Pediatric Clinical Methods - M. Singh 2019-09-30

This book beautifully blends the art and science of clinical examination of children. It has been extensively revised, updated and expanded to enable clinicians to treat children with tact and clinical skills, and their parents and attendants with concern and compassion. The importance of good communication skills and bedside manner has been emphasised for building a trustworthy and credible doctorpatient and doctorparent relationship. The chapter on abnormal physical signs and their interpretation has been expanded and the book can serve as an excellent manual to the practising pediatricians for differential diagnosis of common clinical disorders in children. A large number of additional photographs, tables, medical quotations and boxes with key points have been included. It is one of the most comprehensive publication on pediatric clinical methods to serve the felt needs of medical graduate students, pediatric residents and pediatricians to rejuvenate the dwindling art of pediatrics.

Parallel Computational Fluid Dynamics 2000 - C.B. Jensen 2001-04-27

Parallel CFD 2000, the Twelfth in an International series of meetings featuring computational fluid dynamics research on parallel computers, was held May 22-25, 2000 in Trondheim, Norway. Following the trend of the past conferences, areas such as numerical schemes and algorithms, tools and environments, load balancing, as well as interdisciplinary topics and various kinds of industrial applications were all well represented in the work presented. In addition, for the first time in the Parallel CFD conference series, the organizing committee chose to draw special attention to certain subject areas by organizing a number of special sessions. We feel the emphasis of the papers presented at the conference reflect the direction of the research within parallel CFD at the beginning of the new millennium. It seems to be a clear tendency towards increased industrial exploitation of parallel CFD. Several presentations also demonstrated how new insight is being achieved from complex simulations, and how powerful parallel computers now make it possible to use CFD within a broader interdisciplinary setting. Obviously, successful application of parallel CFD still rests on the underlying fundamental principles. Therefore, numerical algorithms, development tools, and parallelization techniques are still as important as when parallel CFD was in its infancy. Furthermore, the novel concepts of affordable parallel computing as well as metacomputing show that exciting developments are still taking place. As is often pointed out however, the real power of parallel CFD comes from the combination of all the disciplines involved: Physics, mathematics, and computer science. This is probably one of the principal reasons for the continued popularity of the Parallel CFD Conferences series, as well as the inspiration behind much of the excellent work carried out on the subject. We hope that the papers in this book, both on an individual basis and as a whole, will contribute to that inspiration. Further details of Parallel CFD'99, as well as other conferences in this series, are available at <http://www.parcfd.org>

Modern Maximum Power Point Tracking Techniques for Photovoltaic Energy Systems - Ali M. Eltamaly 2019-08-01

This book introduces and analyses the latest maximum power point tracking (MPPT) techniques, which can effectively reduce the cost of power generated from photovoltaic energy systems. It also presents a detailed description, analysis, and comparison of various MPPT techniques applied to stand-alone systems and those interfaced with electric utilities, examining their performance under normal and abnormal operating conditions. These techniques, which can be conventional or smart, are a current hot topic, and this book is a valuable reference resource for academic researchers and industry professionals who are interested in exploring and implementing advanced MPPT for photovoltaic systems. It is also useful for graduate students who are looking to expand their knowledge of MPPT techniques.

The Jackaroo - Owen Genty 2006-01-01

Jackaroo; n. a male station hand. That is according to the "Australian Slang Dictionary" whereas the Macquarie Dictionary gives a more realistic version. "A jack of all trades". Certainly a jackaroo is far more than 'a male station hand', which will be evident as the reader moves through this recount of the writer's five years of 'Station Management Apprenticeship"', possibly a more precise definition of the word. ('Station' being a large sheep and/or cattle property/ranch). The origin of the word 'jackaroo' has been debated as long as the word has been in existence, but the most popular belief is that early English migrants, who worked on stations in the Australian Outback, were given the name of "Jack Raw", being raw to the ways of the Australian bush. One such English migrant, whose name was Jack Carew may have had an influence on the foundation of the word. There is also the more recent female counterpart, known as a jillaroo. It is however, generally agreed that the word has no connection with the famed Australian icon, the kangaroo.

Word Nerd - Susin Nielsen 2016-10-06

Ambrose Bukowski is a twelve-year-old with a talent for mismatching his clothes, for saying the wrong thing at the worst possible time, and for words. In short, he's a self-described nerd. Making friends is especially hard because he and his overprotective mother, Irene, have had to move so often. And when bullies at his latest school almost kill him by deliberately slipping a peanut into his sandwich to set off his allergy, it's his mother who has the extreme reaction. From now on, Ambrose has to be home-schooled. Then Ambrose strikes up an unlikely friendship with the landlord's son, Cosmo, an ex-con who's been in prison. They have nothing in common except for Scrabble. But a small deception grows out of control when Ambrose convinces a reluctant Cosmo to take him to a Scrabble club. Could this spell disaster for Ambrose?

Made Realities - Julia Franck 2021-05

Recognising strangeness in familiar objects, the present in the past, the construed in what is authentic -- the four masterly photographers show excerpts from our world in which the boundary between reality and imagination becomes blurred. From fleeting everyday scenes to mysterious happenings and historical events, they reveal a complex and multi-layered reality. Thomas Demand, Philip-Lorca diCorcia, Andreas Gursky and Jeff Wall use the proximity to reality and the momentary nature of photography in order to create their idiosyncratic viewpoints of reality. What is real? They play with the viewers' perceptions, irritate and invite them to an individual interpretation of what is shown. This exclusive volume presents the works of the stars of the contemporary international photography scene magnificently and in clearly narrated texts.

The Geometry of Holding Hands - Alexander McCall Smith 2020-07-28

Isabel finds herself entangled in some tricky familial and financial situations that will require all of her kindness, charm, and philosophical expertise to navigate. Just when Isabel and Jamie finally seem to have some time to connect and unwind, a wealthy Edinburgh resident reaches out to Isabel with an unusual request—he would like her to become the executor of his large Highland estate. Though Isabel initially demurs, he presses on. He has only a short time to live, and, without any direct heirs, is struggling to determine which of his three cousins would be the best caretaker. Should it go to the bohemian artist, the savvy city property developer, or the quiet, unassuming bachelor? As if this weren't enough to keep Isabel occupied, she's also spending more time helping her niece Cat at the deli. Cat, perennially unlucky in love, seems to have finally found her match in the leonine Leo. But Isabel is beginning to suspect that Leo might be interested in more than Cat's charms, namely her access to the family trust. Isabel will need to rely upon remarkable reserves of intelligence and compassion in order to give all parties exactly what they want and deserve—no more, and no less.
