**Caste, Class, and Capital** - Kanta Murali  
2017-02-02

For millions of poor people in the developing world, economic growth offers prospects for improved well-being. But what are the political and social conditions conducive to growth-oriented policies in poor democracies? This book addresses this highly consequential question by focusing on a specific empirical puzzle - policy variation across Indian states in the competition for private industrial investment, a phenomenon that came to the fore after the country adopted market reforms in 1991. Through the analysis of investment policies, this book offers a novel explanation, which links social identity, class, and economic policy outcomes. Its main findings highlight a link between pro-business policies and exclusionary political trends in India's high

growth phase, and offer a sobering perspective on the current model of growth in the country. It adds to our understanding of Indian political economy as well as to the dynamics of economic development in poor democracies.

**Urban Ecology, Water Quality and Climate Change** - Arup K. Sarma 2018-03-14

This unique book brings together high-quality research contributions on ecological aspects of urbanization, water quality concerns in an urban environment, and climate change issues with a strong Indian focus under one umbrella. It includes several case studies that discuss urban water management, particularly highlighting the quality aspects. Urbanization is an ecological disturbance that the modern world accepts as essential in the absence of a better alternative that could provide an equal level of comfort. The prohibitive costs of eco-friendly production technologies are forcing the developing world to generate industrial waste that is detrimental to the environment. At the same time, the

availability of adequate fresh water is another challenge for our climate-change impacted world. The scientific community is, therefore, searching for ways towards ecologically sustainable urban development. Discussing all these issues, this book offers a useful guide for academicians, researchers, practicing engineers, and managers dealing with diverse water-related problems in urban areas.

**Ruling Dynasties of Independent India - Volume 2** - Ravindra Padalkar 2021-02-14

This book is written to get an overall idea of "dynastic politics" in India. It is always kept in mind that a citizen of India should know more about the politicians who are in the Government and form policies, etc. to take the country in the proper direction, at the same time the book should be interesting. Wherever possible, family trees are shown as well as the assets of our politicians. It was natural to start with the Nehru Gandhi family, being one of the largest and long-ruling families at the helm of all affairs. Then

State-wise, the families are chosen and the account is presented. Since the volume is huge, this book is in two volumes. States are chosen alphabetically. So, even if the Nehru Gandhi family is in Volume 1, Tamil Nadu, Telangana, Uttar Pradesh, etc. are in Volume 2. Early rulers in Indian history used to handover the throne to their sons and then to the next generations for generations to come until some larger event upset the process, mostly conspiracies by persons like very close aides of the king or a revolt. Similar lines were followed even during our democracy passing on the rule to the next generation, which gave rise to dynastic rule. Indian politics has witnessed a large spectrum of politicians from various fields. Initially, it consisted mainly of leaders from the field of law. But now, we find that we have eminent personalities from the sports field, actors, actresses, superstars from the silver screen; the literary field is no exception; we have writers, poets, and so on; economists find a special place

in the political arena; politics does not shun even criminals or few dacoits who then turned to politics after their surrender. Businessmen, kings or we can say princes from princely states as Britishers decided to call them are also found here. We have the learned people in politics as well as the illiterate people (angutha chhaap) who learnt to sign only after assuming office on getting elected.

*Muslims in Telangana* - G. Sudhir 2021-04-24

This book analyses the state of development of Muslims at the regional level. It explains the linkages between the findings of global, national, and state-level studies with regard to the current status of Muslims and broadens understanding of Muslims and their participation in virtually all major sectors, including the economy, housing, demography, health, migration, state policy, and affirmative action. The book presents the challenges faced by the community and reflects upon the socio-economic and educational conditions of Muslims in Telangana State. It

presents a comparative analysis of mortality data, maternal health, delivery care, and child immunization, as well as reproductive health aspects and children's nutritional status. It shares valuable insights into the impacts of emigration and internal migration on health among local Muslims and presents a detailed analysis of data from the Census of India, NSSO, and Commission of Inquiry on Socio-Economic and Educational Status of Muslims regarding the social, economic, and demographic situation of Muslims in Telangana, as well as their opportunities for development under the newly formed state government. The book would be of great interest to scholars and researchers in development economics, sociology, politics, history, cultural studies, minority studies, Islamic studies, and policy studies, as well as policymakers, civil society activists, and those working in media and journalism.
