Infrared Spectroscopy of Symmetric and Spherical Spindles for Space Observation 1 - Pierre-Richard Dahoo 2021-03-31

This book is dedicated to the description and application of various different theoretical models to identify the near and mid-infrared spectra of symmetric and spherical top molecules in their gaseous form.

Theoretical models based on the use of group theory are applied to rigid and non-rigid molecules, characterized by the phenomenon of tunneling and large amplitude motions. The calculation of vibration-rotation energy levels and the analysis of infrared transitions are applied to molecules of ammonia (NH<sub>3</sub>) and methane (CH<sub>4</sub>). The applications show how interactions at the molecular scale modify the near and mid-infrared spectra of isolated molecules, under the influence of the pressure of a nano-cage (the substitution site of a rare gas matrix, clathrate, fullerene or zeolite) or a surface, and allow us to identify the characteristics of the

perturbing environment. This book provides valuable support for teachers and researchers but is also intended for engineering students, working research engineers and Master's and doctorate students.

**Thunderstorm** - Ratan Kumar Sambharia 2015-12-10

In fifteen stories that are at once grim, wryly ironic, humorous and affecting, acclaimed Rajasthani writer Ratan Kumar Sambharia portrays with rare acuity the injustices rampant in a caste-driven society and the triggers that spark rebellion. Poverty and greed degrade blood ties; money plays a dramatic role in changing equations between oppressor and oppressed; livestock and land become precious beyond measure. Yet, love ? between men and women, mother and child, a man and his land, and human beings and the animals they nurture ? underlies such dark overtones, and integrity and honour shine through in the bleakest

moments. Remarkable for their craft and rendered here in an authentic translation, these deceptively simple stories are narratives of love and anger, hope and fortitude, and subtly negotiate equality in a society inherently marked by inequity.

**The Wrestler's Body** - Joseph S. Alter 1992-08-03

The Wrestler's Body tells the story of a way of life organized in terms of physical self-development. While Indian wrestlers are competitive athletes, they are also moral reformers whose conception of self and society is fundamentally somatic. Using the insights of anthropology,

Joseph Alter writes an ethnography of the wrestler's physique that elucidates the somatic structure of the wrestler's identity and ideology. Young men in North India may choose to join an akhara, or gymnasium, where they subject themselves to a complex program of physical and moral fitness. Alter's first-hand description of each detail of the wrestler's regimen offers a unique perspective on South Asian culture and society. Wrestlers feel that moral reform of Indian national character is essential and advocate their way of life as an ideology of national health. Everyone is called on to become a wrestler and build collective strength through self-discipline.

**You Ask, I Tell** - Hansa Wadkar 2014-04-01

The rise to stardom and tragic fall of one of the heroines of Indian film. Hansa Wadkar (born Ratan Bhalchandra) was one of Maharashtra's best known stage and screen personalities. By the time she was married — to a much older family friend and impresario when she was just 15 — she had already starred in nine or ten movies and was becoming a name in the film world. Supporting her family on her earnings, her brother sick with malaria, and both parents having taken to drink, life was not easy for the young woman. But Hansa was not only beautiful and immensely talented, she was tough, wilful, capricious and headstrong. Her autobiography, Sangtye Aika published in 1970 and translated into

English here for the first time, created a sensation for its frankness and boldness. It was later made into a film, *Bhumika*, by the legendary director Shyam Benegal and starred Smita Patil in the title role.
