*OSCEs for Medical Finals* - Hamed Khan

2013-01-22

*OSCEs for Medical Finals* has been written by doctors from a variety of specialties with extensive experience of medical education and of

organising and examining OSCEs. The book and website package consists of the most common OSCE scenarios encountered in medical finals, together with checklists, similar to OSCE mark schemes, that cover all of the key learning points students need to succeed. Each topic checklist contains comprehensive exam-focussed advice on how to maximise performance together with a range of 'insider's tips' on OSCE strategy and common OSCE pitfalls. Designed to provide enough coverage for those students who want to gain as many marks as possible in their OSCEs, and not just a book which will ensure students 'scrape a pass', the book is fully supported by a companion website at

[www.wiley.com/go/khan/osces](http://www.wiley.com/go/khan/osces), containing:

OSCE checklists from the book  
A survey of doctors and students of which OSCEs have a high chance of appearing in finals in each UK medical school

**Essential Revision Notes in Paediatrics for the MRCPCH** - Mark Beattie 2006

Downloaded from [mccordia.com](http://mccordia.com) on by  
guest

Suitable for candidates preparing for the MRCPCH exam, this title includes 24 specialty-based chapters that provide concise information in an accessible format.

Suitable for perfecting your Viva skills alone, or with a friend, it features a wide variety of questions that can enable you to face the examiners with confidence.

*Total Revision for the Final FRCA* - Tim Isitt 2007

Written specifically for the new examination format, this new book is an essential tool for all those preparing for the final FRCA exam. For easy access to key topics, a revision index is provided.

**Basic Science for the MRCS** - Andrew T. Raftery 2012

This book is a concise revision guide to the core basic sciences - anatomy, physiology and pathology - which comprise the essential knowledge required by the trainee entering the specialty of surgery. It has been written in a style to facilitate easy learning of the essential facts, with indications of both their clinical relevance and importance. This book concentrates on those topics which tend to be recurring examination themes for initial surgical training. It will be an invaluable resource for the basic surgical trainee studying for the Intercollegiate MRCS examination, as well as proving useful for those in higher surgical training and for the surgically inclined, well-motivated student. The book covers in one volume all the essentials of the basic sciences - anatomy, physiology and pathology - to aid the candidate for the MRCS examination. In covering the applied basic science the books explains the application and clinical relevance of the three sciences The text is written in an

appropriate 'bullet-point' style to allow easy reading and rapid exam preparation. The contents concentrate on the recurring common themes of the examination, thus helping direct appropriate learning and focussing on the specific important areas of knowledge. The book is illustrated with line drawings which are clearly annotated to aid learning. In this Second Edition, chapters have been updated and sections expanded to cover topics which are particularly relevant to examinations. The microbiology chapter has been rewritten, and the section on skin healing has also been extensively rewritten to include a section on burns, skin grafting and the anatomy of flaps. Each chapter has new OSCE scenario questions added to bring together the basic science and its clinical application in OSCE examinations.

*SBAs and EMQs for the MRCS Part A: A Bailey & Love Revision Guide* - Vivian A Elwell  
2011-12-30
