Featured tales include several of the author's personal favorites: "A Scandal in Bohemia" -- in which a king is blackmailed by a former lover and Holmes matches wits with the only woman to attract his open admiration -- plus "The Speckled Band," "The Red-Headed League," and "The Five Orange Pips." Additional mysteries include "The Blue Carbuncle," "The Engineer's Thumb," "The Beryl Coronet," "The Copper Beeches," and four others.

The Time Ship - Enrique Gaspar 2012-07-05

H. G. Wells wasn't the only nineteenth-century writer to dream of a time machine. The Spanish playwright Enrique Gaspar published *El anacrónopete*—"He who flies against time"—eight years before Wells's influential work appeared. The novel begins at the 1878 Paris Exposition, where Dr. Don Sindulfo unveils his new invention—which looks like a giant sailing vessel. Soon the doctor embarks on a voyage back in time, accompanied by a motley crew of French prostitutes and Spanish soldiers. The purpose of his expedition is to track down the imprisoned wife of a third-century Chinese emperor, believed to possess the secret to immortality. A classic tale of obsession, high adventure, and star-crossed love, *The Time Ship* includes intricately drawn illustrations from the original 1887 edition, and a critical introduction that argues persuasively for *The Time Ship*'s historical importance to science fiction and world literature.

Futurism - Giovanni Lista 2001

Born in Italy, the first avant-garde of the twentieth century - before Cubism, Dadaism and Surrealism -, Futurism is a major landmark in the history of art and of modern thought. Rather than a school of painting or literature, it was a revolutionary movement whose aim was to create a new awareness and a new approach to the world in general and to art in particular. It embodied the determination to perpetually regenerate man confronted with the progress of technology (electricity, mechanization, telecommunication ...). The Futurists' challenge was to combine all the aspects of modernism within aesthetic creation, re-considering them both in a single dynamic sweep. Ranging from plastic arts to culinary arts, they gave birth to amazing works that would become references for the following avant-gardes, and today, a legacy claimed by many artists. In this reference summing-up, the author reviews the different aesthetic stages of the movement, from "plastic dynamism" in the 1910s to aeropainting in the 1930s, and examines the relationship, long the object of controversy, between the movement and the Italian Fascist government.

Uncle Tungsten - Oliver Sacks 2013-12-11

Long before Oliver Sacks became a distinguished neurologist and bestselling writer, he was a small English boy fascinated by metals—also by chemical reactions (the louder and smellier the better), photography, squids and cuttlefish, H.G. Wells, and the periodic table. In this endlessly charming and eloquent memoir, the author of *The Man Who Mistook His Wife for a Hat* and *Awakenings* chronicles his love affair with science and the magnificently odd and sometimes harrowing childhood in which that love affair unfolded. In *Uncle Tungsten* we meet Sacks' extraordinary family, from his surgeon mother (who introduces the fourteen-year-old Oliver to the art of human dissection) and his father, a family doctor who imbues in his son an early enthusiasm for housecalls, to his "Uncle Tungsten," whose factory produces tungsten-filament lightbulbs. We follow the young Oliver as he is exiled at the age of six to a grim, sadistic boarding school to escape the London Blitz, and later watch as he sets about passionately reliving the exploits of his chemical heroes—in his own home laboratory. *Uncle Tungsten* is a crystalline view of a brilliant young mind springing to life, a story of growing up which is by turns elegiac, comic, and wistful,

full of the electrifying joy of discovery.

But the vast expanse of Alaska offers him a peace he's never known. Alone, removed from pack life, he can focus on his research and try to forget his life before. But duty has a way of inviting itself in, and Flynn finds himself doing two reckless things in one week: leaving the safety of Alaska to save his brother Connor's life, and unwittingly falling in love with Evie Thompson, a woman who doesn't deserve to be drawn into his terrifying world. Connor carries news of their father's descent into madness, and it looks like neither geography nor Flynn's attempts at disengagement will put off a confrontation. Flynn had finally begun to believe that he might deserve something good in his life - something like Evie - but to move forward in the light, he must first reconcile with the dark.

THE HAPPY PRINCE - Oscar Wilde 1922

THE HAPPY PRINCE High above the city, on a tall column, stood the statue of the Happy Prince. He was gilded all over with thin leaves of fine gold, for eyes he had two bright sapphires, and a large red ruby glowed on his sword-hilt. He was very much admired indeed. "He is as beautiful as a weathercock," remarked one of the Town Councillors who wished to gain a reputation for having artistic tastes; "only not quite so useful," he added, fearing lest people

should think him unpractical, which he really was not. "Why can't you be like the Happy Prince?" asked a sensible mother of her little boy who was crying for the moon. "The Happy Prince never dreams of crying for anything." "I am glad there is some one in the world who is quite happy," muttered a disappointed man as he gazed at the wonderful statue. "He looks just like an angel," said the Charity Children as they came out of the cathedral in their bright scarlet cloaks and their clean white pinafores. "How do you know?" said the Mathematical Master, "you have never seen one." "Ah! but we have, in our dreams," answered the children; and the Mathematical Master frowned and looked very severe, for he did not approve of children dreaming. One night there flew over the city a little Swallow. His friends had gone away to Egypt six weeks before, but he had stayed behind, for he was in love with the most beautiful Reed. He had met her early in the spring as he was flying down the river after a big yellow moth, and had been so attracted by her slender waist that he had stopped to talk to her. "Shall I love you?" said the Swallow, who liked to come to the point at once, and the Reed made him a low bow. So he flew round and round her, touching the water with his wings, and making silver ripples. This was his courtship, and it lasted all through the summer. "It is a ridiculous attachment," twittered the other Swallows; "she has no money, and far too many relations"; and indeed the river was quite full of Reeds. Then, when the autumn came they all flew away. After they had gone he felt lonely, and began to tire of his ladylove. "She has no conversation," he said, "and I am afraid that she is a coquette, for she is always flirting with the wind." And certainly, whenever the wind blew, the Reed made the most graceful curtseys. "I admit that she is domestic," he continued, "but I love travelling, and my wife, consequently, should love travelling also." "Will you come away with me?" he said finally to her; but the Reed shook her head, she was so attached to her home. "You have been trifling with me," he cried. "I am off to the Pyramids. Good-bye!" and he flew away.
