Child Protection and Parents with a Learning Disability - Penny Morgan 2016-09-21
Child Protection and Parents with a Learning Disability provides the practical knowledge that professionals

need in order to understand common intellectual disabilities and how they might affect parenting capability. It presents clear guidance on how to carry out effective assessments and explains how

interventions might differ when working with parents who have a learning disability. It covers a broad spectrum of disabilities, including borderline conditions and Autism Spectrum Disorder. The book also explores a number of emotional and mental health issues that can occur alongside learning disabilities, such as ADHD, anxiety, depression, and attachment disorders, to show how they should be understood in the context of cognitive abilities and the parenting role. Empowering practitioners to make informed decisions about children's welfare, this is a must-have guide for all professionals working with families where a parent is affected by a learning disability.

Parenting Matters - National Academies of Sciences, Engineering, and Medicine
2016-11-21

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's

well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood,

increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for

parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

downs of this great adventure.

children to be empowered,
authentic and confident in
themselves. It is about helping

you were raised, and by the
time you raise your children, it
will dramatically change again.
This is known as the Highway
of Life and as such, there are

process... slow. Other times
you will find the ride is going
way too fast, and just want to
put your foot on the brakes.
Every child is different, every
child has challenges they will
test you with, and every
experience can be the most
profound moments of your life.

The Hurried Child, 25th anniversary edition - David Elkind 2009-02-23

"David Elkind [is] one of psychology's leading lights."-- Washington Post With the first edition of *The Hurried Child*, David Elkind emerged as the voice of parenting reason, calling our attention to the crippling effects of hurrying our children through life. He showed that by blurring the boundaries of what is age appropriate, by expecting--or imposing--too much too soon, we force our kids to grow up too fast, to mimic adult sophistication while they secretly yearn for time to act their age. In the more than two decades since this book first appeared, our society has inadvertently stepped up the assault on childhood through the media, in schools, and at home. In this twenty-fifth anniversary edition of this

classic, Dr. Elkind adds important new commentary to put a quarter century of trends and change into perspective for parents today, including a detailed, up-to-the-minute look at the Internet, classroom culture, school violence, and movies and television. Showing parents and teachers where hurrying occurs and why, Elkind offers insight, advice, and hope for encouraging healthy development while protecting the joy and freedom of childhood. "A landmark book."--Chicago Sun-Times *Parenting with Love and Logic* - Foster Cline 1990-01-01 Argues that children must learn to make their own decisions and accept the consequences, and shows parents ways to encourage responsibility while maintaining discipline *Transforming the Workforce for Children Birth Through Age 8* - National Research Council 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a

critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems.

This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in

ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

The Gift of Failure - Jessica Lahey 2015-08-11

The New York Times bestselling, groundbreaking manifesto on the critical school years when parents must learn to allow their children to experience the disappointment and frustration that occur from life's inevitable problems so that they can grow up to be successful, resilient, and self-reliant adults Modern parenting is defined by an unprecedented level of overprotectiveness: parents

who rush to school at the whim of a phone call to deliver forgotten assignments, who challenge teachers on report card disappointments, mastermind children's friendships, and interfere on the playing field. As teacher and writer Jessica Lahey explains, even though these parents see themselves as being highly responsive to their children's well being, they aren't giving them the chance to experience failure—or the opportunity to learn to solve their own problems.

Overparenting has the potential to ruin a child's confidence and undermine their education, Lahey reminds us. Teachers don't just teach reading, writing, and arithmetic. They teach responsibility, organization, manners, restraint, and foresight—important life skills children carry with them long after they leave the classroom. Providing a path toward solutions, Lahey lays out a blueprint with targeted advice for handling homework, report cards, social dynamics, and

sports. Most importantly, she sets forth a plan to help parents learn to step back and embrace their children's failures. Hard-hitting yet warm and wise, *The Gift of Failure* is essential reading for parents, educators, and psychologists nationwide who want to help children succeed.

Modern Parents, Vintage Values, Revised and Updated - Sissy Goff

2020-06-09

Why is anxiety so rampant among kids today? What's the magic age for giving my child his first cell phone? Her first social media account? How do I teach my teenager things like gratitude and respect in such an entitled and disrespectful world? Melissa Trevathan and Sissy Goff hear these types of questions on a daily basis in their counseling offices and at parenting events across the

country. Today, more than ever before, we live in a culture that is at war against our parenting. And today, more than ever before, we're meeting parents who feel lost as to how to help. This book does just that. It addresses the issues we hear parents struggling with the most when it comes to raising their children (technology, disrespect, entitlement, substance abuse, anxiety, depression, etc.), but it doesn't stop there. Melissa and Sissy move through those modern-day troubles to get back to the vintage values we all deeply value in the lives of kids. They help you discover—whether your child is a toddler or a teenager—what it looks like to cultivate kindness, gratitude, integrity, responsibility and more in the lives of the kids you love. *Modern Parents, Vintage Values* offers you a roadmap—a way through the hurdles you are facing today in your parenting—helping you discover more of how to instill those true, foundational, vintage values that will make a lasting difference in the lives of

your kids...values that are built upon an unshakeable foundation of faith and hope. And that's ultimately where this map will lead—to Christ—and to what it looks like for both you and your kids to have hope in Him in these changing times.
