Principles of Accounting - James M. Reeve 2011

Offering students an overview of all the main concepts of accounting, this text supplements explanations of the fundamental core elements with contemporary examples and online teaching resources.

Behavioral Accounting - Andreas Hellmann 2013-01-01

Mainstream accounting research is dogmatizing an image of efficient capital markets in which investors make rational decisions by evaluating all risks and returns of alternatives. In order to make such decisions, investors interpret unbiased information (which is equally available to all market participants) and select the alternative with the highest return or lowest risk. Behavioral accounting is challenging such simplistic assumptions. It is concerned with the explanation and prediction of human behavior in an accounting context such as the usefulness of financial statement data, materiality judgments, decision effects of alternative accounting procedures, and the impact of culture and language on the interpretation and application of accounting pronouncements. This book gives insights into the newest developments in behavioral accounting, and provides evidence that behavioral aspects cannot be ignored in the interpretation and application of accounting information.

Dismantling Global White Privilege - Chandran Nair 2022-01-04

White privilege damages and distorts societies around the world, not just in the United States. This book exposes its pervasive global reach and creates a new space for discourse on worldwide racial equality. As Chandran Nair shows in this uncompromising new book, a belief in the innate superiority of White people and Western culture, once the driving force behind imperialism, is now woven into the very fabric of globalization. It is so insidious that, as Nair points out, even many non-White people have internalized it, judging themselves by an alien standard. It has no rival in terms of longevity, global reach, harm done, and continuing subversion of other cultures and societies. Nair takes a comprehensive look at the destructive influence of global White privilege. He examines its impact on geopolitics, the reframing of world history, and international business practices. In the soft-power spheres of White privilege—entertainment, the news media, sports, and fashion—he offers example after example of how White cultural products remain the aspirational standard. Even environmentalism has been corrupted, dominated by a White savior mentality whereby technologies and practices built in the West will save the supposedly underdeveloped, poorly

governed, and polluted non-Western world. For all these areas, Nair gives specific suggestions for breaking the power of White privilege. It must be dismantled—not just because it is an injustice but also because we will be creating a post-Western world that has less conflict, is more united, and is better able to respond to the existential challenges facing all of us.

Education in Political Science - Anja P. Jakobi 2009-09-10

This pioneering volume is devoted to the analysis of education from the perspective of political science, applying the full range of the discipline's analytical perspectives and methodological tools. The contributions demonstrate how education policy can be explored systematically from a variety of political science perspectives: comparative politics, public policy analysis and public administration, international relations, and political theory. By applying a governance perspective on education policy, the authors explore the changing institutional settings, new actors' constellations, horizontal modes of interaction and public-private regulatory mechanisms with respect to the role of the state in this policy field. The volume

deals with questions that are not merely concerned with the content or outcomes of education, but it explicitly takes a political science view on how education politics work. Including country case studies from the Americas and across Europe, institutional analyses of education policy in the EU and the WTO/GATS as well as normative reflections on the topic, the volume provides a grand overview on the diversity of issues in education policy. Dealing with a so far neglected field of policy, this book provides a comprehensive and accessible analysis of a rapidly changing topic. Education in Political Science will be of interest to scholars and students of political science, education, sociology and economics.

Time for Socialism - Thomas Piketty 2021-10-26

A chronicle of recent events that have shaken the world, from the author of *Capital in the Twenty-First Century* "What makes this manifesto noteworthy is that it comes from . . . an economist who gained his reputation as a researcher with vaguely left-of-center sensibilities but was far from a radical. Yet the times are such . . . that even honest moderates are driven to radical remedies."—Robert Kuttner, *New York Times* As a correspondent for the French newspaper *Le Monde*, world-renowned economist Thomas Piketty has documented the rise and fall of Trump, the drama of Brexit, Emmanuel Macron's ascendance to the French presidency, the unfolding of a global pandemic, and much else besides, always from the perspective of his fight for a more equitable world. This collection brings together those articles and is prefaced by an extended introductory essay, in which Piketty argues that the time has come to support an inclusive and expansive conception of socialism as a counterweight against the hypercapitalism that defines our current economic ideology. These essays offer a first draft of history from one of the world's leading economists and public figures, detailing the struggle against inequalities and tax evasion, in favor of a federalist Europe and a globalization more respectful of work and the environment.
