural and social scientific approaches common to subjects in geography and environmental studies Includes case studies of actual research projects to demonstrate the breadth of approaches taken It will be core reading for students studying scientific research methods in geography, environmental studies and related disciplines such as planning and earth science.

An Introduction to Scientific Research Methods in Geography - Daniel Montello 2006-03-06

This text provides a broad and integrative introduction to the conduct and interpretation of scientific research in geography. It covers both conceptual and technical aspects, and is applicable to all topical areas in geographic research, including human and physical geography, and geographic information science. The text discusses all parts of the research process, including scientific philosophy; basic research concepts; generating research ideas; communicating research and using library resources; sampling and research design; quantitative and qualitative data collection; data analysis, display, and interpretation;

reliability and validity; using geographic information techniques in research; and ethical conduct in research.

GeoHumanities - Michael Dear 2011-04-13

In the past decade, there has been a convergence of transdisciplinary thought characterized by geography's engagement with the humanities, and the humanities' integration of place and the tools of geography into its studies. *GeoHumanities* maps this emerging intellectual terrain with thirty cutting edge contributions from internationally renowned scholars, architects, artists, activists, and scientists. This book explores the humanities' rapidly expanding engagement with geography, and the multi-methodological inquiries that analyze the meanings of place, and then reconstructs those meanings to provoke new knowledge as well as the possibility of altered political practices. It is no coincidence that the geohumanities are forcefully emerging at a time of immense intellectual and social change. This book focuses on a range of topics to address urgent contemporary imperatives, such as the link between creativity and place; altered practices of spatial literacy; the increasing complexity of visual representation in art, culture, and science and the ubiquitous presence of geospatial technologies in the Information Age. *GeoHumanities* is essential reading for students wishing to understand the intellectual trends and forces driving scholarship and research at the intersections of geography and the humanities disciplines. These trends hold far-reaching implications for future work in these disciplines, and for understanding the changes gripping our societies and our globalizing world.

Research Methodology in Geography - K. L. Narasimha Murthy 2014
